Secret Amazon Reports Expose Company Spying on Labor, Environmental Groups

Leaked documents reveal Amazon's reliance on Pinkerton operatives to spy on workers and its extensive monitoring of lab...

VICE.COM

Pinkertons, it really is the 20's. Not that much had changed between then.

> Amazon removed two job postings for intelligence analysts for its Global Security Operations Center who could track "labor organizing threats" to the company. "Fluency (written and spoken) of a second language such as Hindi, Tagalog, Spanish, Arabic, French, Mandarin, Korean, Japanese or Brazilian Portuguese highly desired," the posting read, suggesting the company is tracking labor organizing activity around the world.

It’s been a while since I posted an update about my Beauty and the Beast project here! I’ve teased a few sketches on twitter and instagram over the past few months, and I thought I should share them here, too. A publisher has picked up the book, and so far I’ve got the manuscript and all the roughs complete. I still have a long way to go before it’s finished (it’s just over 300 pages!) and it hasn’t been officially announced yet, but I’m working on it! Hopefully details like the title and release date will be available soon.

Havana| The Cuban Coast Guard announced this morning, that they had in...

The Cuban authorities spotted the ship for the first time on May 16, near a restricted military zone, west of Havana. They made many unsuccessful attempts to communicate with the crew and finally mobilized three patrol boats to intercept it.

When they reached it, they were surprised to find that the ship was actually a nearly 100-year old steamer identified as the Cotopaxi, a name famously associated with the legend of the Bermuda Triangle.

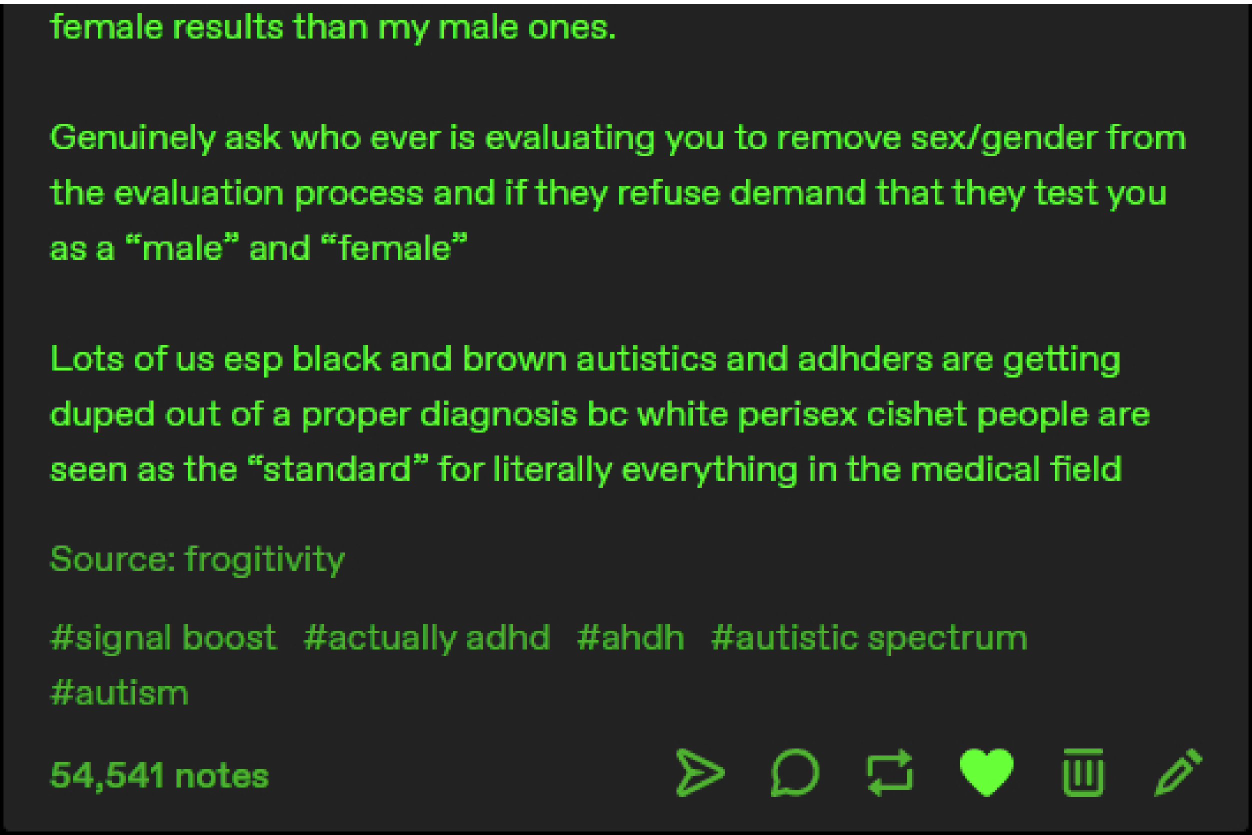
I refused to give my adhd evaluator my gender/sex so she logged my traits and answers from the questionaires both for the "male" adhd and "female" adhd traits and the results varied so much that even my evaluator was shocked by it bc it was the first time she had done both "genders" for one person (and i think it opened her eyes on how wrong and inaccurate sexed tests/evals are). my hyperactivity, and impulsivity scored lower (aka downplayed) on the female page but had a HUGEEEEE spike for it on the male page, their were things like my emotional dysregulation that were also"less apparent" on my



female results than my male ones.

Genuinely ask who ever is evaluating you to remove sex/gender from the evaluation process and if they refuse demand that they test you as a “male” and “female”

The “The Glory Hole” at the Monticello Dam in Lake Berryessa, California, came in handy earlier this year for the first time in a decade due to the heavy rains California had. The 72-foot wide hole was put in place to handle any potential overflow, funnelling excess water down to Putah Creek on the other side of the dam. Lake Berryessa can hold about 521 billion gallons of water before needing the spillway, so as you can imagine it’s a rare sight to see in action!

Tomb of Bannentiu, Bahariya Oasis

Bannentiu tomb located in Bahariya oasis in Western Desert. It was plundered in antiquity and re-used for collective burials. In fact, it was during the Roman Period. Furthermore, the tomb shows that pious nobility of the oasis during the Late Period. And that is why Egyptologists consider it important. In fact, the decoration in the tomb damaged some years ago. It was when thieves hacked away some of the reliefs.

characters are supposed to have flaws

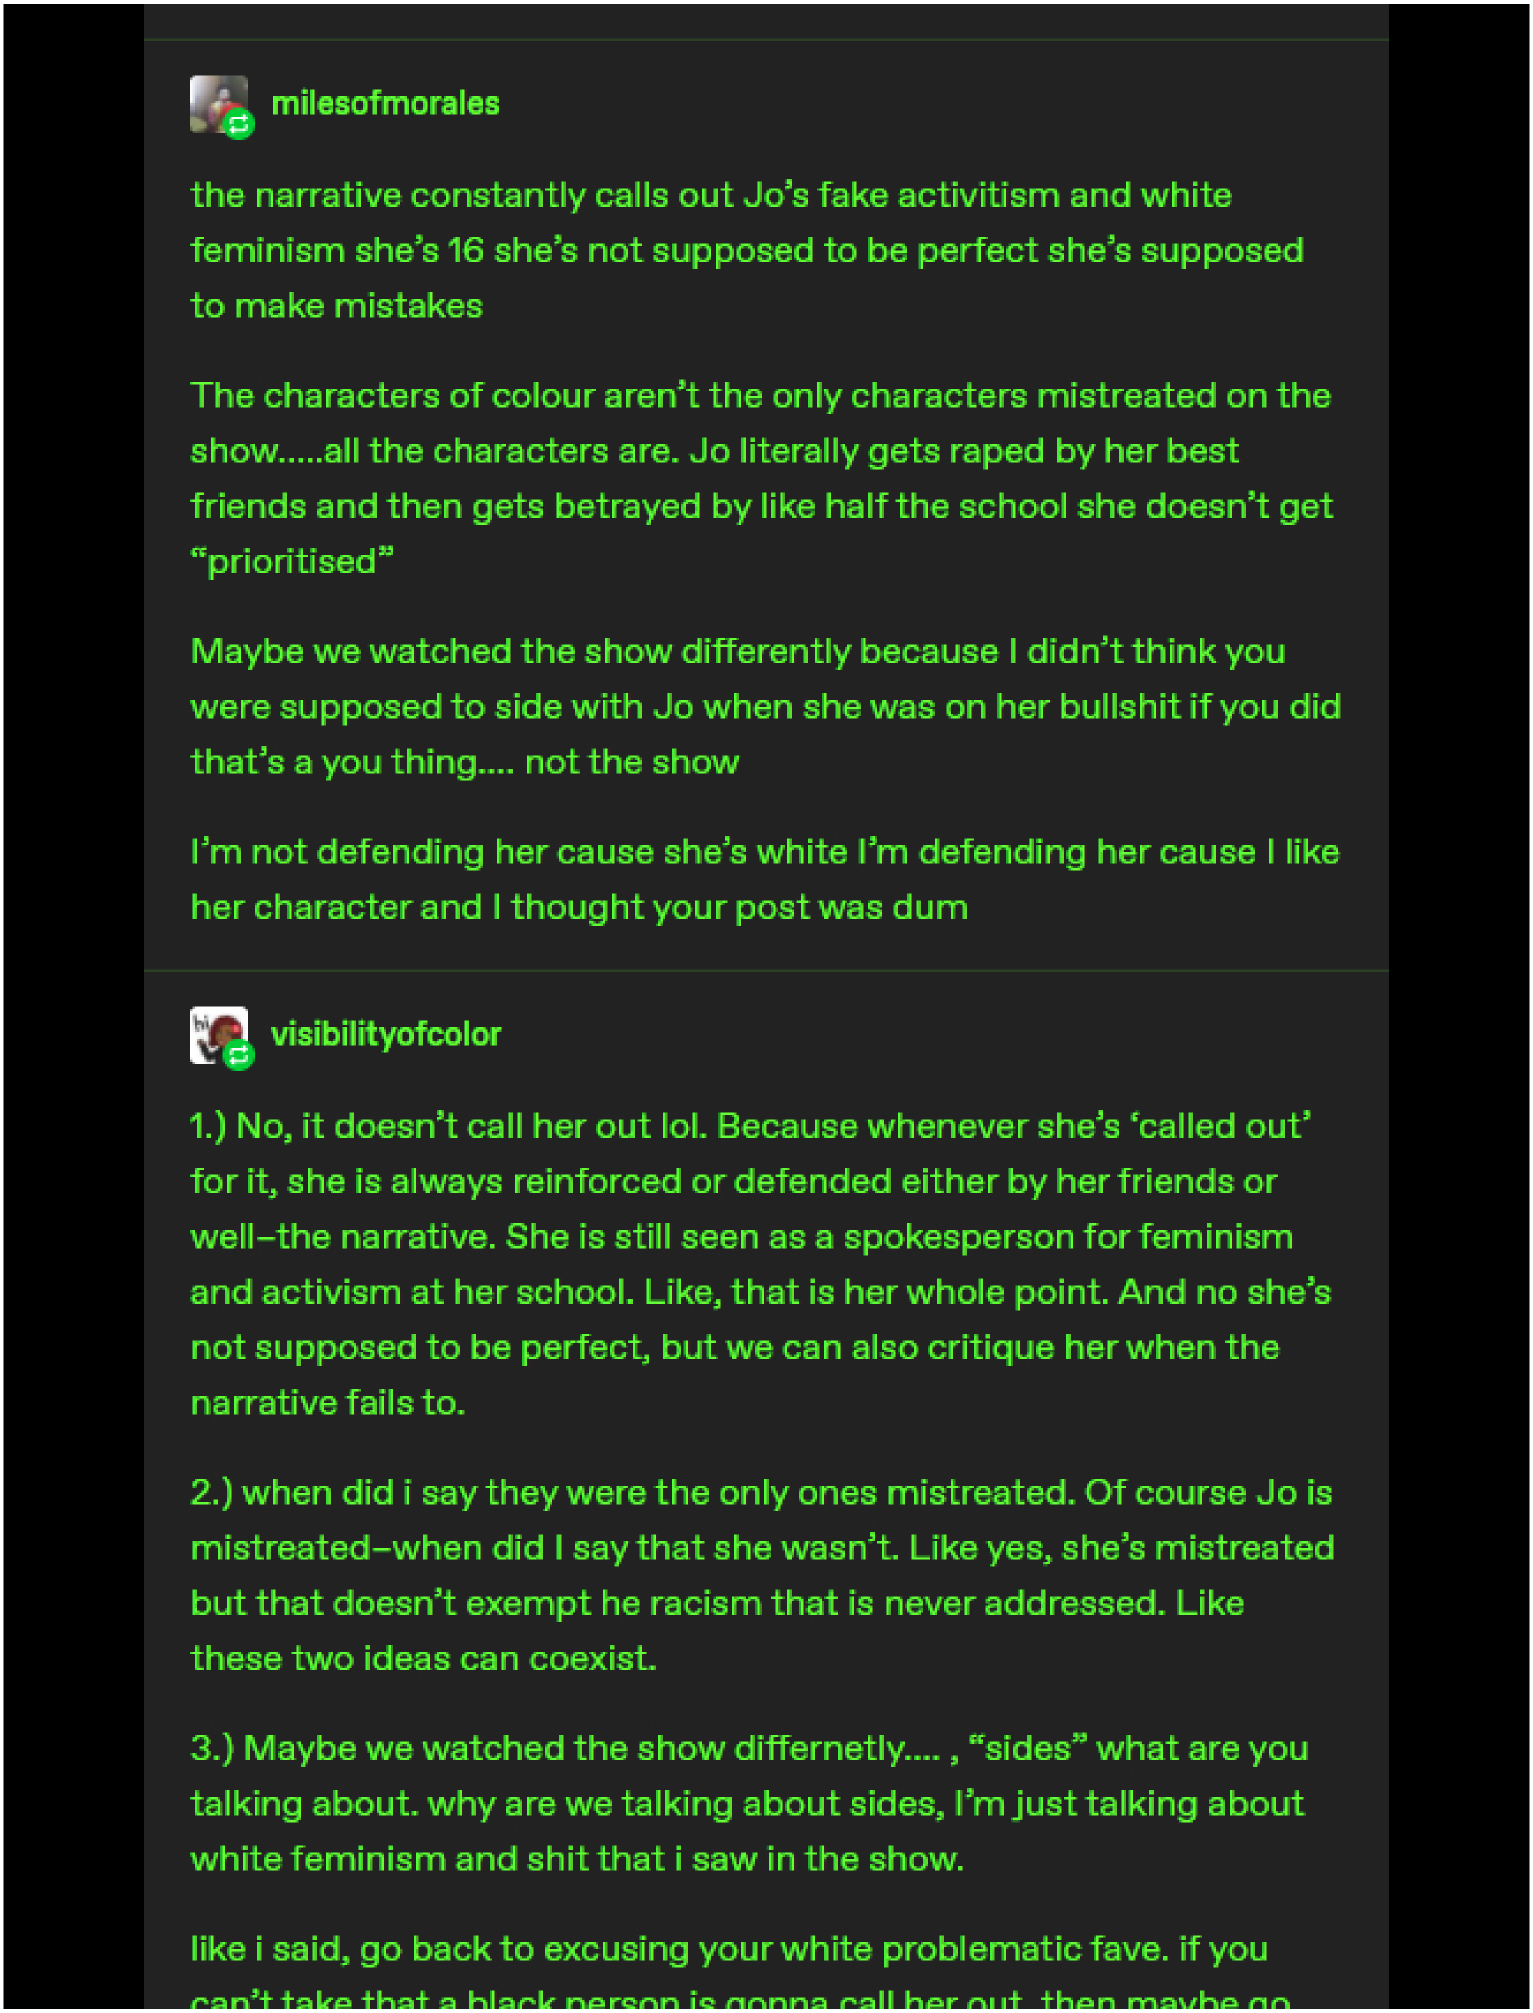
this shit is soo annoying whenever it's brought up in defense of a racist character. there are flaws, and then there are characters whose narratives are filled with racism, and white feminism while the narrative refuses to call those issues out or correct them. and then at the same time, actual characters of color are mistreated.

so no–it's more than flaws lmao.

y'all really need to learn the difference between characters flaws, and narratives that prioritize white women–and racist white women at that over actual characters of color.

y'all will do anything to defend your annoying white faves.

@milesofmorales



milesofmorales

the narrative constantly calls out Jo's fake activitism and white feminism she's 16 she's not supposed to be perfect she's supposed to make mistakes

The characters of colour aren't the only characters mistreated on the show…..all the characters are. Jo literally gets raped by her best friends and then gets betrayed by like half the school she doesn't get "prioritised"

Maybe we watched the show differently because I didn't think you were supposed to side with Jo when she was on her bullshit if you did that's a you thing…. not the show

I'm not defending her cause she's white I'm defending her cause I like her character and I thought your post was dum

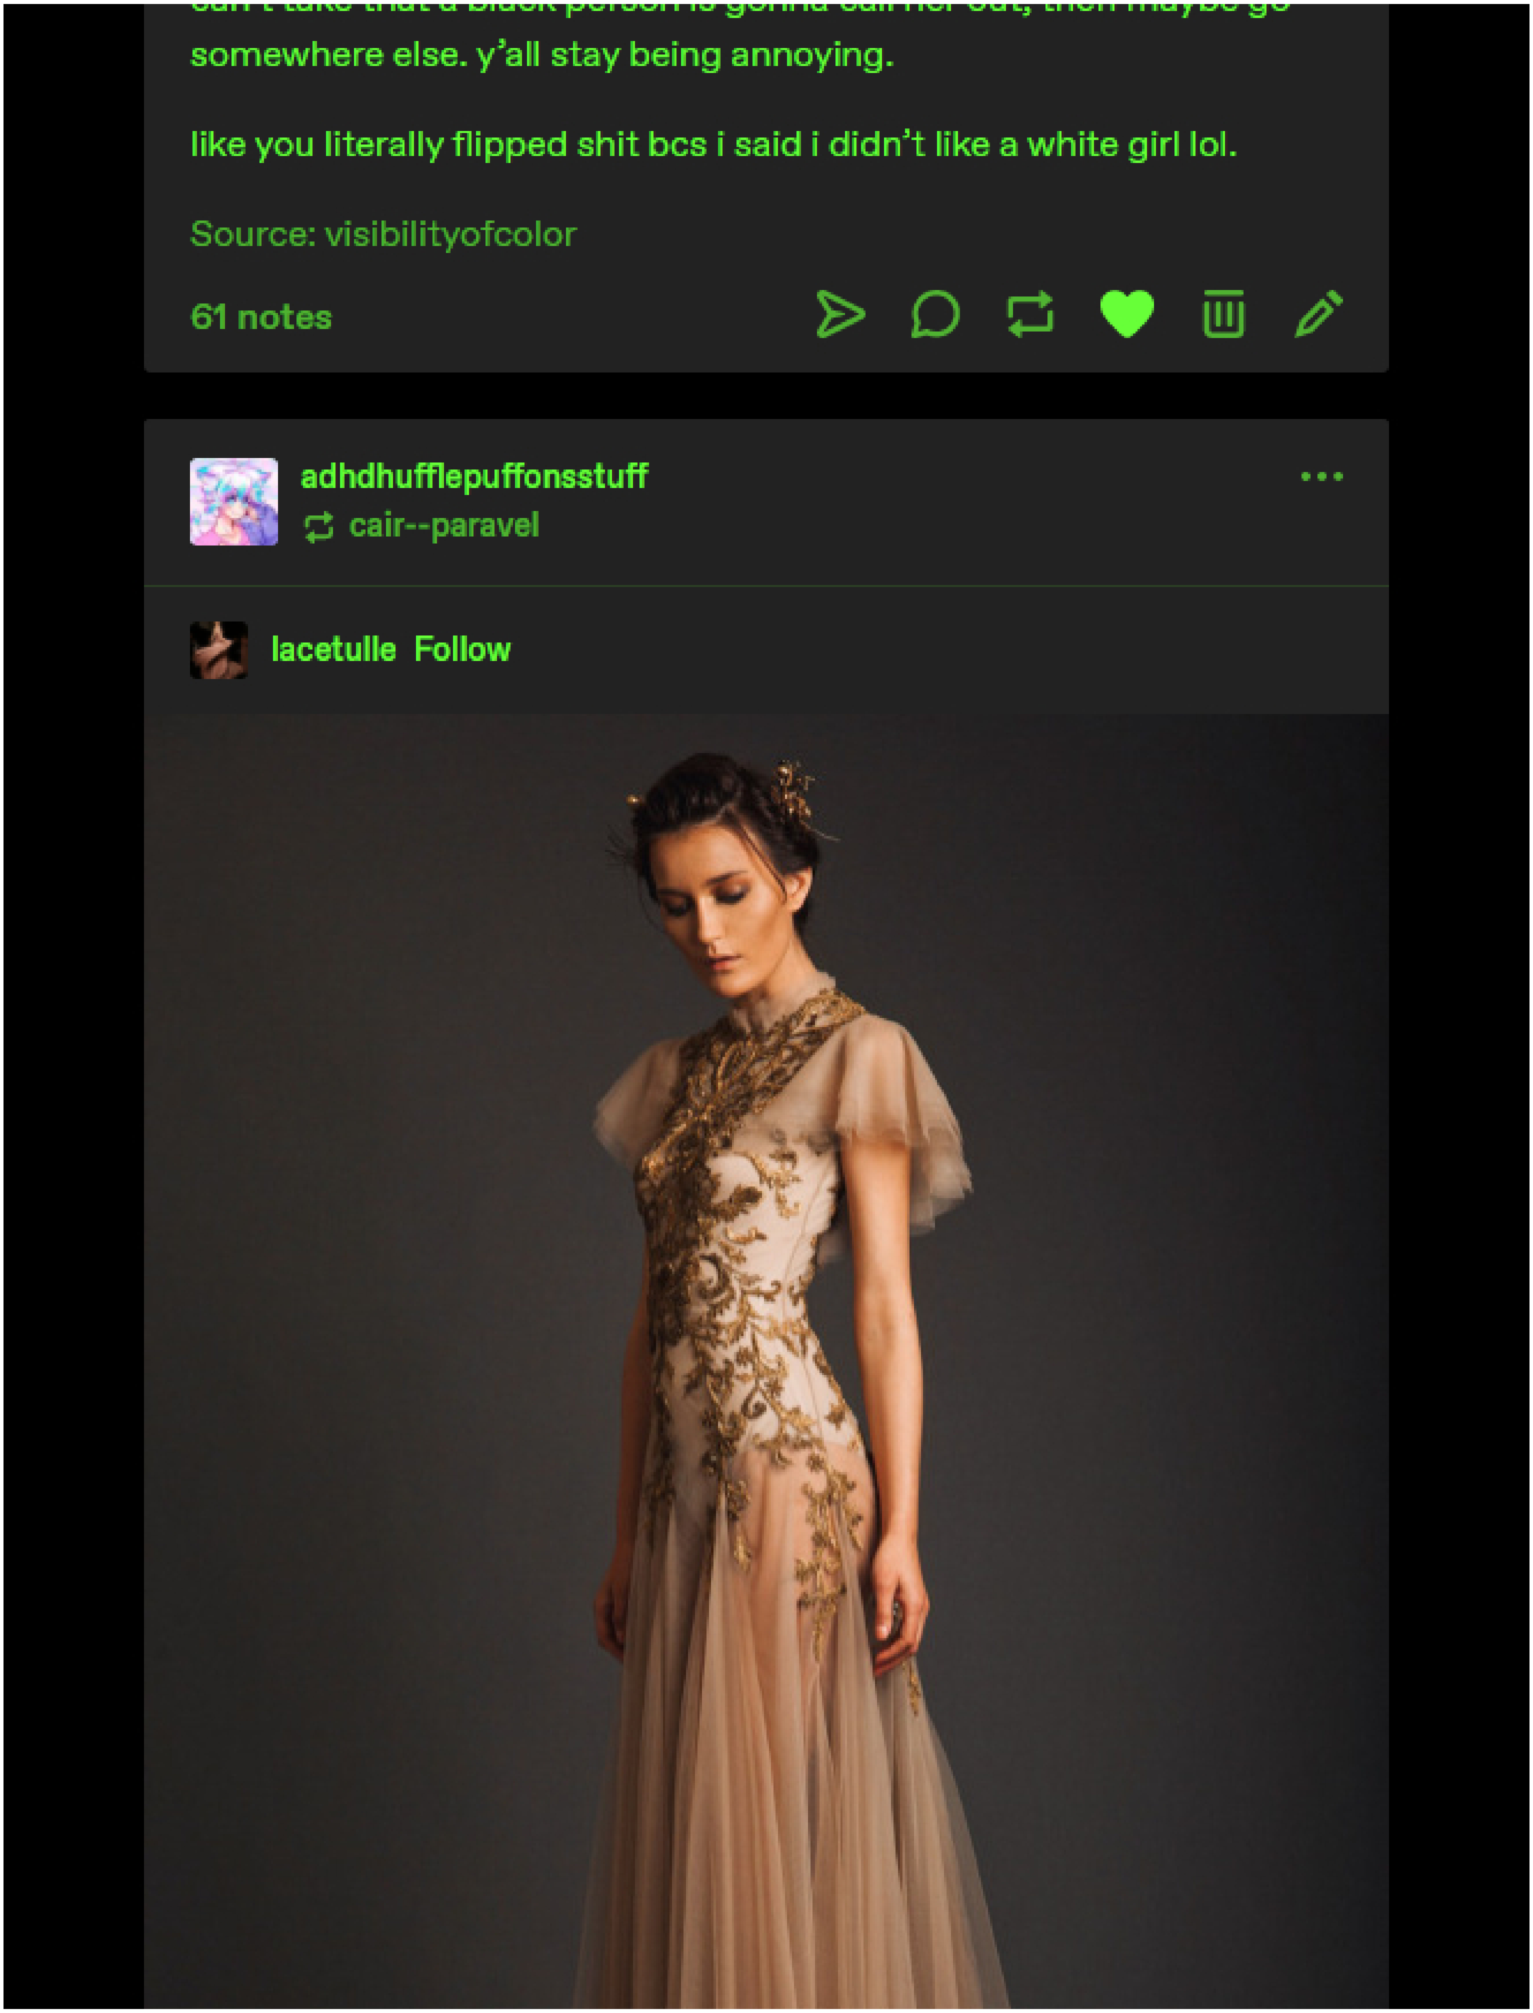
visibilityofcolor

1.) No, it doesn't call her out lol. Because whenever she's 'called out' for it, she is always reinforced or defended either by her friends or well–the narrative. She is still seen as a spokesperson for feminism and activism at her school. Like, that is her whole point. And no she's not supposed to be perfect, but we can also critique her when the narrative fails to.

2.) when did i say they were the only ones mistreated. Of course Jo is mistreated–when did I say that she wasn't. Like yes, she's mistreated but that doesn't exempt he racism that is never addressed. Like these two ideas can coexist.

3.) Maybe we watched the show differnetly…. , "sides" what are you talking about. why are we talking about sides, I'm just talking about white feminism and shit that i saw in the show.

like i said, go back to excusing your white problematic fave. if you can't take that a black person is gonna call her out, then maybe go



somewhere else. y'all stay being annoying.

like you literally flipped shit bcs i said i didn't like a white girl lol.

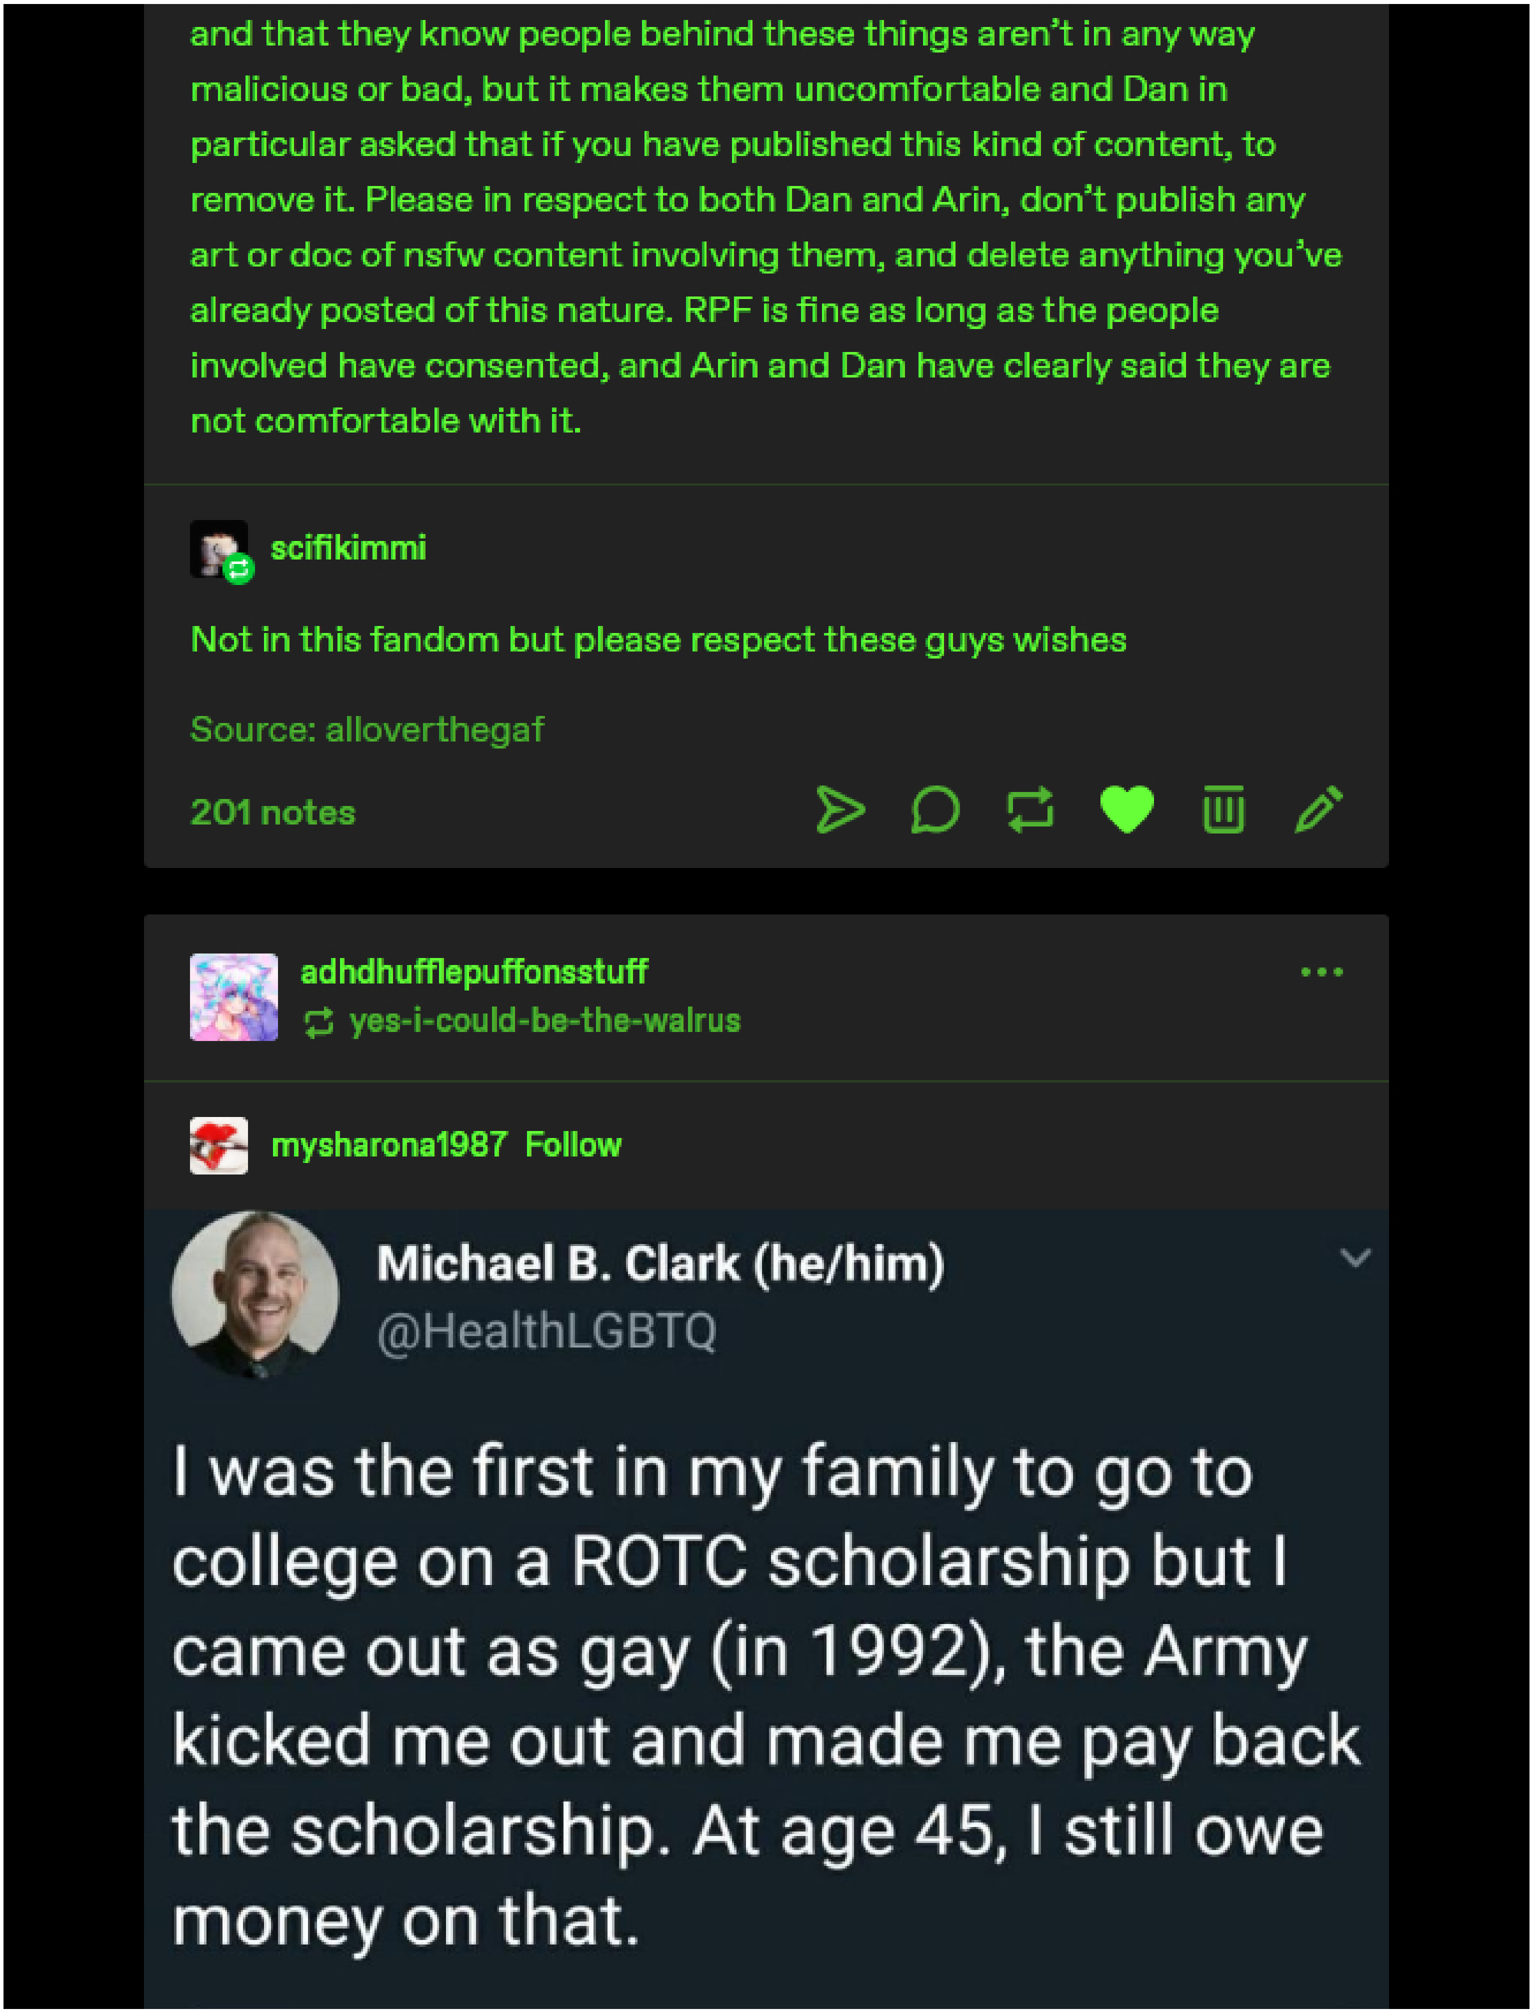
Hey y'all in case you missed it in a video put out yesterday both Dan and Arin expressed very genuine discomfort about any sexual fanart or fanfiction about them. Not about them being together so much as being sexually together. They made a point of saying they're not mad



and that they know people behind these things aren't in any way malicious or bad, but it makes them uncomfortable and Dan in particular asked that if you have published this kind of content, to remove it. Please in respect to both Dan and Arin, don't publish any art or doc of nsfw content involving them, and delete anything you've already posted of this nature. RPF is fine as long as the people involved have consented, and Arin and Dan have clearly said they are not comfortable with it.

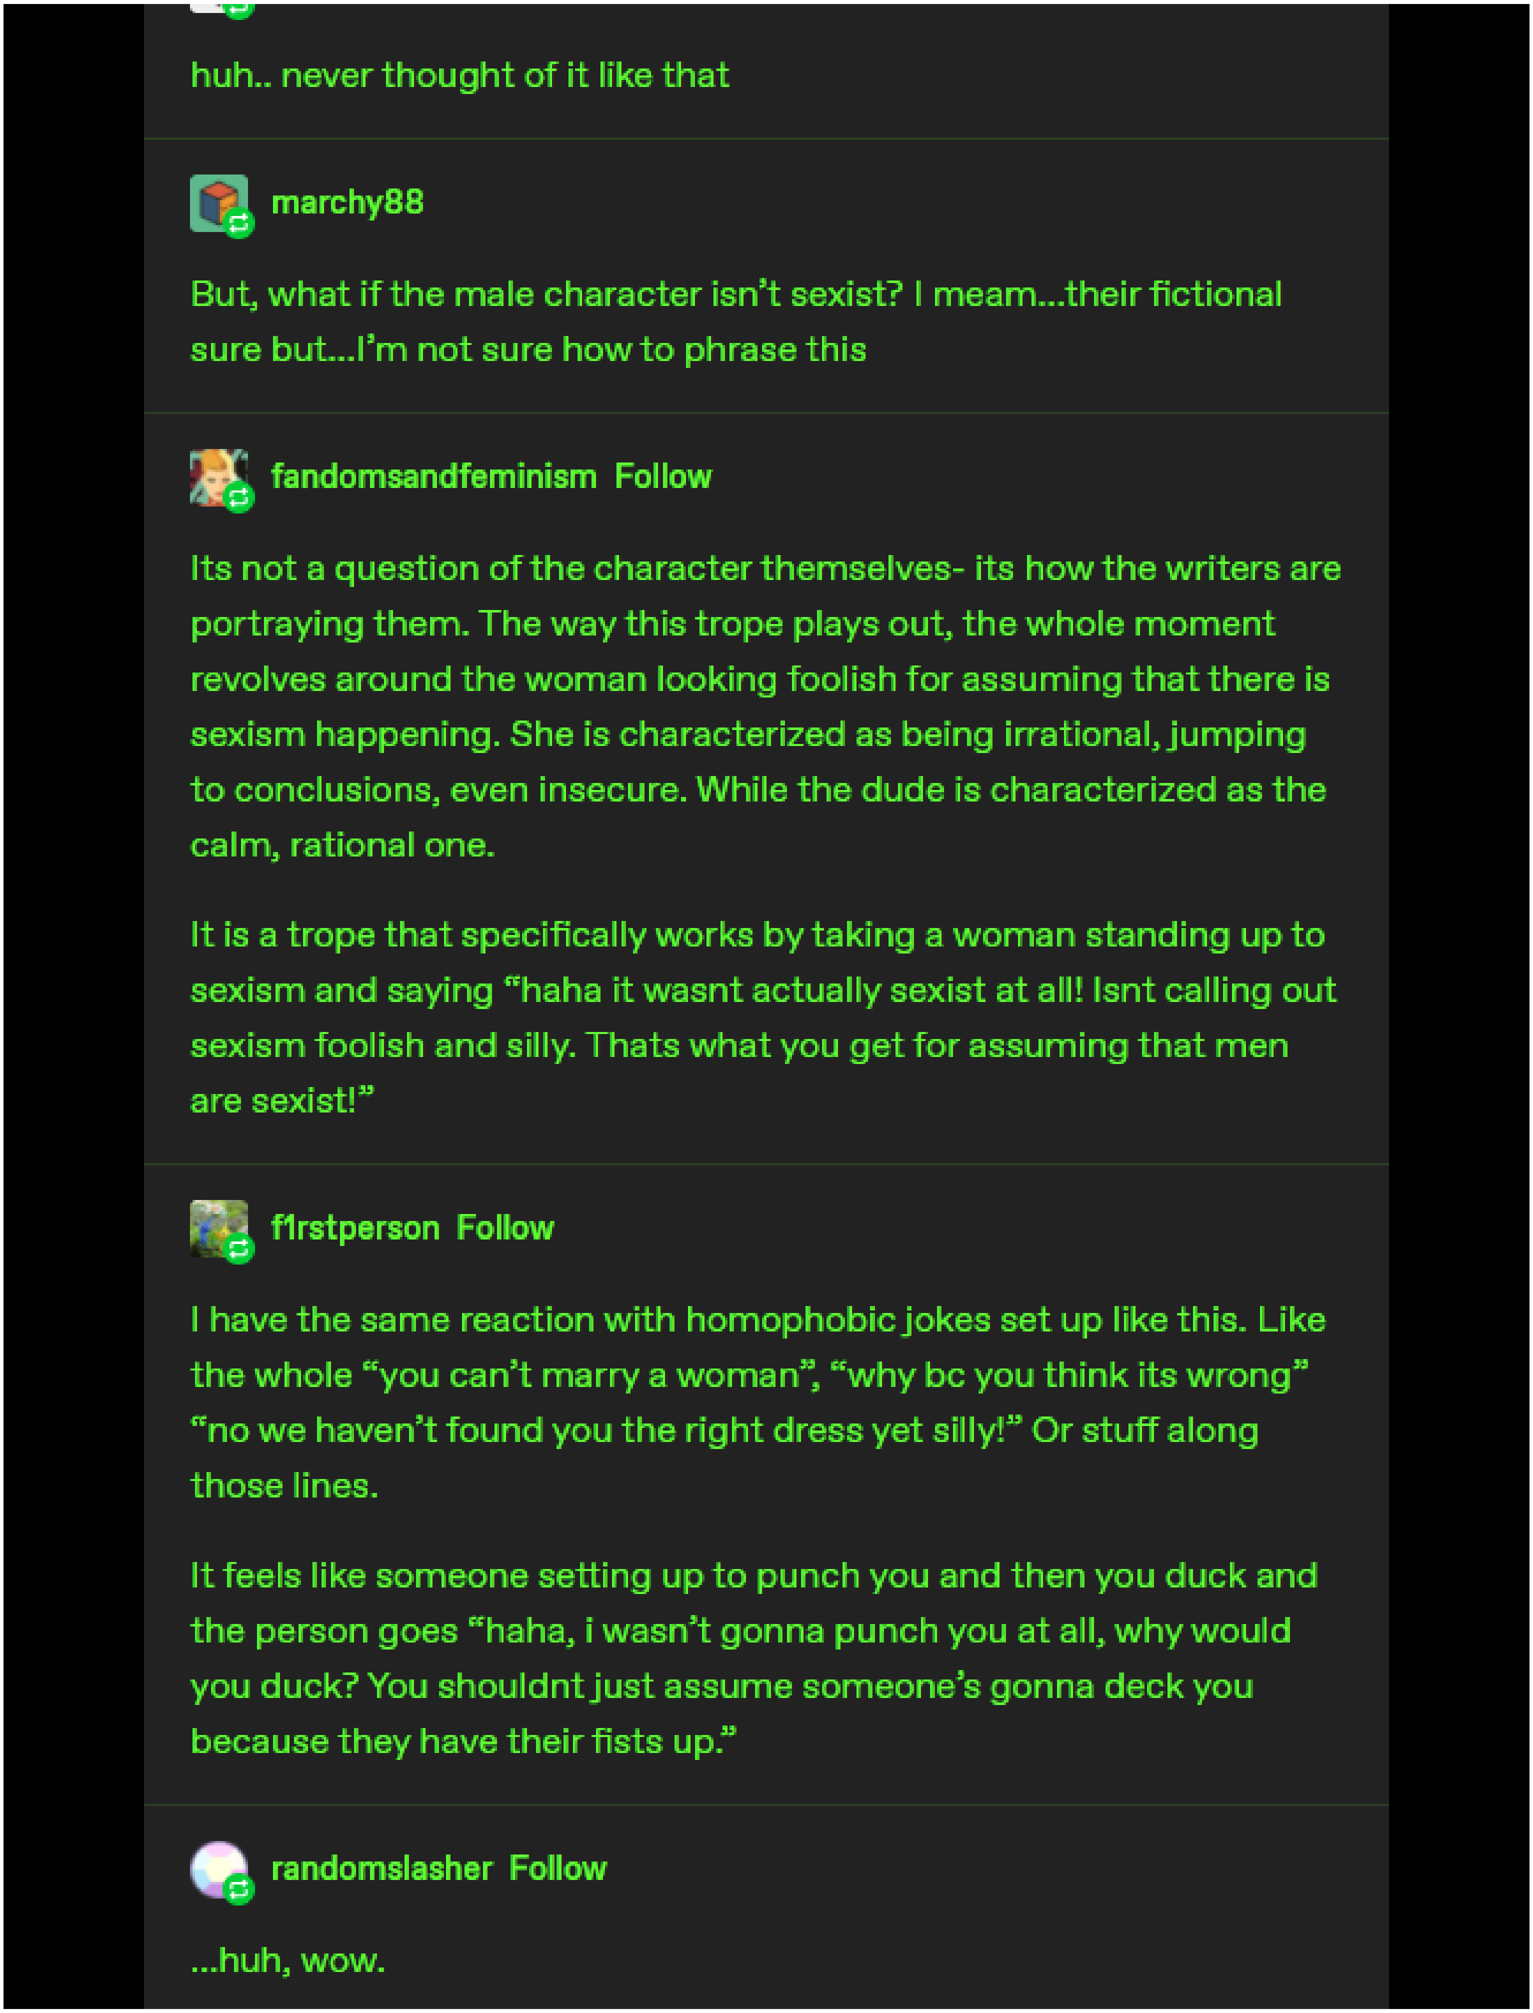
One of my least favourite dialogue tropes is when a man tells a woman, "You can't do that" or "I wouldn't do that if I were you" and she says, "Why? Because I'm a woman and therefore too weak to handle this/can't take care of myself?" or something to that effect and the guy replies with, "No, because everyone who tried that ended up with a bullet in their brain" or something equally reasonable and not gender-specific that paints him as the rational not sexist guy and the woman as an irrational paranoid feminist who searches for sexism in everything. This whole scenario is built on the idea that sexism is over and women's fears and suspicions don't have a leg to stand on. It's also self-congratulatory pseudofeminism bc it's supposed to make the viewer/reader/listener feel that in this specific work of fiction women are treated respectfully and as equal with men.

mentethemage



huh.. never thought of it like that

marchy88

But, what if the male character isn’t sexist? I meam…their fictional sure but…I’m not sure how to phrase this

fandomsandfeminism Follow

Its not a question of the character themselves- its how the writers are portraying them. The way this trope plays out, the whole moment revolves around the woman looking foolish for assuming that there is sexism happening. She is characterized as being irrational, jumping to conclusions, even insecure. While the dude is characterized as the calm, rational one.

It is a trope that specifically works by taking a woman standing up to sexism and saying “haha it wasnt actually sexist at all! Isnt calling out sexism foolish and silly. Thats what you get for assuming that men are sexist!”

f1rstperson Follow

I have the same reaction with homophobic jokes set up like this. Like the whole “you can’t marry a woman”, “why bc you think its wrong” “no we haven’t found you the right dress yet silly!” Or stuff along those lines.

It feels like someone setting up to punch you and then you duck and the person goes “haha, i wasn’t gonna punch you at all, why would you duck? You shouldnt just assume someone’s gonna deck you because they have their fists up.”

randomslasher Follow

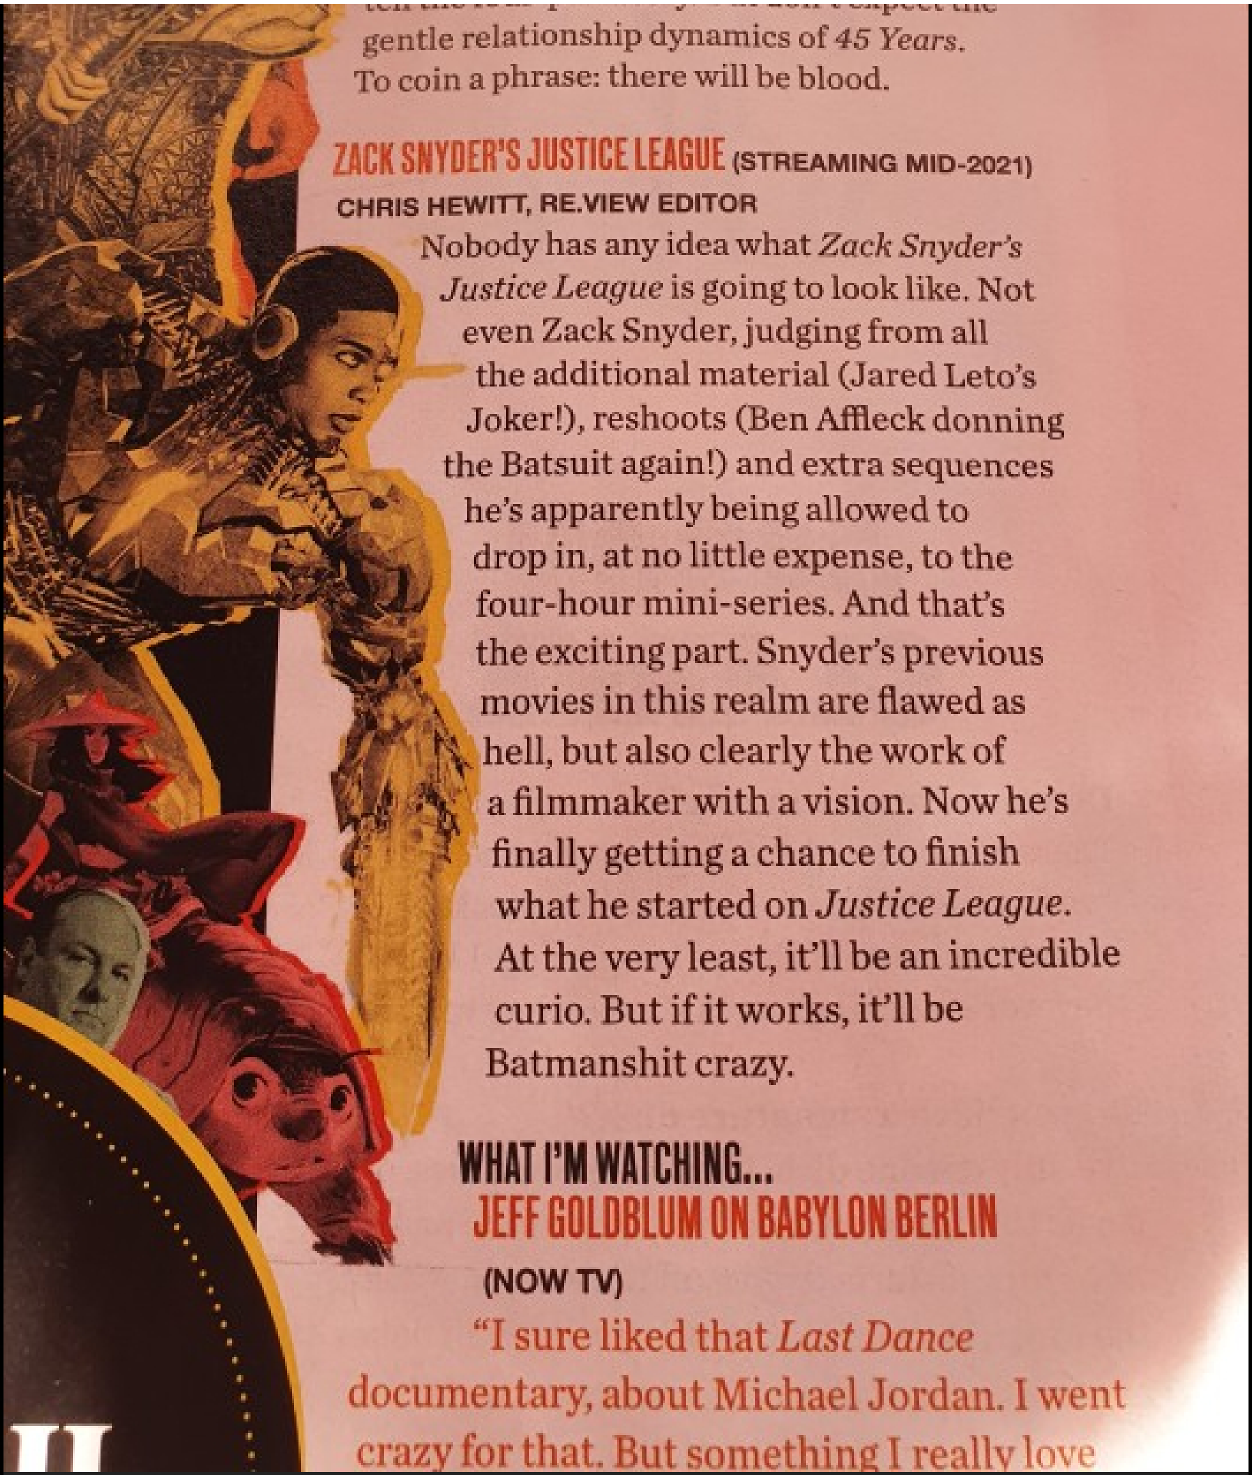
Tiny snippet about Zach Snyders Justice League in this months Empire Magazine (Jan 2021)

acting big hitters (Colin Farrell, Stephen Graham, Tom Courtenay, Jack O'Connell) to tell the four-part story. But don't expect the



gentle relationship dynamics of *45 Years*. To coin a phrase: there will be blood.

ZACK SNYDER'S JUSTICE LEAGUE (STREAMING MID-2021)

CHRIS HEWITT, RE.VIEW EDITOR

Nobody has any idea what *Zack Snyder's Justice League* is going to look like. Not even Zack Snyder, judging from all the additional material (Jared Leto's Joker!), reshoots (Ben Affleck donning the Batsuit again!) and extra sequences he's apparently being allowed to drop in, at no little expense, to the four-hour mini-series. And that's the exciting part. Snyder's previous movies in this realm are flawed as hell, but also clearly the work of a filmmaker with a vision. Now he's finally getting a chance to finish what he started on *Justice League*. At the very least, it'll be an incredible curio. But if it works, it'll be Batmanshit crazy.

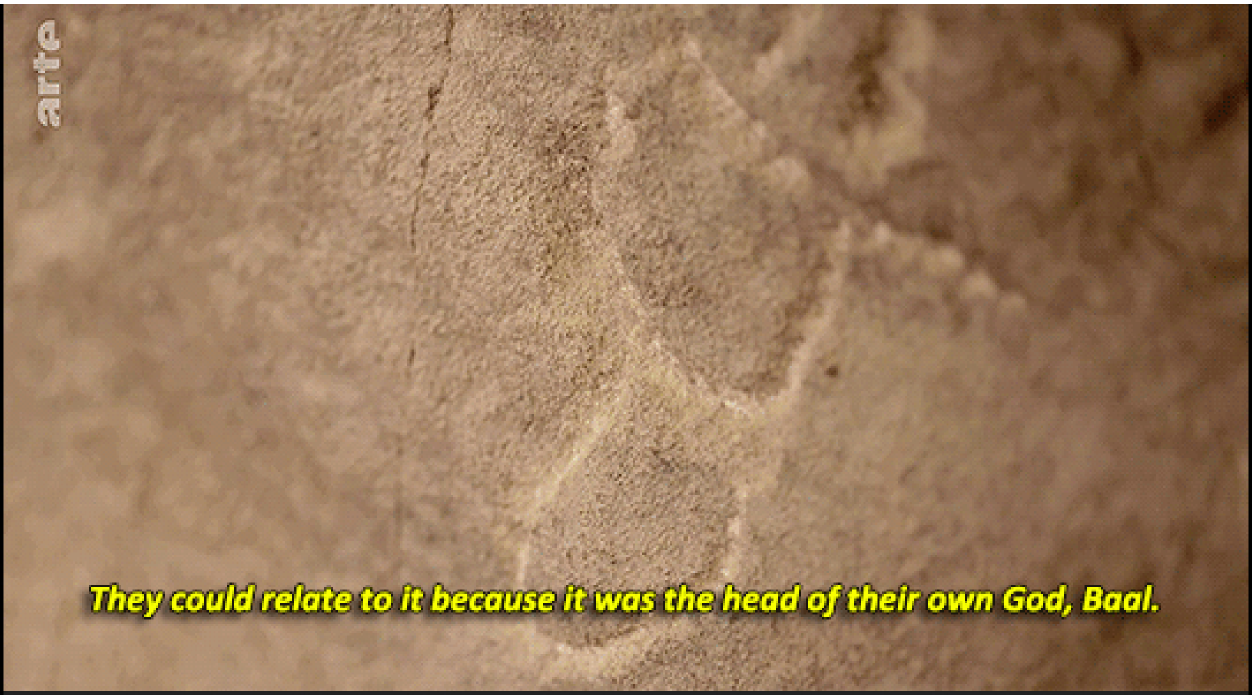
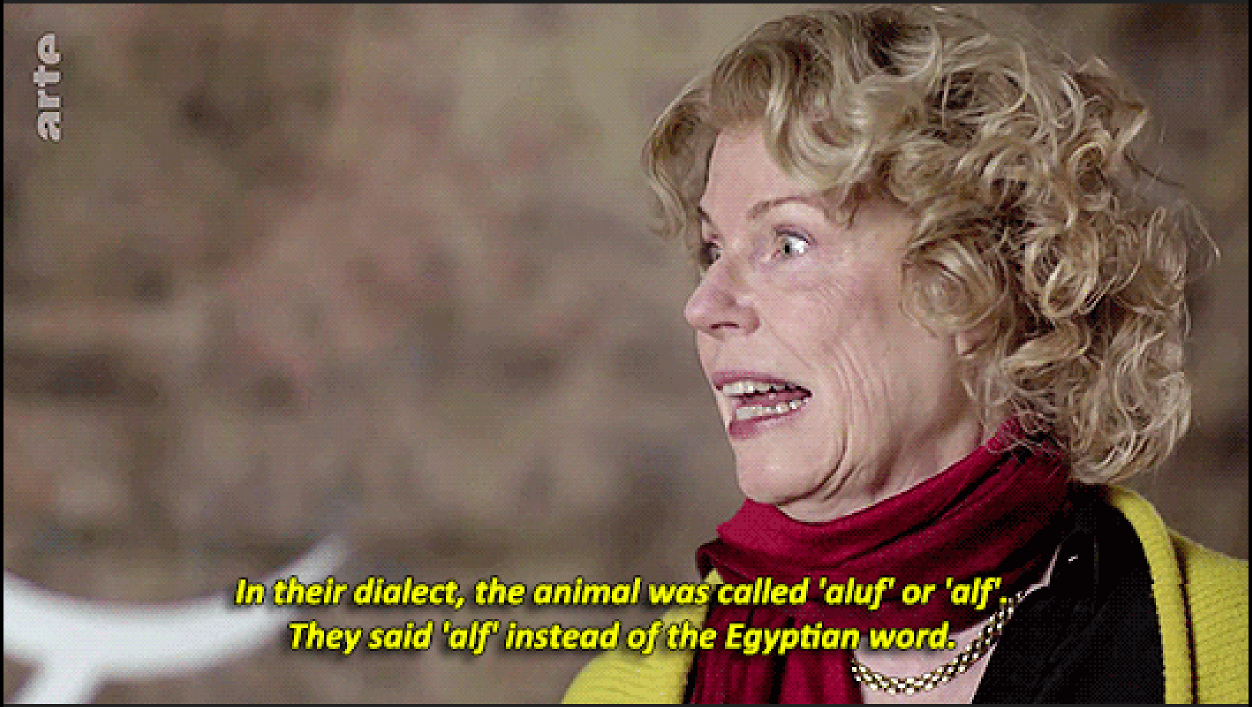
If you look at the orgin of the Latin Alphabet, all the letters are derived from the Egyptians hieroglyphs that the Cannaanite migrants chose to represent sounds of their own language.

They chose hieroglyphs that made sense to them.
For example, they saw the head of the bull.



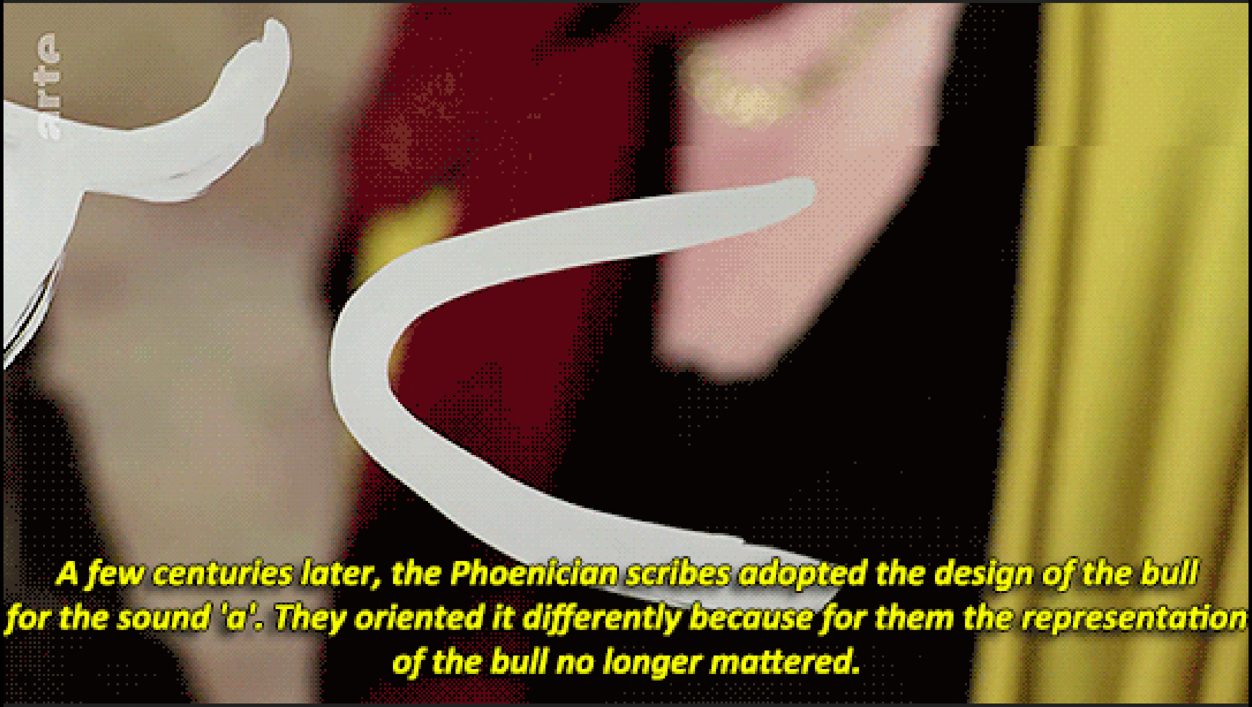
They could relate to it because it was the head of their own God, Baal.



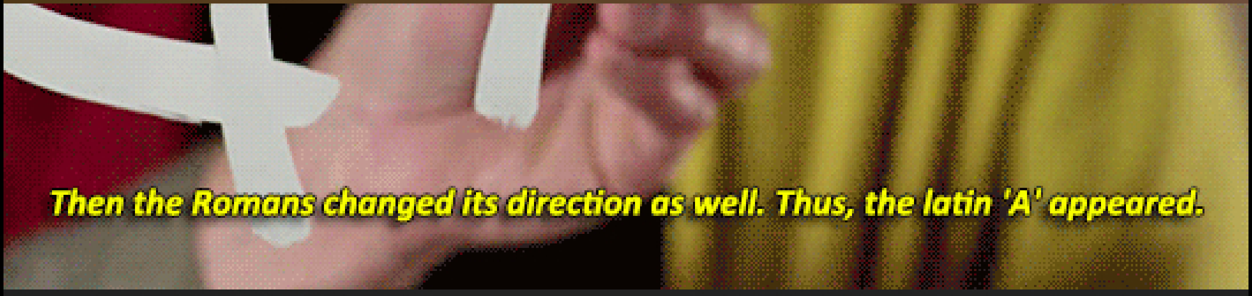
In their dialect, the animal was called 'aluf' or 'alf'.
They said 'alf' instead of the Egyptian word.

So they decided that, this bull symbol, would represent the 'a' sound.

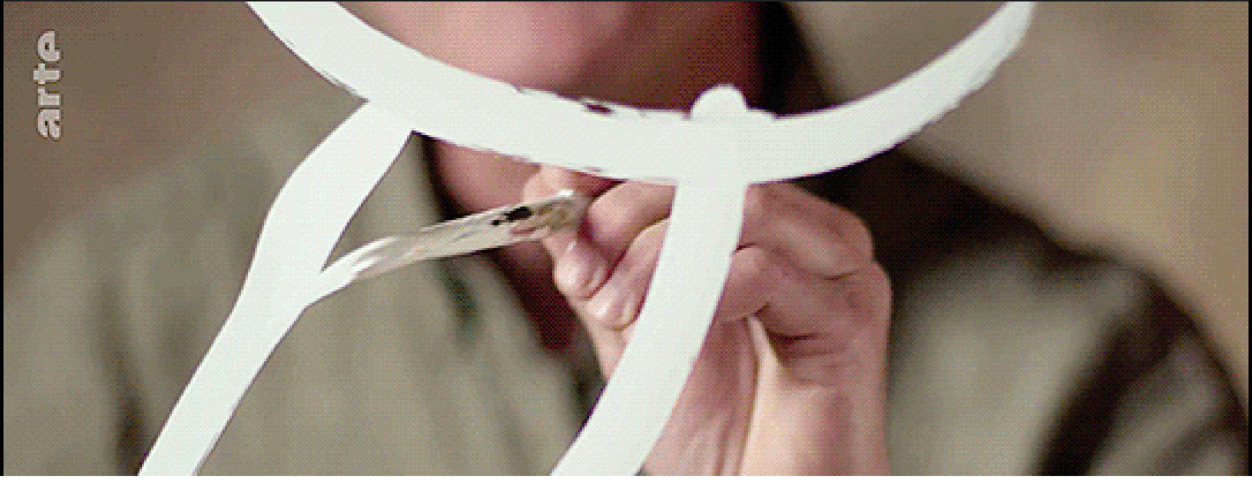
With time, they simplified it in two brush strokes.

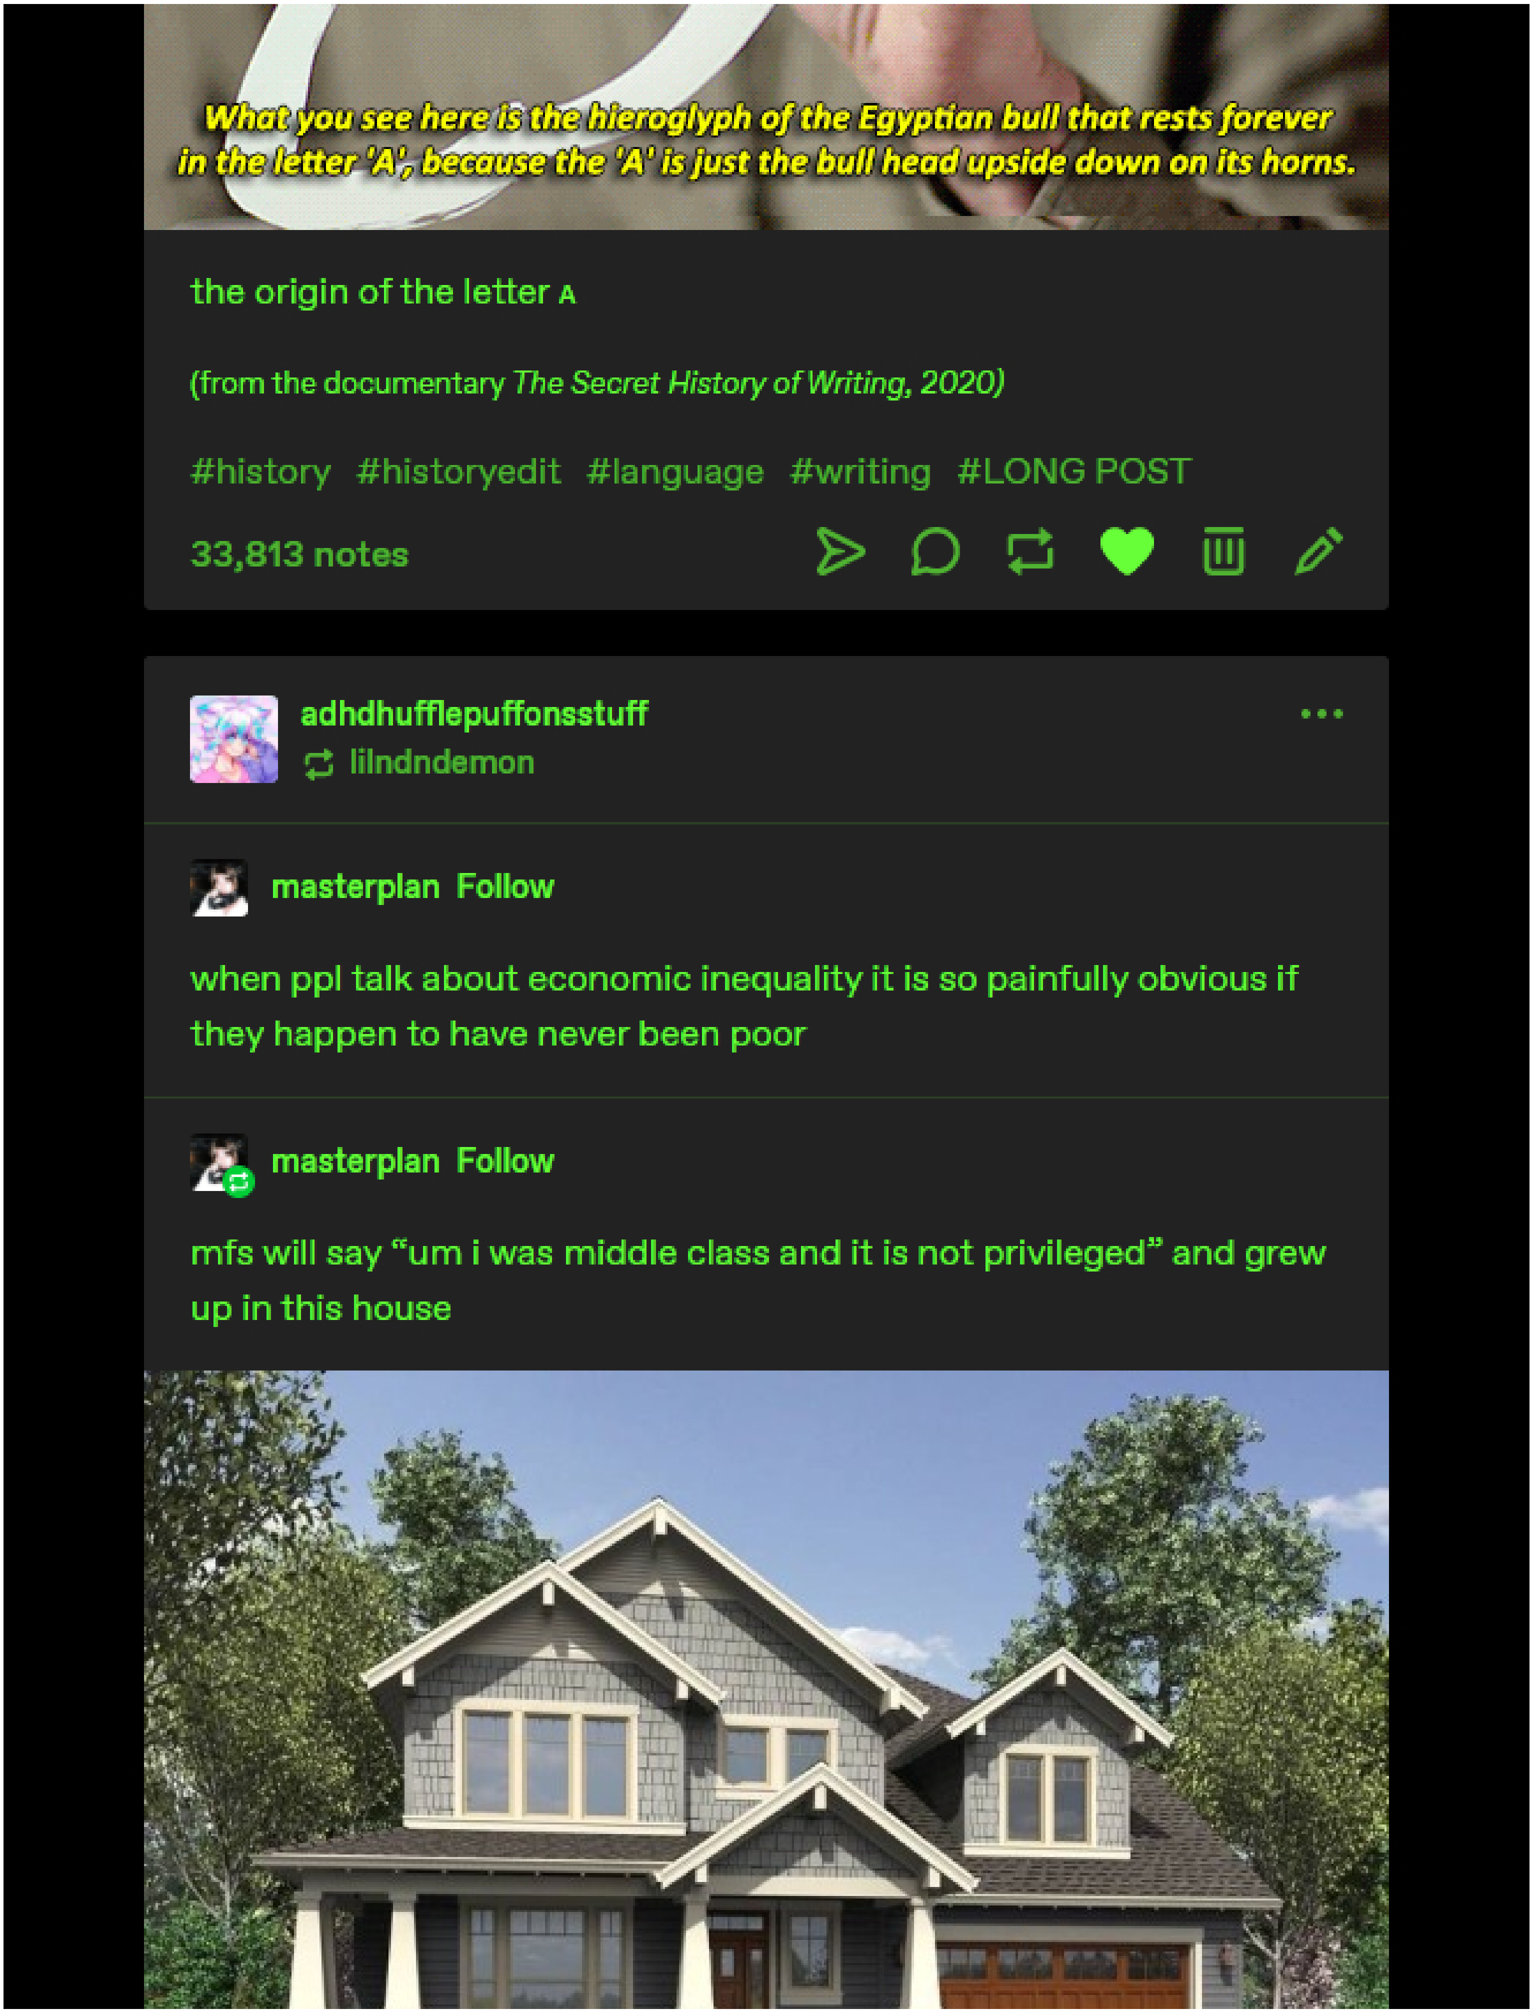


A few centuries later, the Phoenician scribes adopted the design of the bull for the sound 'a'. They oriented it differently because for them the representation of the bull no longer mattered.



Then the Romans changed its direction as well. Thus, the latin 'A' appeared.





What you see here is the hieroglyph of the Egyptian bull that rests forever in the letter 'A', because the 'A' is just the bull head upside down on its horns.

the origin of the letter A

Yall know that “toxic masculinity” refers to expressions of masculinity that are toxic, right? it doesn’t imply that all masculinity is toxic- it’s used to talk about like, how people will repress their emotions aside from anger in order to seem “manly”, and how they might act in violent or self-destructive ways because that is what society expects of men.

masculinity is not inherently toxic. it hasn’t been poisoned or corrupted. it is a neutral concept, a kind of gender presentation, and it doesn’t make you a bad, unhealthy, or toxic person to be masculine.

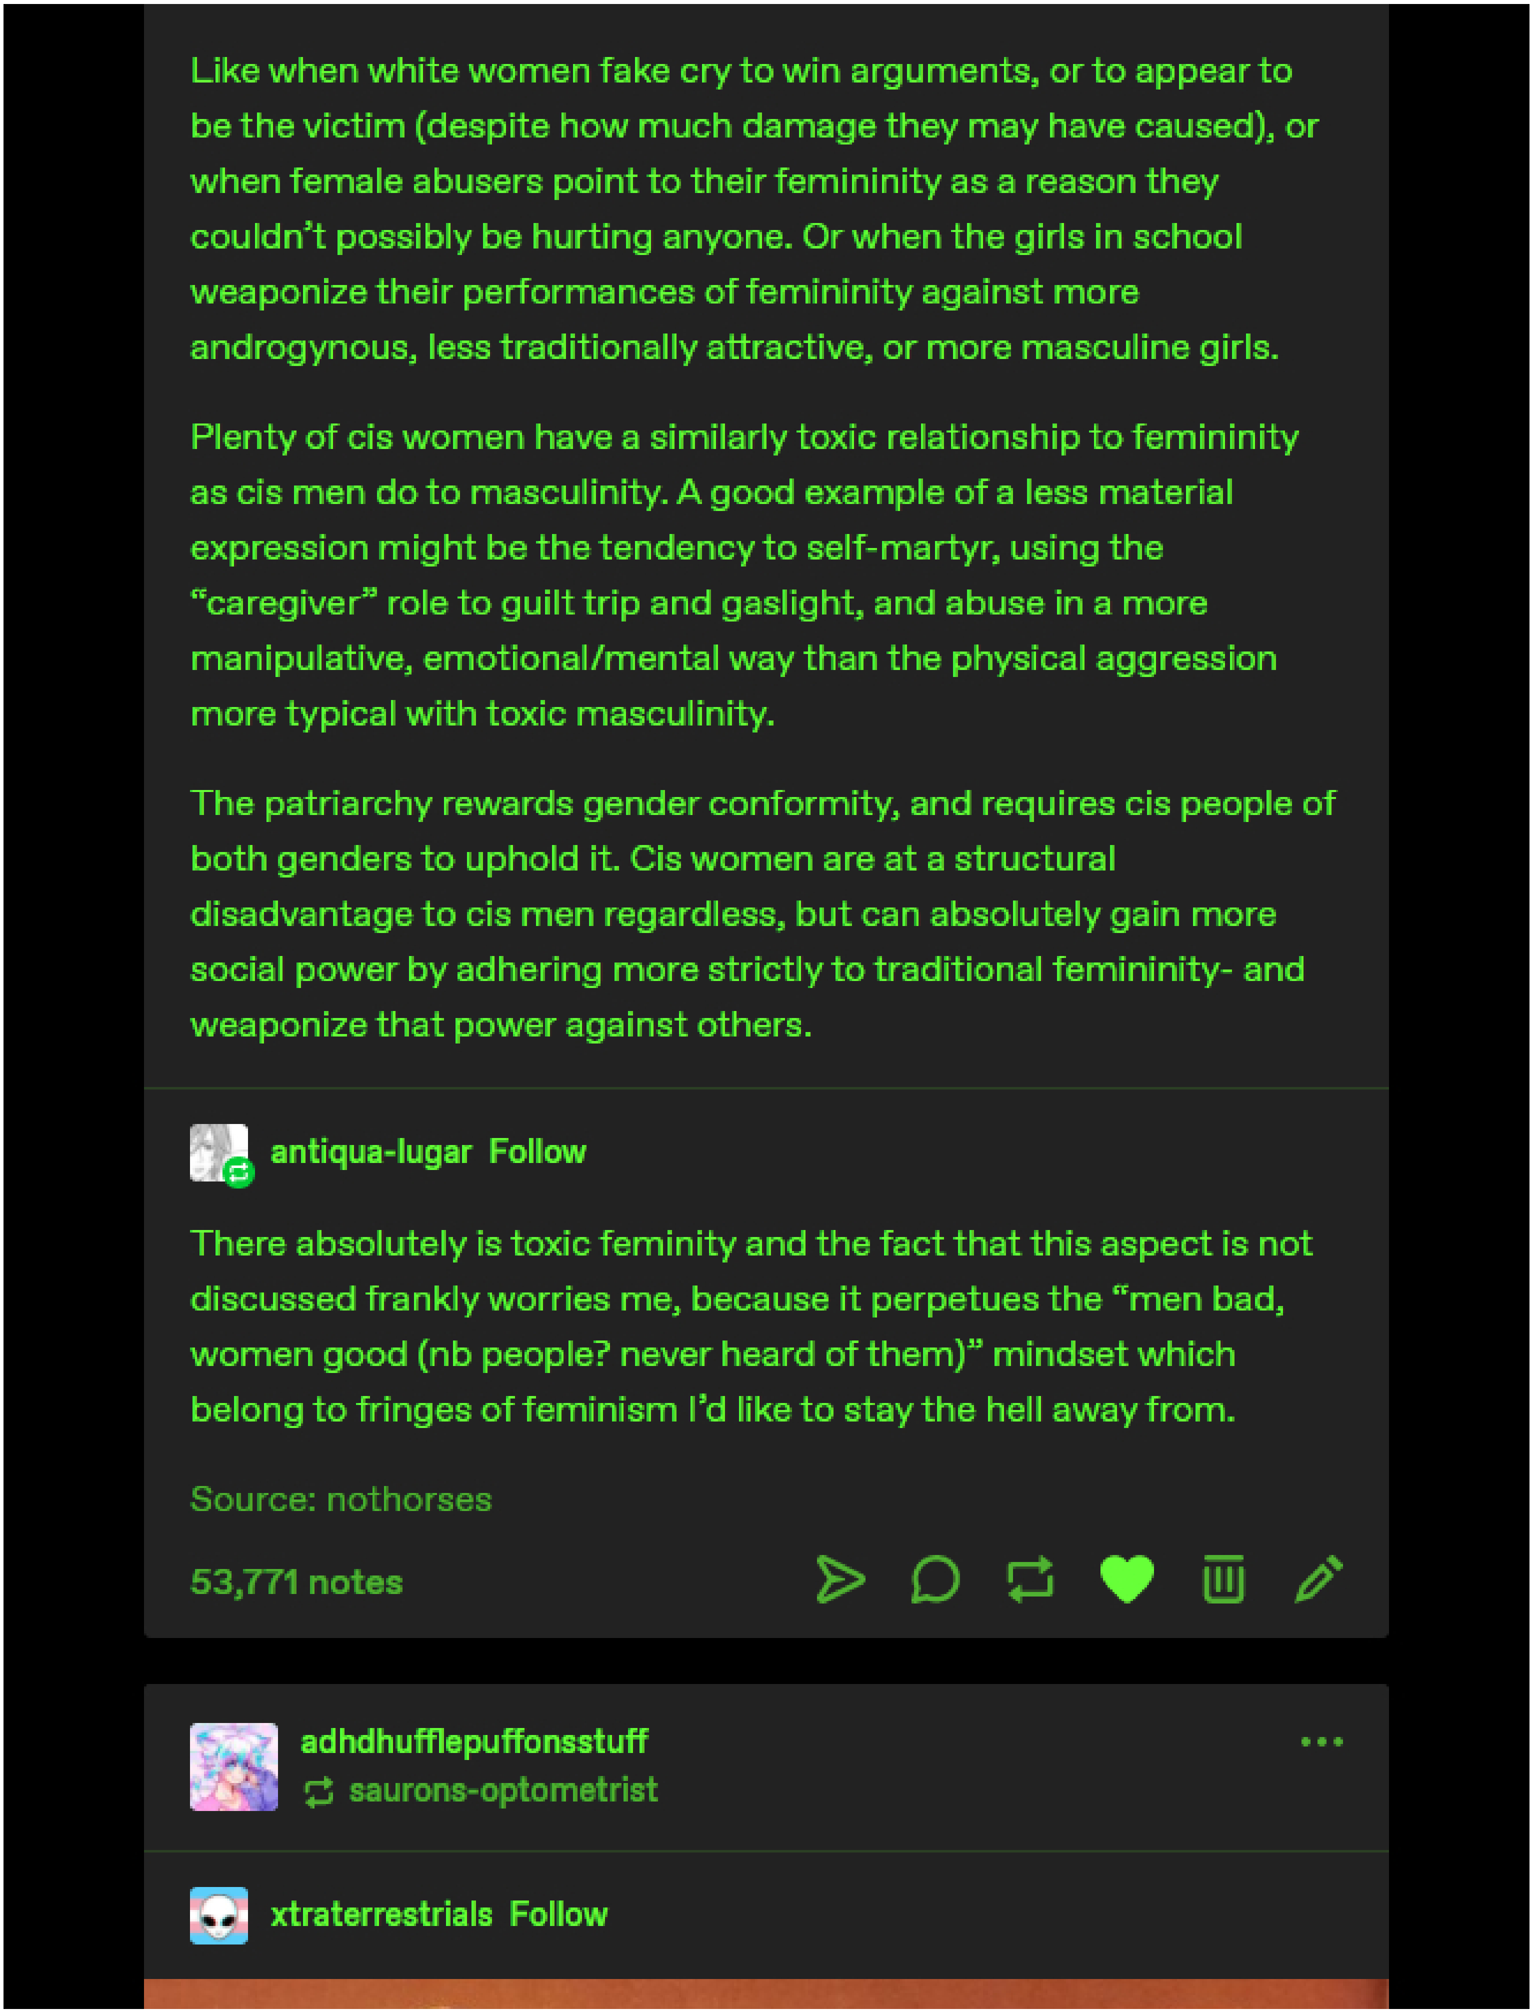
masculinity does not need to be “soft” to be acceptable, it can just be neutral. because it is not toxic, just sometimes expressed in toxic ways or for toxic reasons.

ninjakittenarmy Follow

Does this mean there is toxic femininity?

nothorses Follow

imo? Yes.



Like when white women fake cry to win arguments, or to appear to be the victim (despite how much damage they may have caused), or when female abusers point to their femininity as a reason they couldn't possibly be hurting anyone. Or when the girls in school weaponize their performances of femininity against more androgynous, less traditionally attractive, or more masculine girls.

Plenty of cis women have a similarly toxic relationship to femininity as cis men do to masculinity. A good example of a less material expression might be the tendency to self-martyr, using the "caregiver" role to guilt trip and gaslight, and abuse in a more manipulative, emotional/mental way than the physical aggression more typical with toxic masculinity.

The patriarchy rewards gender conformity, and requires cis people of both genders to uphold it. Cis women are at a structural disadvantage to cis men regardless, but can absolutely gain more social power by adhering more strictly to traditional femininity- and weaponize that power against others.

antiqua-lugar Follow

There absolutely is toxic feminity and the fact that this aspect is not discussed frankly worries me, because it perpetues the "men bad, women good (nb people? never heard of them)" mindset which belong to fringes of feminism I'd like to stay the hell away from.

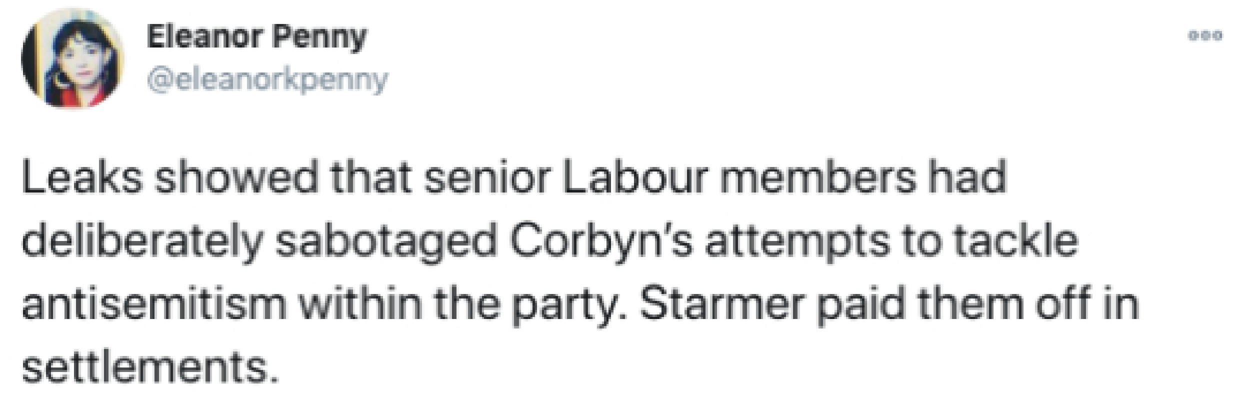
The sickening language used while discussing the then Labour leader, left-wing MPs and ordinary members of the party was revealed when the report on Labour's handling of anti-semitism in the party was leaked over the weekend.

Keir Starmer @Keir_Starmer · 46m

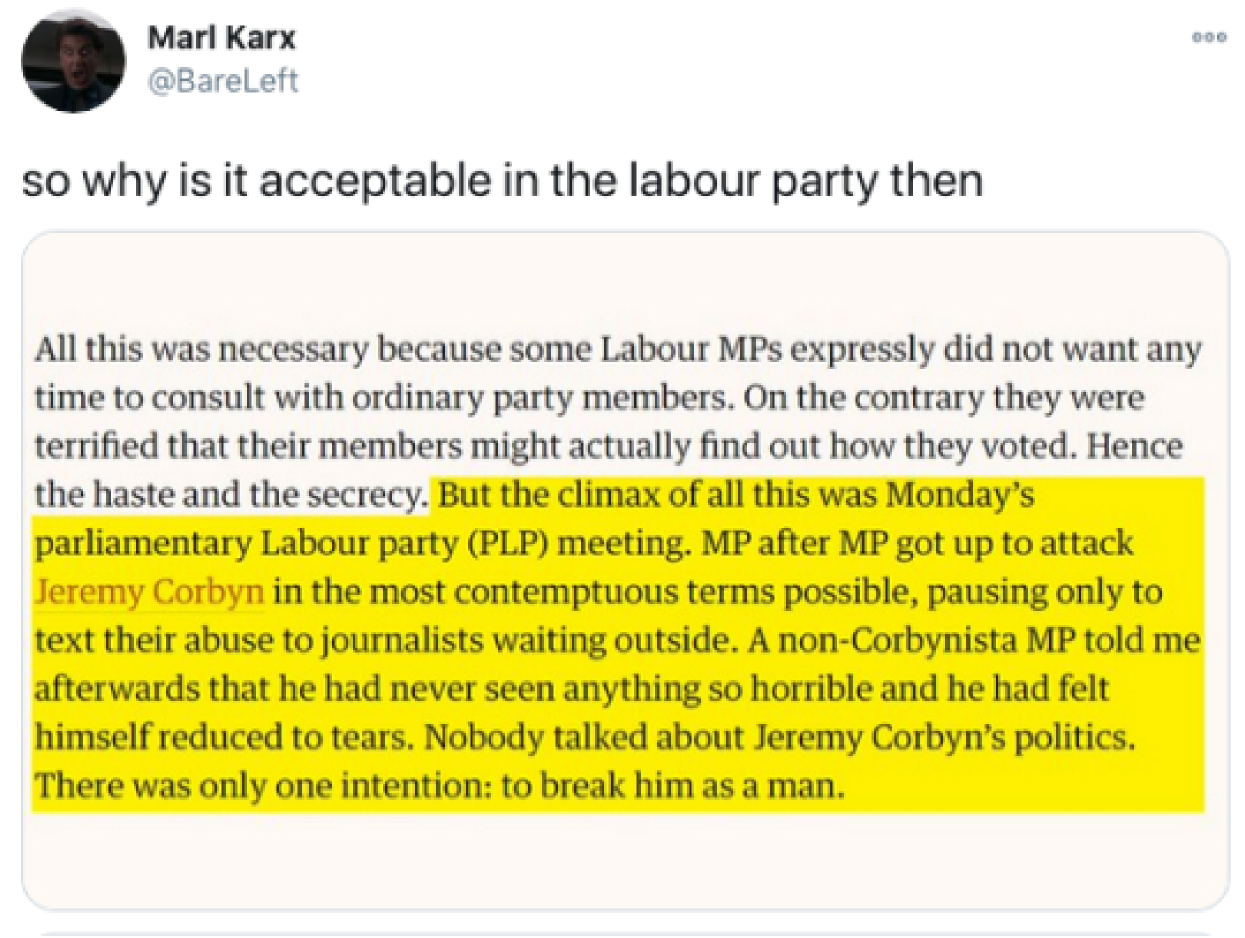
It is hard to imagine another workplace in the UK where this behaviour would be condoned by those at the top.

The Government should be setting an example. Instead, it is one rule for Boris Johnson and his friends, another for everyone else.



Eleanor Penny
@eleanorkpenny

Leaks showed that senior Labour members had deliberately sabotaged Corbyn's attempts to tackle antisemitism within the party. Starmer paid them off in settlements.



Marl Karx
@BareLeft

so why is it acceptable in the labour party then

All this was necessary because some Labour MPs expressly did not want any time to consult with ordinary party members. On the contrary they were terrified that their members might actually find out how they voted. Hence the haste and the secrecy. But the climax of all this was Monday's parliamentary Labour party (PLP) meeting. MP after MP got up to attack Jeremy Corbyn in the most contemptuous terms possible, pausing only to text their abuse to journalists waiting outside. A non-Corbynista MP told me afterwards that he had never seen anything so horrible and he had felt himself reduced to tears. Nobody talked about Jeremy Corbyn's politics. There was only one intention: to break him as a man.

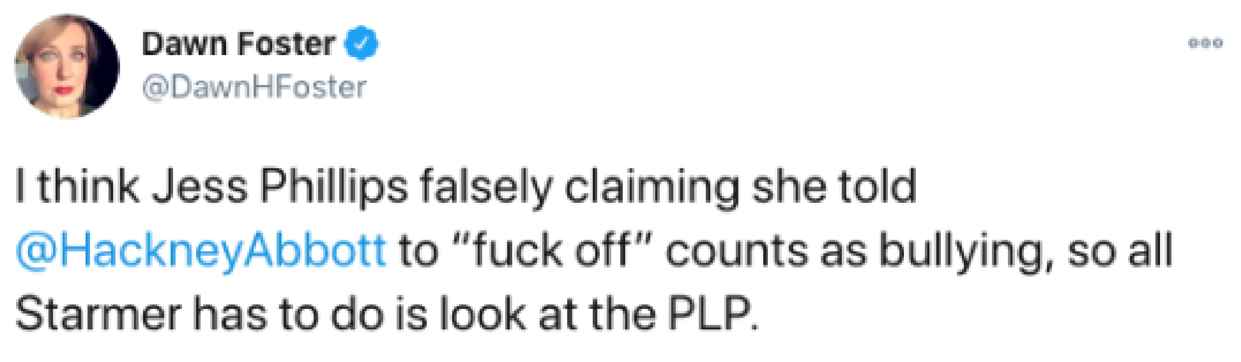
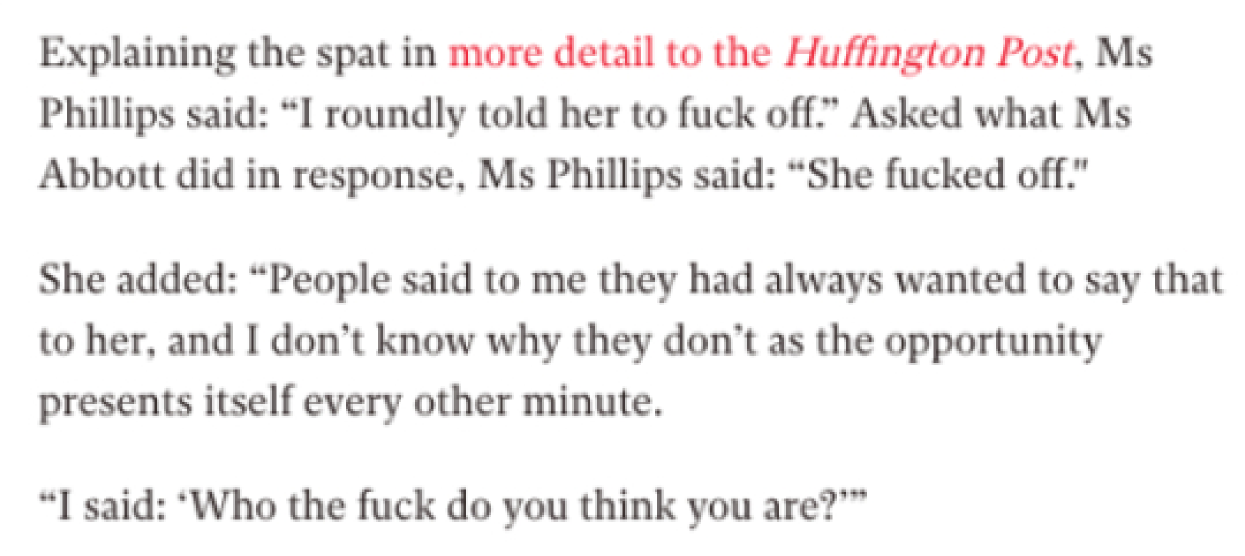
Is @BorisJohnson condoning and enabling bullying in the workplace? In any other workplace this would not be acceptable, and rightly so. twitter.com/bbclaurak/stat...



Dawn Foster
@DawnHFoster

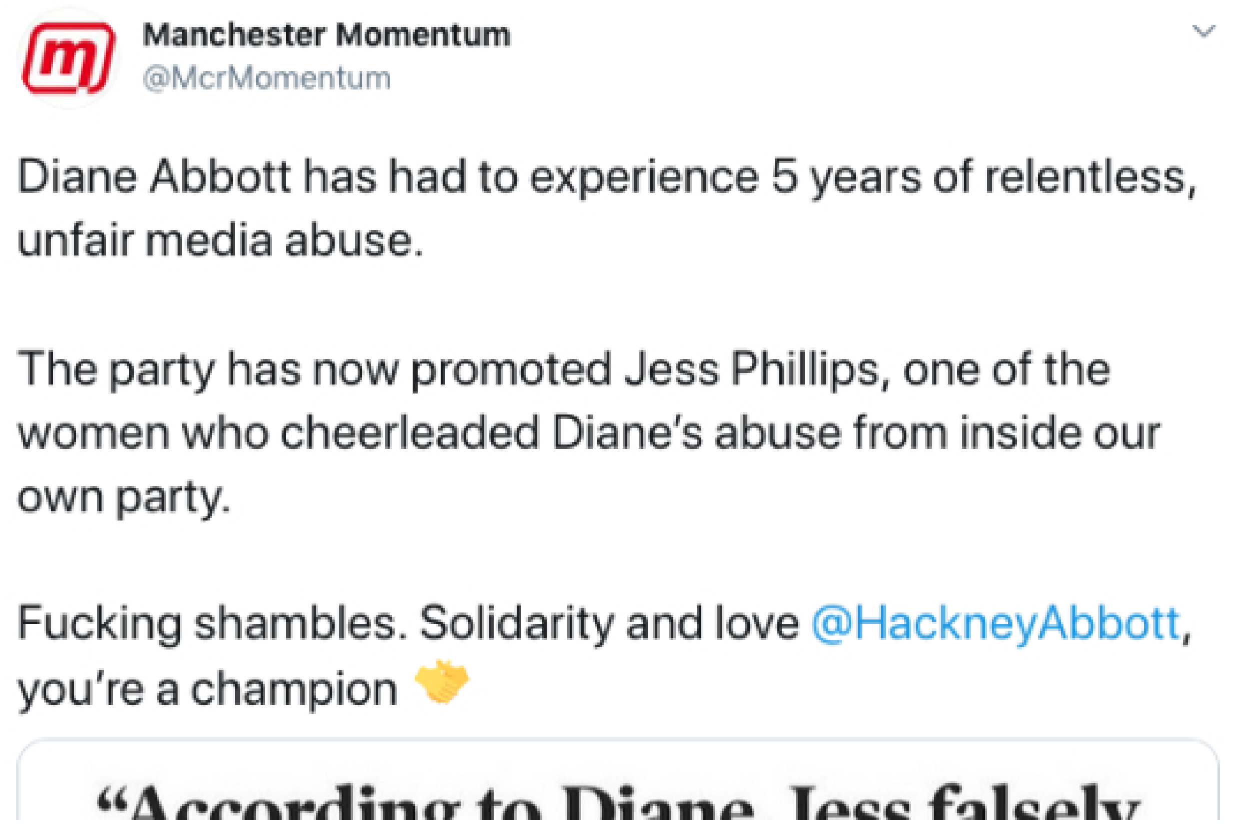
I think Jess Phillips falsely claiming she told @HackneyAbbott to "fuck off" counts as bullying, so all Starmer has to do is look at the PLP.



Explaining the spat in more detail to the *Huffington Post*, Ms Phillips said: "I roundly told her to fuck off." Asked what Ms Abbott did in response, Ms Phillips said: "She fucked off."

She added: "People said to me they had always wanted to say that to her, and I don't know why they don't as the opportunity presents itself every other minute.

"I said: 'Who the fuck do you think you are?'"



Manchester Momentum
@McrMomentum

Diane Abbott has had to experience 5 years of relentless, unfair media abuse.

The party has now promoted Jess Phillips, one of the women who cheerleaded Diane's abuse from inside our own party.

I was deathly afraid of being rejected and the pain of RSD so I preemptively rejected myself for them.

I was never unwanted.. I just didn't open myself up so people didn't want to be rude and pry.

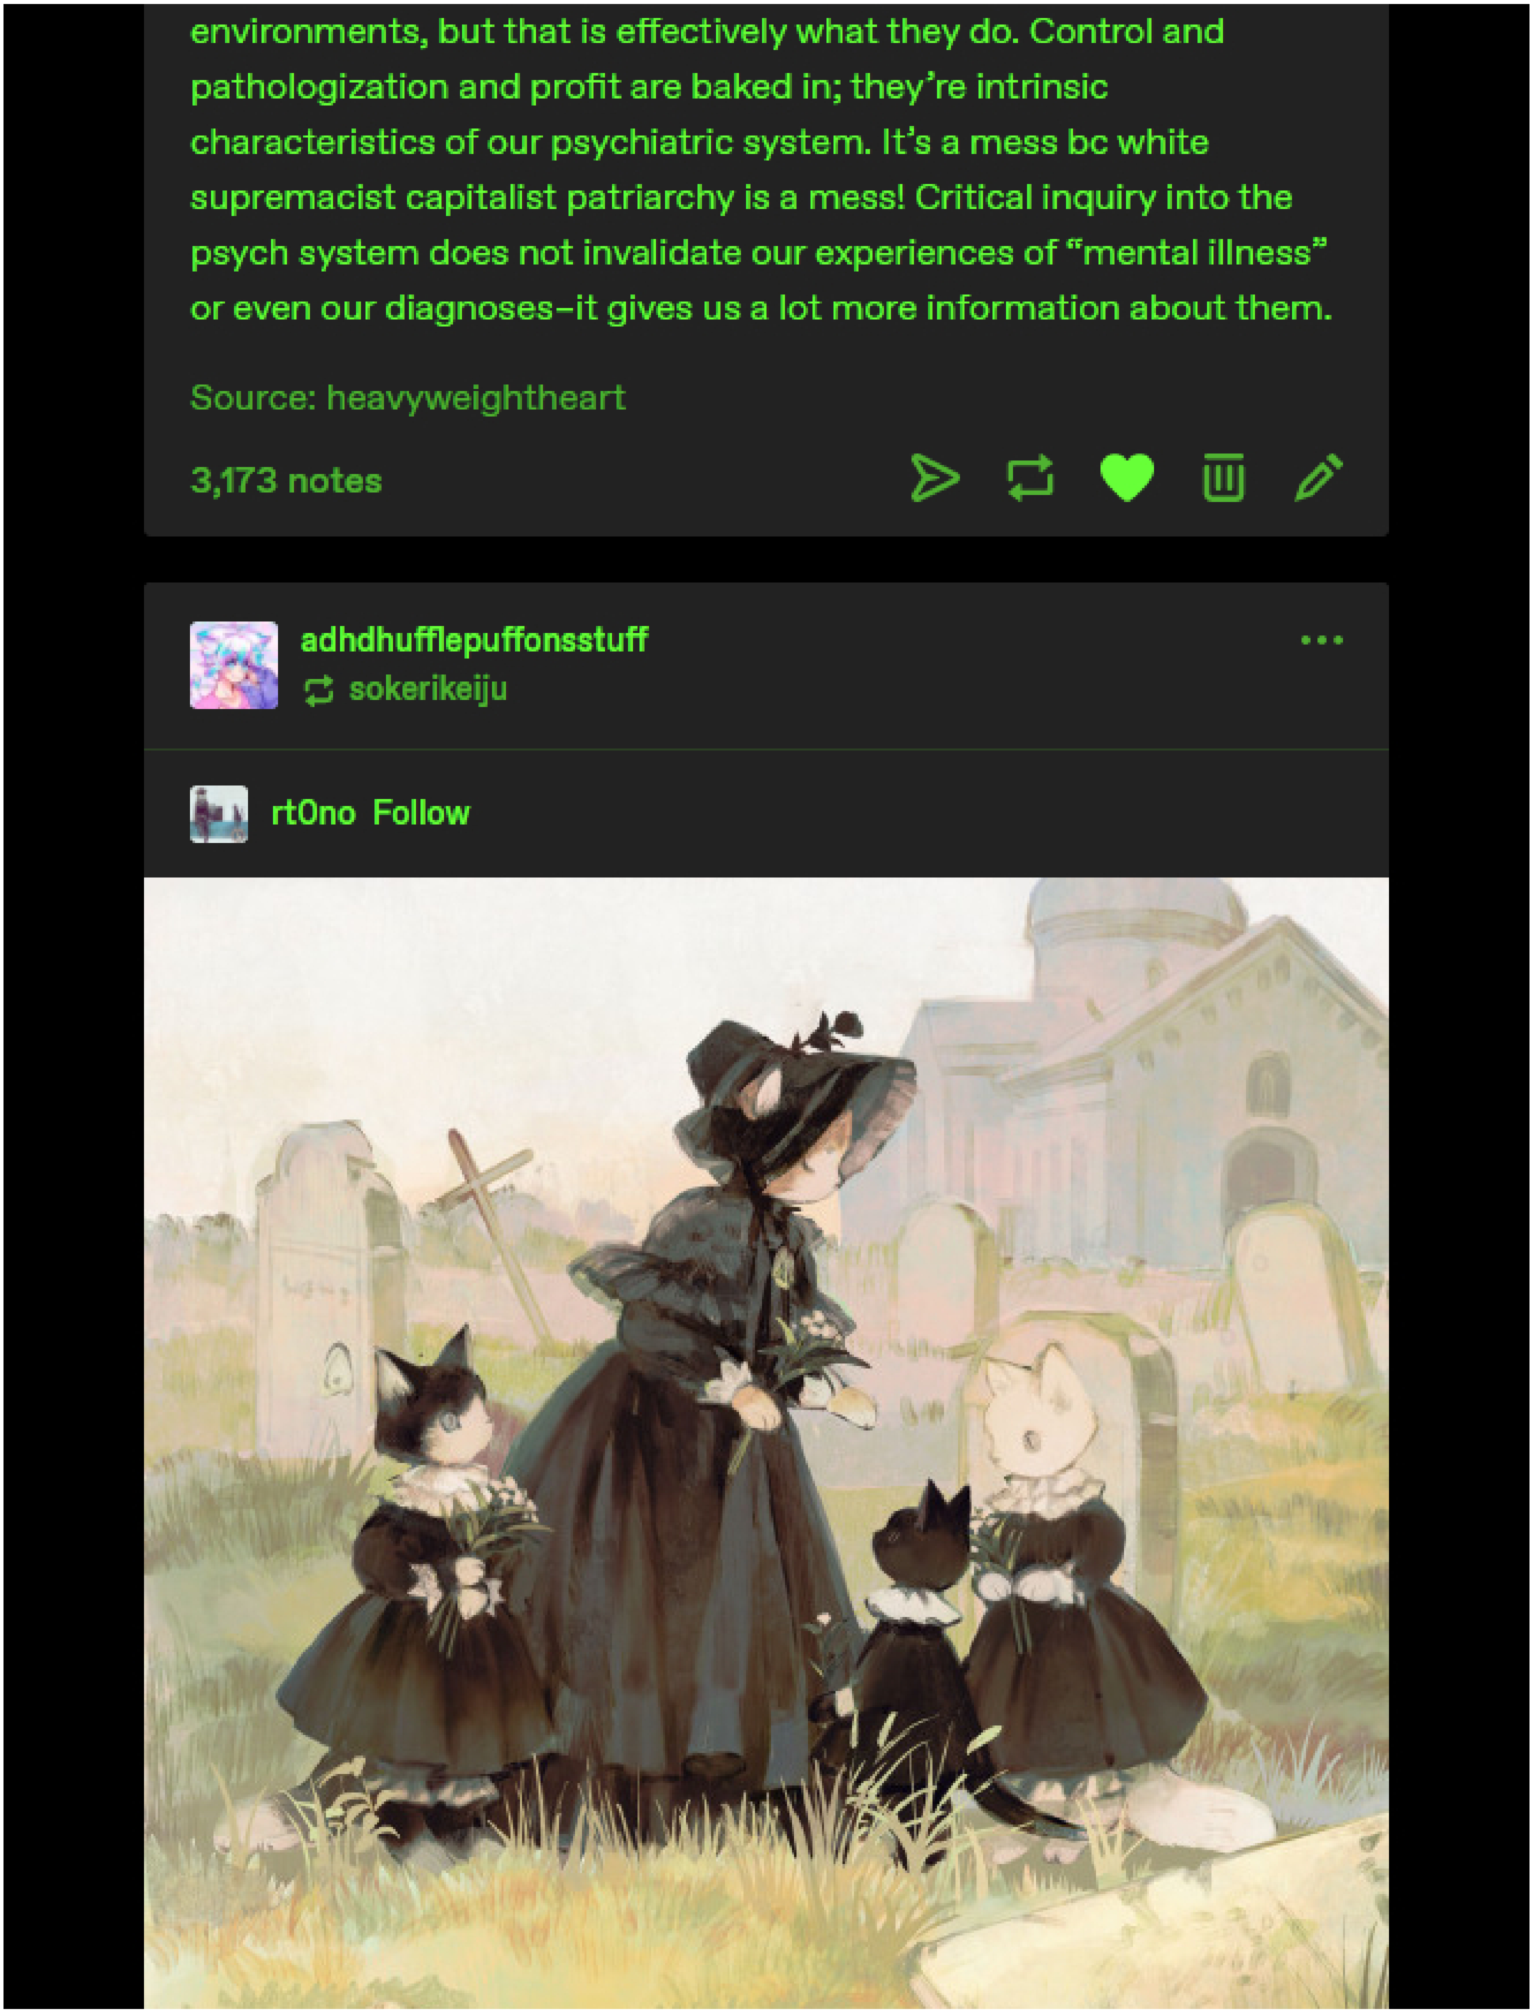
Thinking that psychiatric diagnoses are objectively existent disease states so perfectly cataloged by the DSM and identified by psych professionals that self dx is some kind of amateurish transgression is… 😬. Clinical diagnosis is also subjective, and highly political, and culturally embedded. Don't do the mentally ills like this; educate yourself, not just in psychiatry but on it.

heavyweightheart Follow

The DSM mainly exists for private insurance system purposes and was first written during one of the US' most reactionary decades; it also supports a dubious research industry that dovetails w other industrial complexes (like pharmaceutical and military). The APA and the committees who write the DSM–we've now had 5 iterations–aren't comprised *entirely* of evil people who want to pathologize human diversity and natural human responses to our adverse



environments, but that is effectively what they do. Control and pathologization and profit are baked in; they're intrinsic characteristics of our psychiatric system. It's a mess bc white supremacist capitalist patriarchy is a mess! Critical inquiry into the psych system does not invalidate our experiences of "mental illness" or even our diagnoses–it gives us a lot more information about them.

One of my favorite parts of the Hunger Games was how, in the beginning, Katniss was jealous amd resentful of the townies for not having to work in the coal mines. Then, over time, she realizes they aren't the true enemy. Then she sees the other district kids as so much better off than she is, because at least they don't come from district 12. But then she realizes they aren't the enemy either. And then she hates the other victors, before realizing they have all been exploited just as much as she has. So the enemy must be the Capitol citizens, who benefit from the exploitation of the districts, right? Wrong again. They are just uninformed and pampered people who have been kept in the dark about the true horrors faced by the rest of the country. Most of them, when push comes to shove, are perfectly willing to help the war efforts.

And slowly, over the three books, all theses separate factions of downtrodden people start to see each other as allies instead of enemies, and that is what propells them to eventual victory over the true enemy, the government that tried to pit them against each other. Just fun, totally fictional things to think about that have nothing whatsoever to do with our current life.

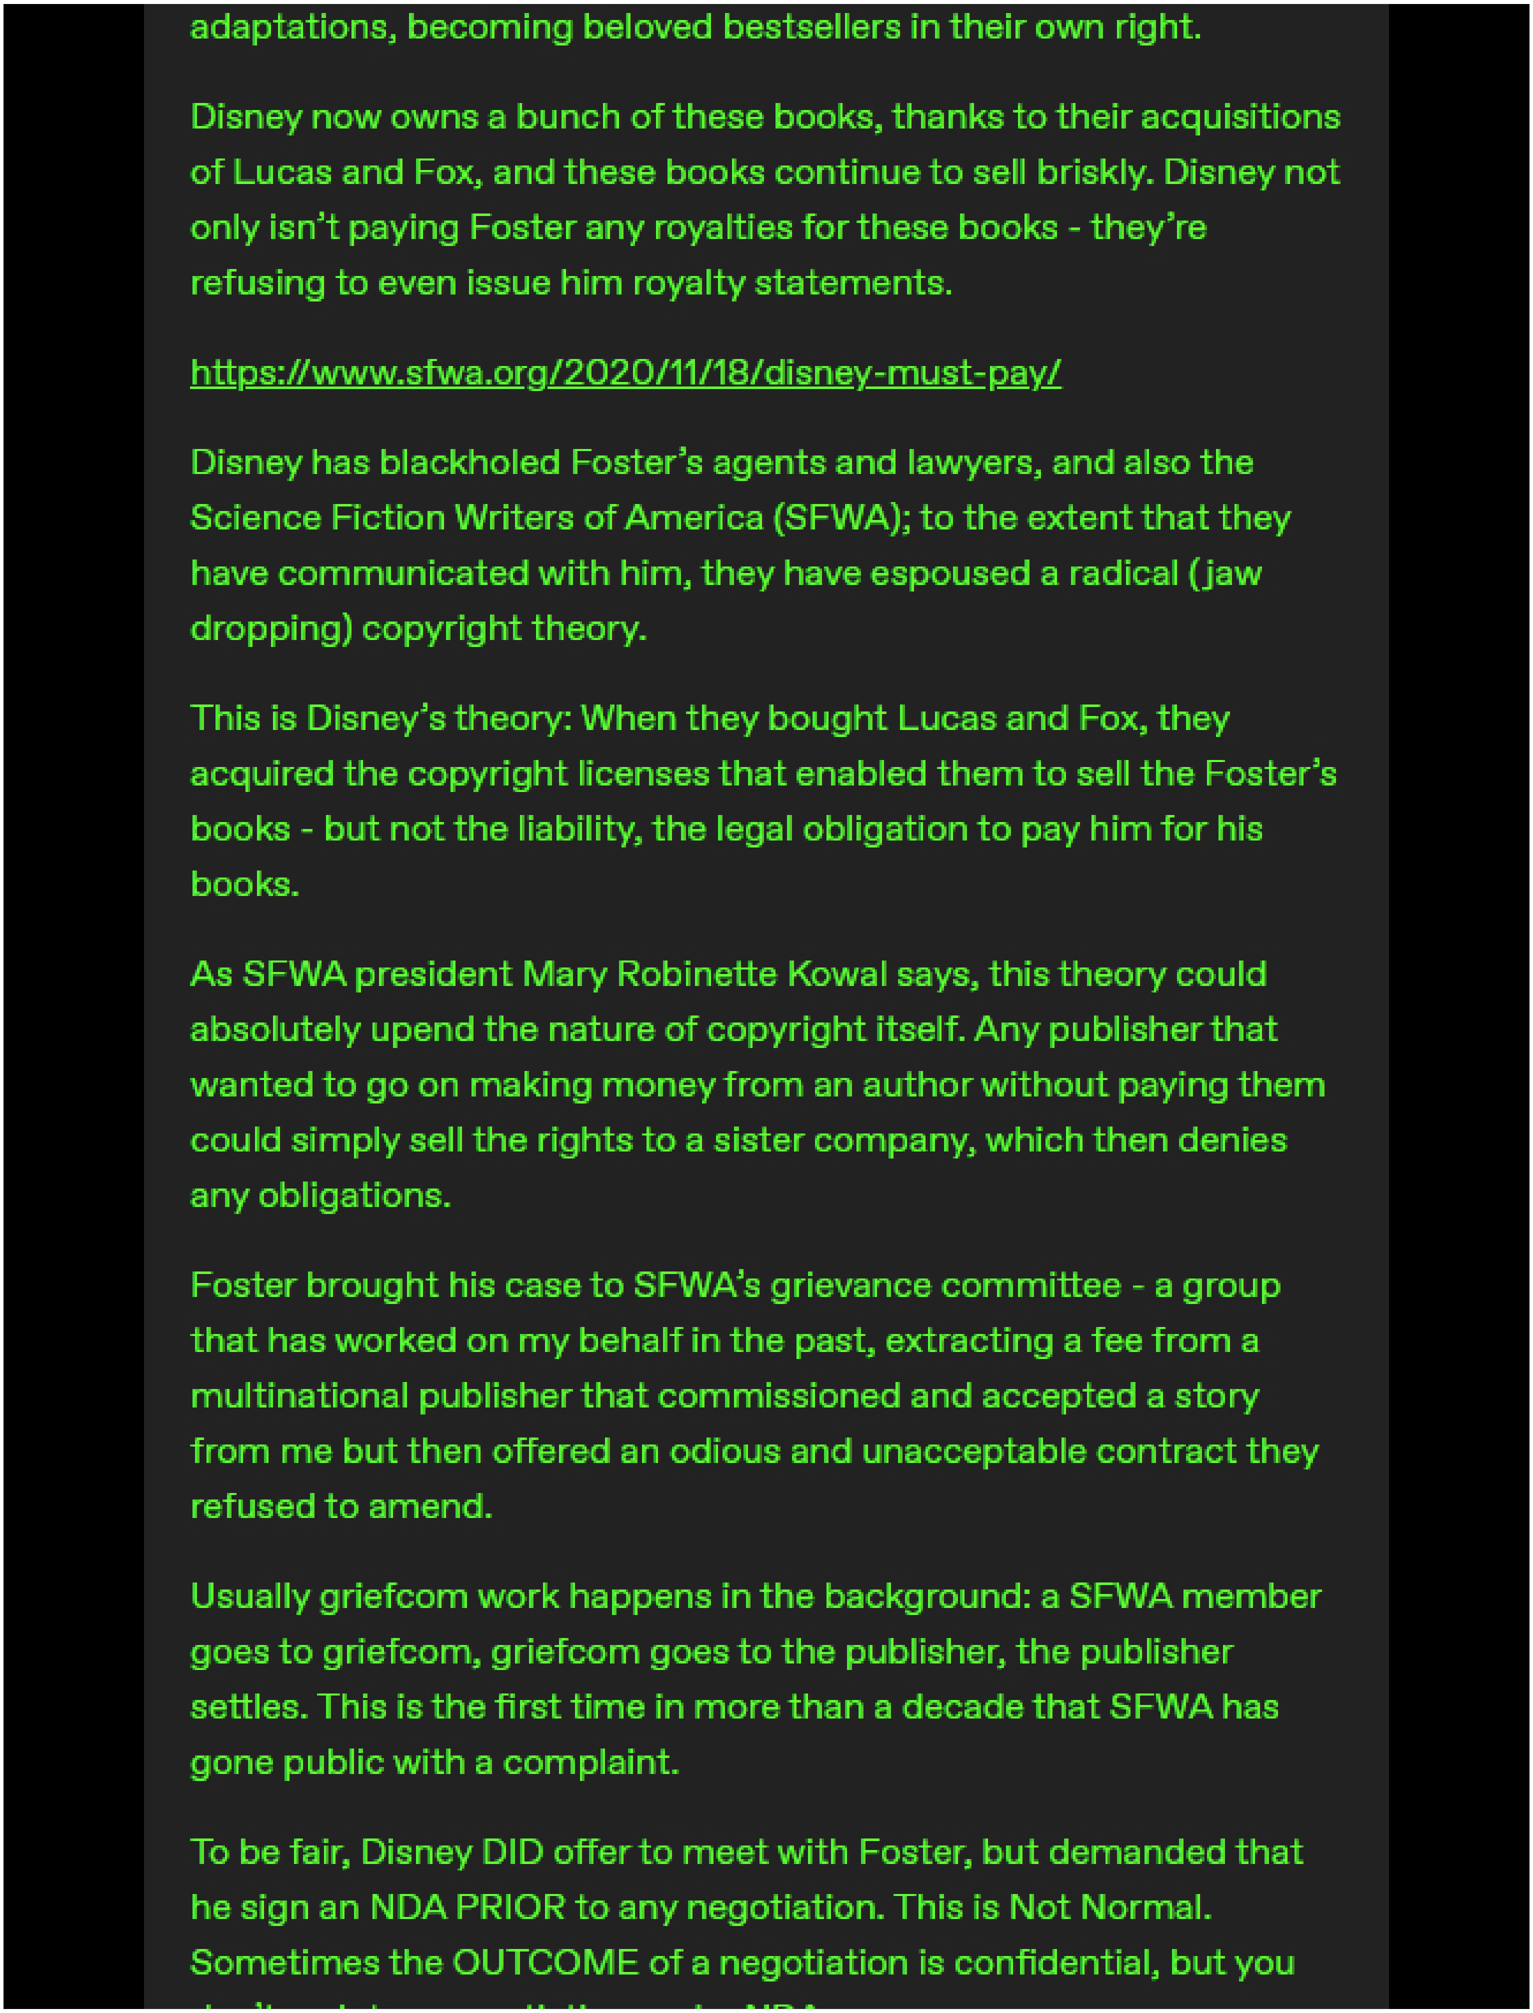
Disney stiffs writer

Alan Dean Foster is an sf legend - a writer who produced a shelf of original novels but also made a reputation novelizing movies and TV from Star Wars to Aliens, turning out books that transcended quickie



adaptations, becoming beloved bestsellers in their own right.

Disney now owns a bunch of these books, thanks to their acquisitions of Lucas and Fox, and these books continue to sell briskly. Disney not only isn't paying Foster any royalties for these books - they're refusing to even issue him royalty statements.

https://www.sfwa.org/2020/11/18/disney-must-pay/

Disney has blackholed Foster's agents and lawyers, and also the Science Fiction Writers of America (SFWA); to the extent that they have communicated with him, they have espoused a radical (jaw dropping) copyright theory.

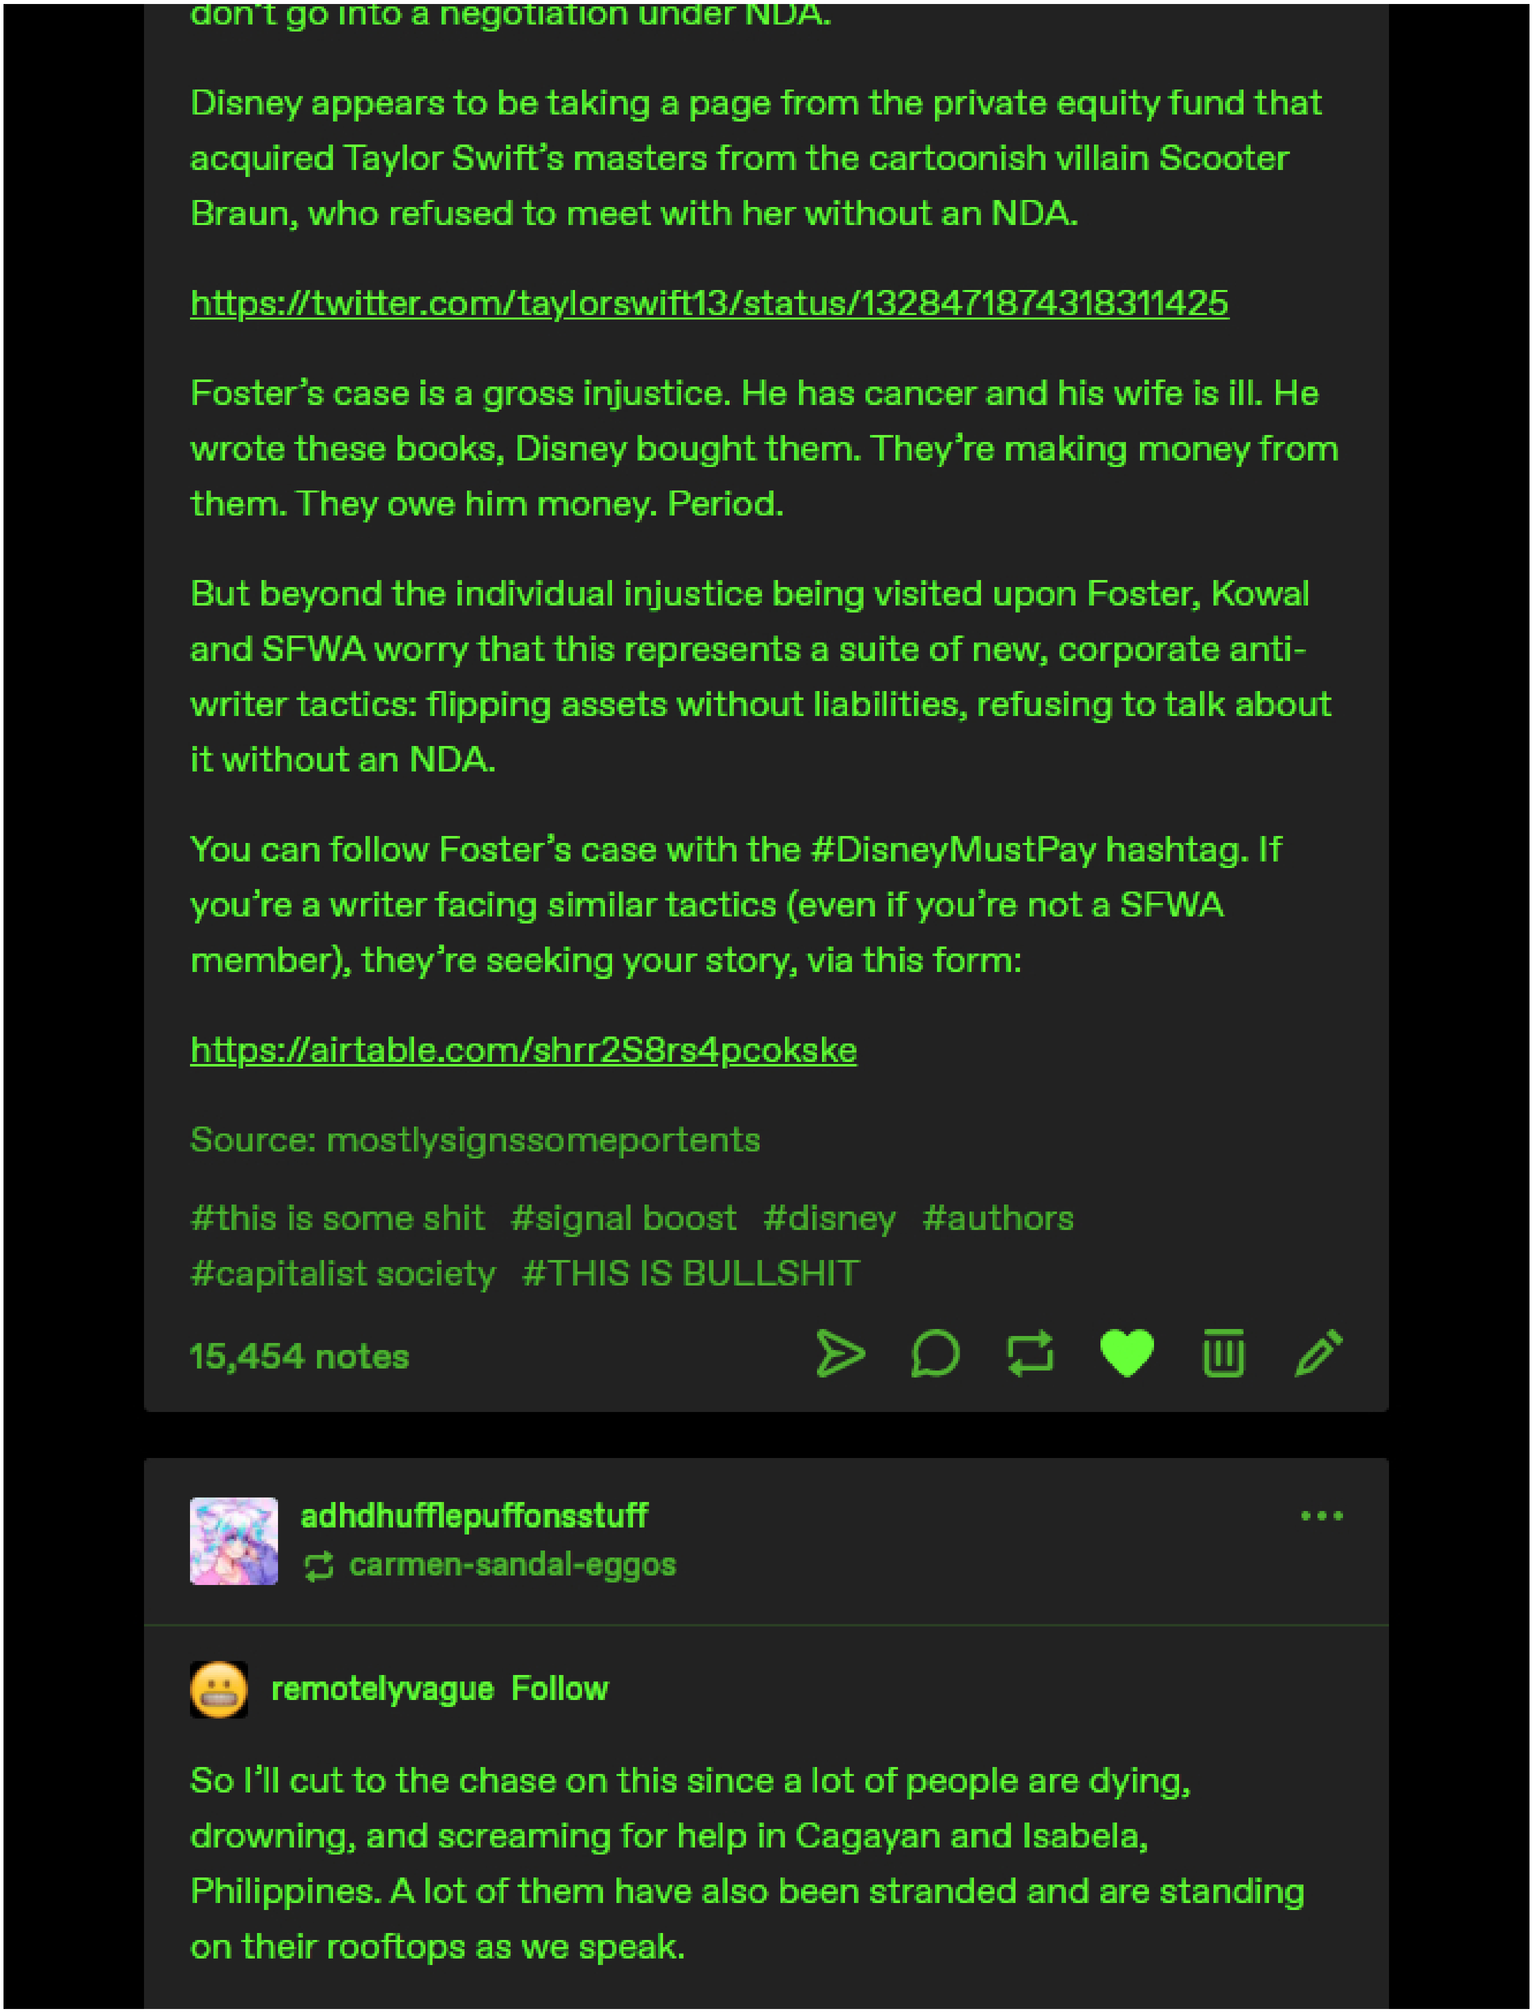
This is Disney's theory: When they bought Lucas and Fox, they acquired the copyright licenses that enabled them to sell the Foster's books - but not the liability, the legal obligation to pay him for his books.

As SFWA president Mary Robinette Kowal says, this theory could absolutely upend the nature of copyright itself. Any publisher that wanted to go on making money from an author without paying them could simply sell the rights to a sister company, which then denies any obligations.

Foster brought his case to SFWA's grievance committee - a group that has worked on my behalf in the past, extracting a fee from a multinational publisher that commissioned and accepted a story from me but then offered an odious and unacceptable contract they refused to amend.

Usually griefcom work happens in the background: a SFWA member goes to griefcom, griefcom goes to the publisher, the publisher settles. This is the first time in more than a decade that SFWA has gone public with a complaint.

To be fair, Disney DID offer to meet with Foster, but demanded that he sign an NDA PRIOR to any negotiation. This is Not Normal. Sometimes the OUTCOME of a negotiation is confidential, but you



don't go into a negotiation under NDA.

Disney appears to be taking a page from the private equity fund that acquired Taylor Swift's masters from the cartoonish villain Scooter Braun, who refused to meet with her without an NDA.

https://twitter.com/taylorswift13/status/1328471874318311425

Foster's case is a gross injustice. He has cancer and his wife is ill. He wrote these books, Disney bought them. They're making money from them. They owe him money. Period.

But beyond the individual injustice being visited upon Foster, Kowal and SFWA worry that this represents a suite of new, corporate anti-writer tactics: flipping assets without liabilities, refusing to talk about it without an NDA.

You can follow Foster's case with the #DisneyMustPay hashtag. If you're a writer facing similar tactics (even if you're not a SFWA member), they're seeking your story, via this form:

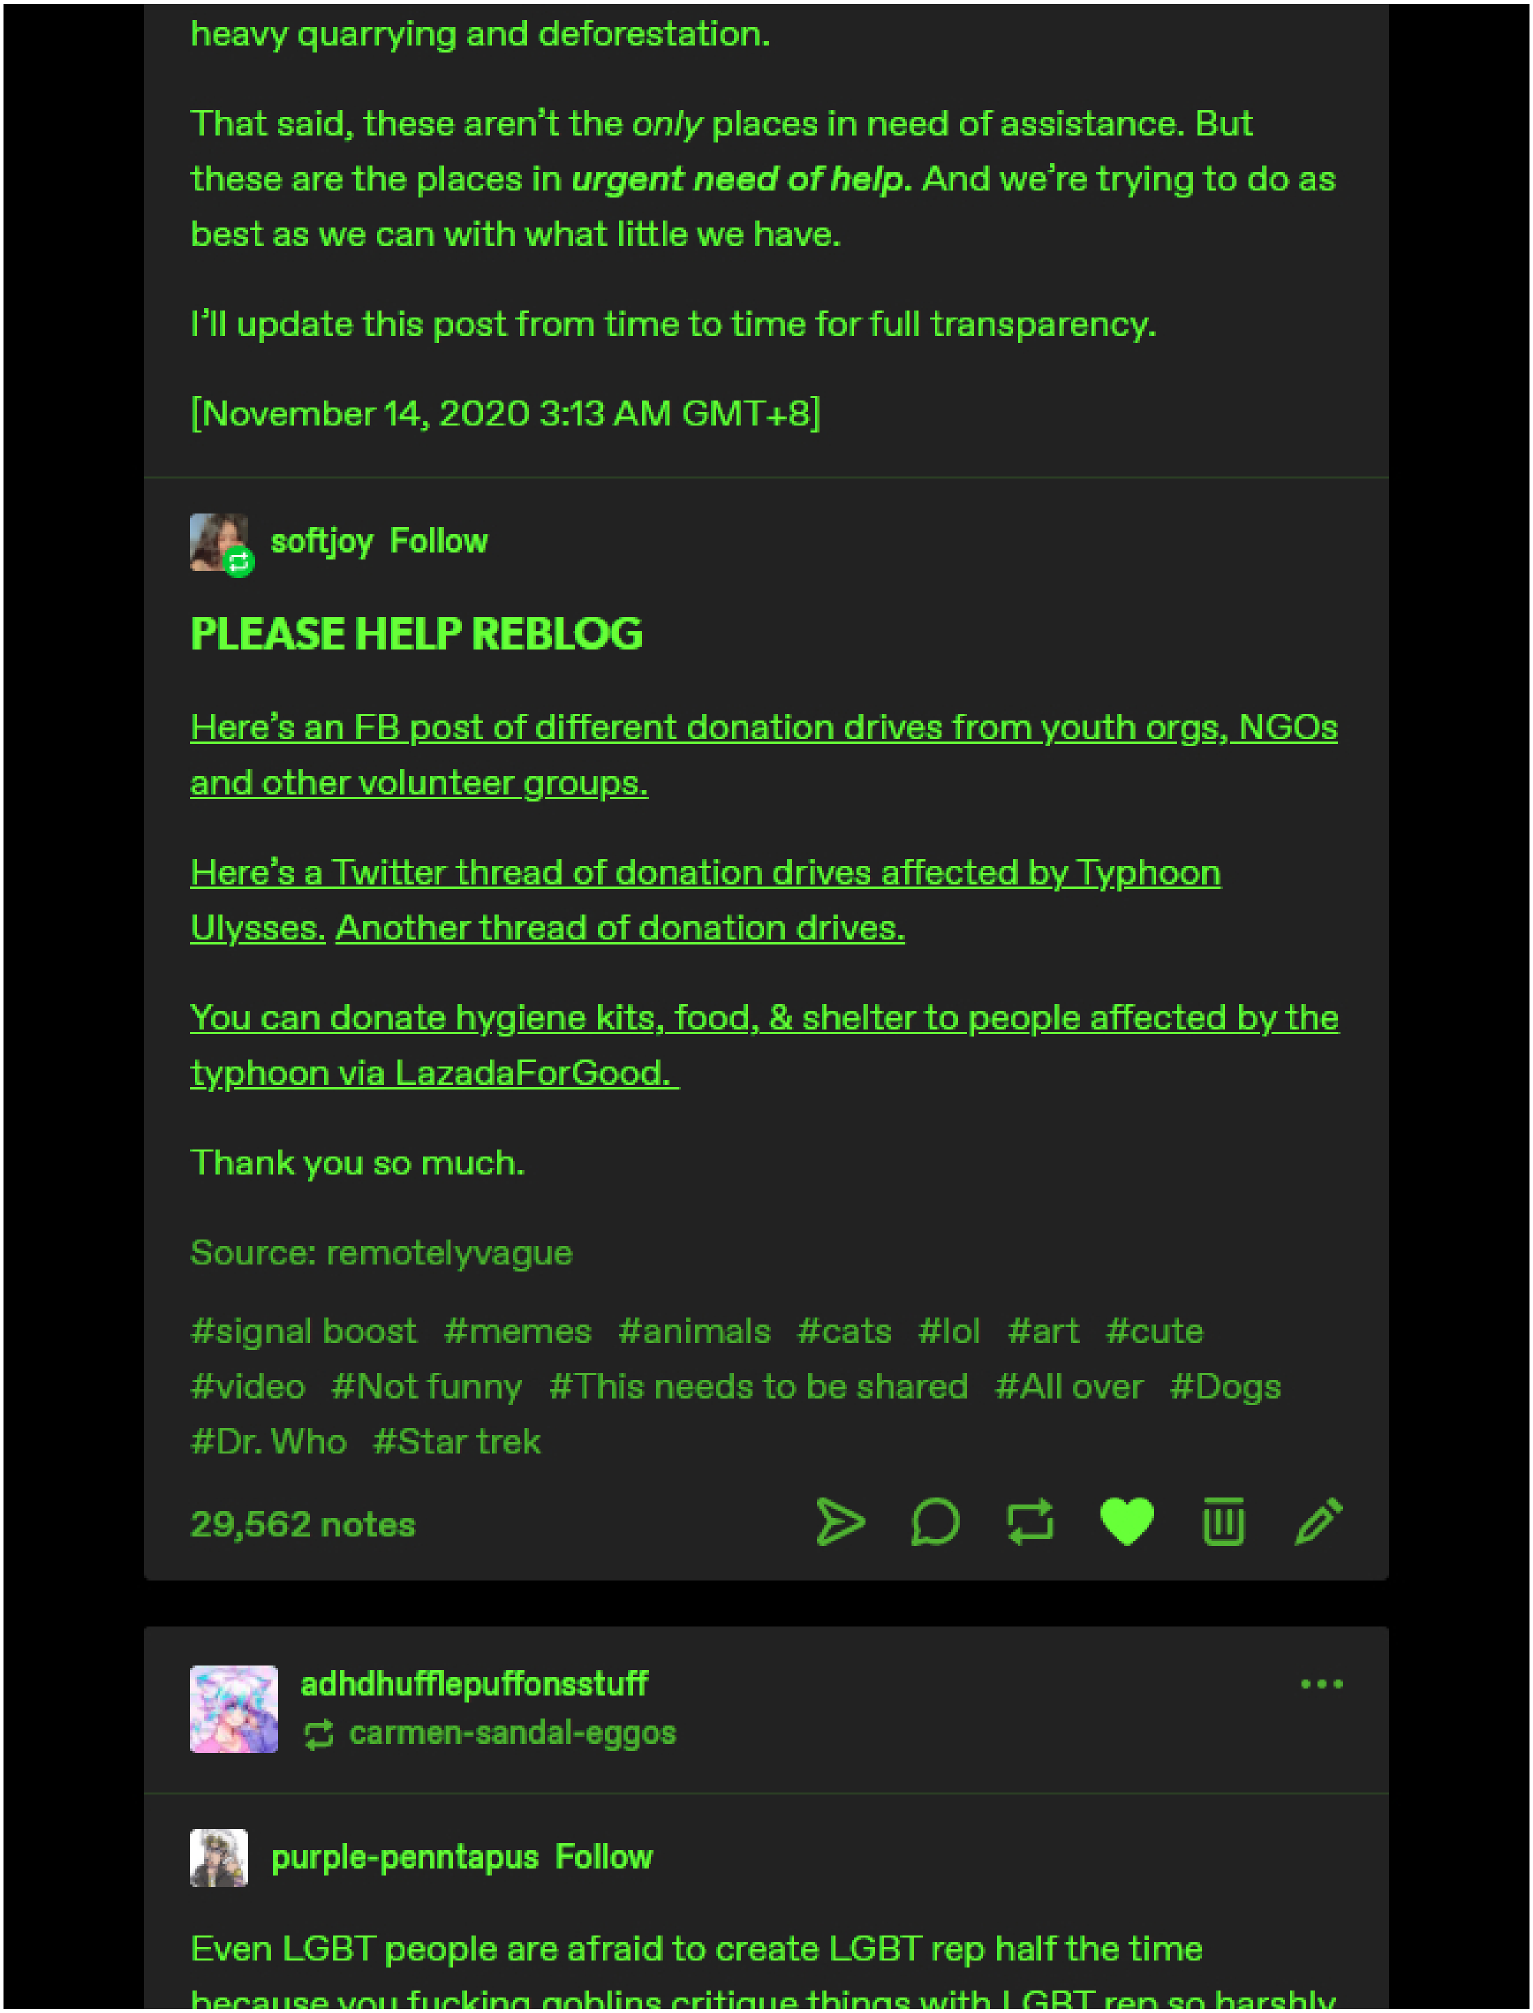
Please feel free to add on this post for any other ways to help.

For context:

The Philippines has been hit by three consecutive typhoons this month alone: Quinta, Rolly (Goni internationally) and Ulysses. It's been hitting nearly the same areas, which has made them even more vulnerable now that they're still recovering from the previous typhoons. Our mountain ranges couldn't shield us from this due to



heavy quarrying and deforestation.

That said, these aren't the *only* places in need of assistance. But these are the places in ***urgent need of help.*** And we're trying to do as best as we can with what little we have.

I'll update this post from time to time for full transparency.

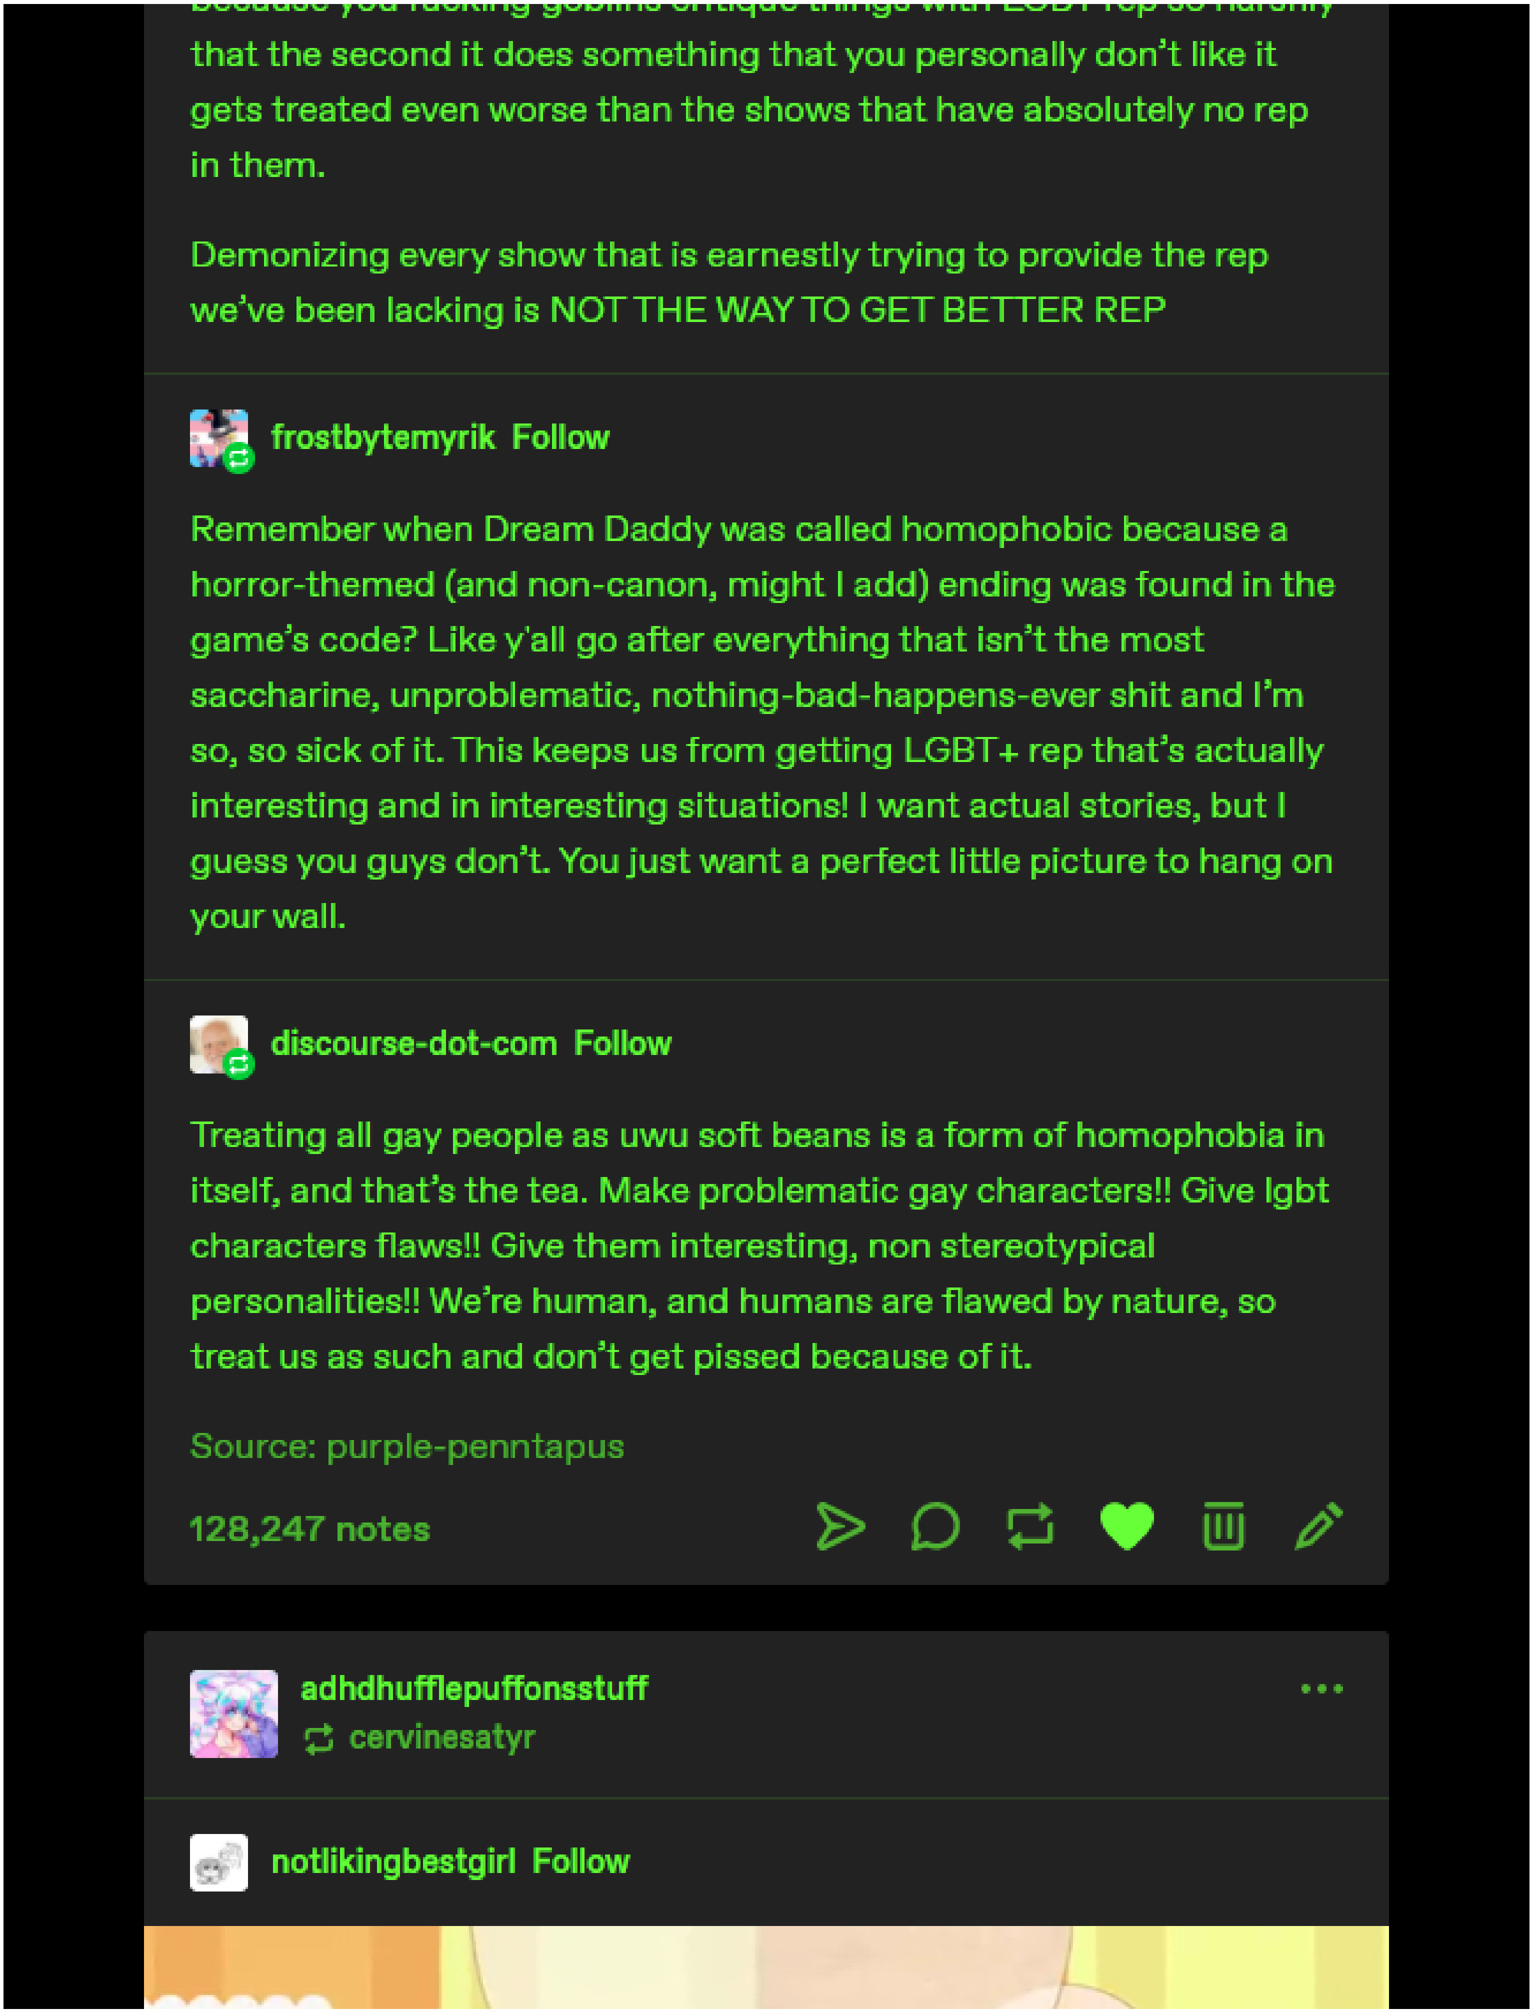
Even LGBT people are afraid to create LGBT rep half the time because you fucking goblins critique things with LGBT rep so harshly



that the second it does something that you personally don't like it gets treated even worse than the shows that have absolutely no rep in them.

Demonizing every show that is earnestly trying to provide the rep we've been lacking is NOT THE WAY TO GET BETTER REP

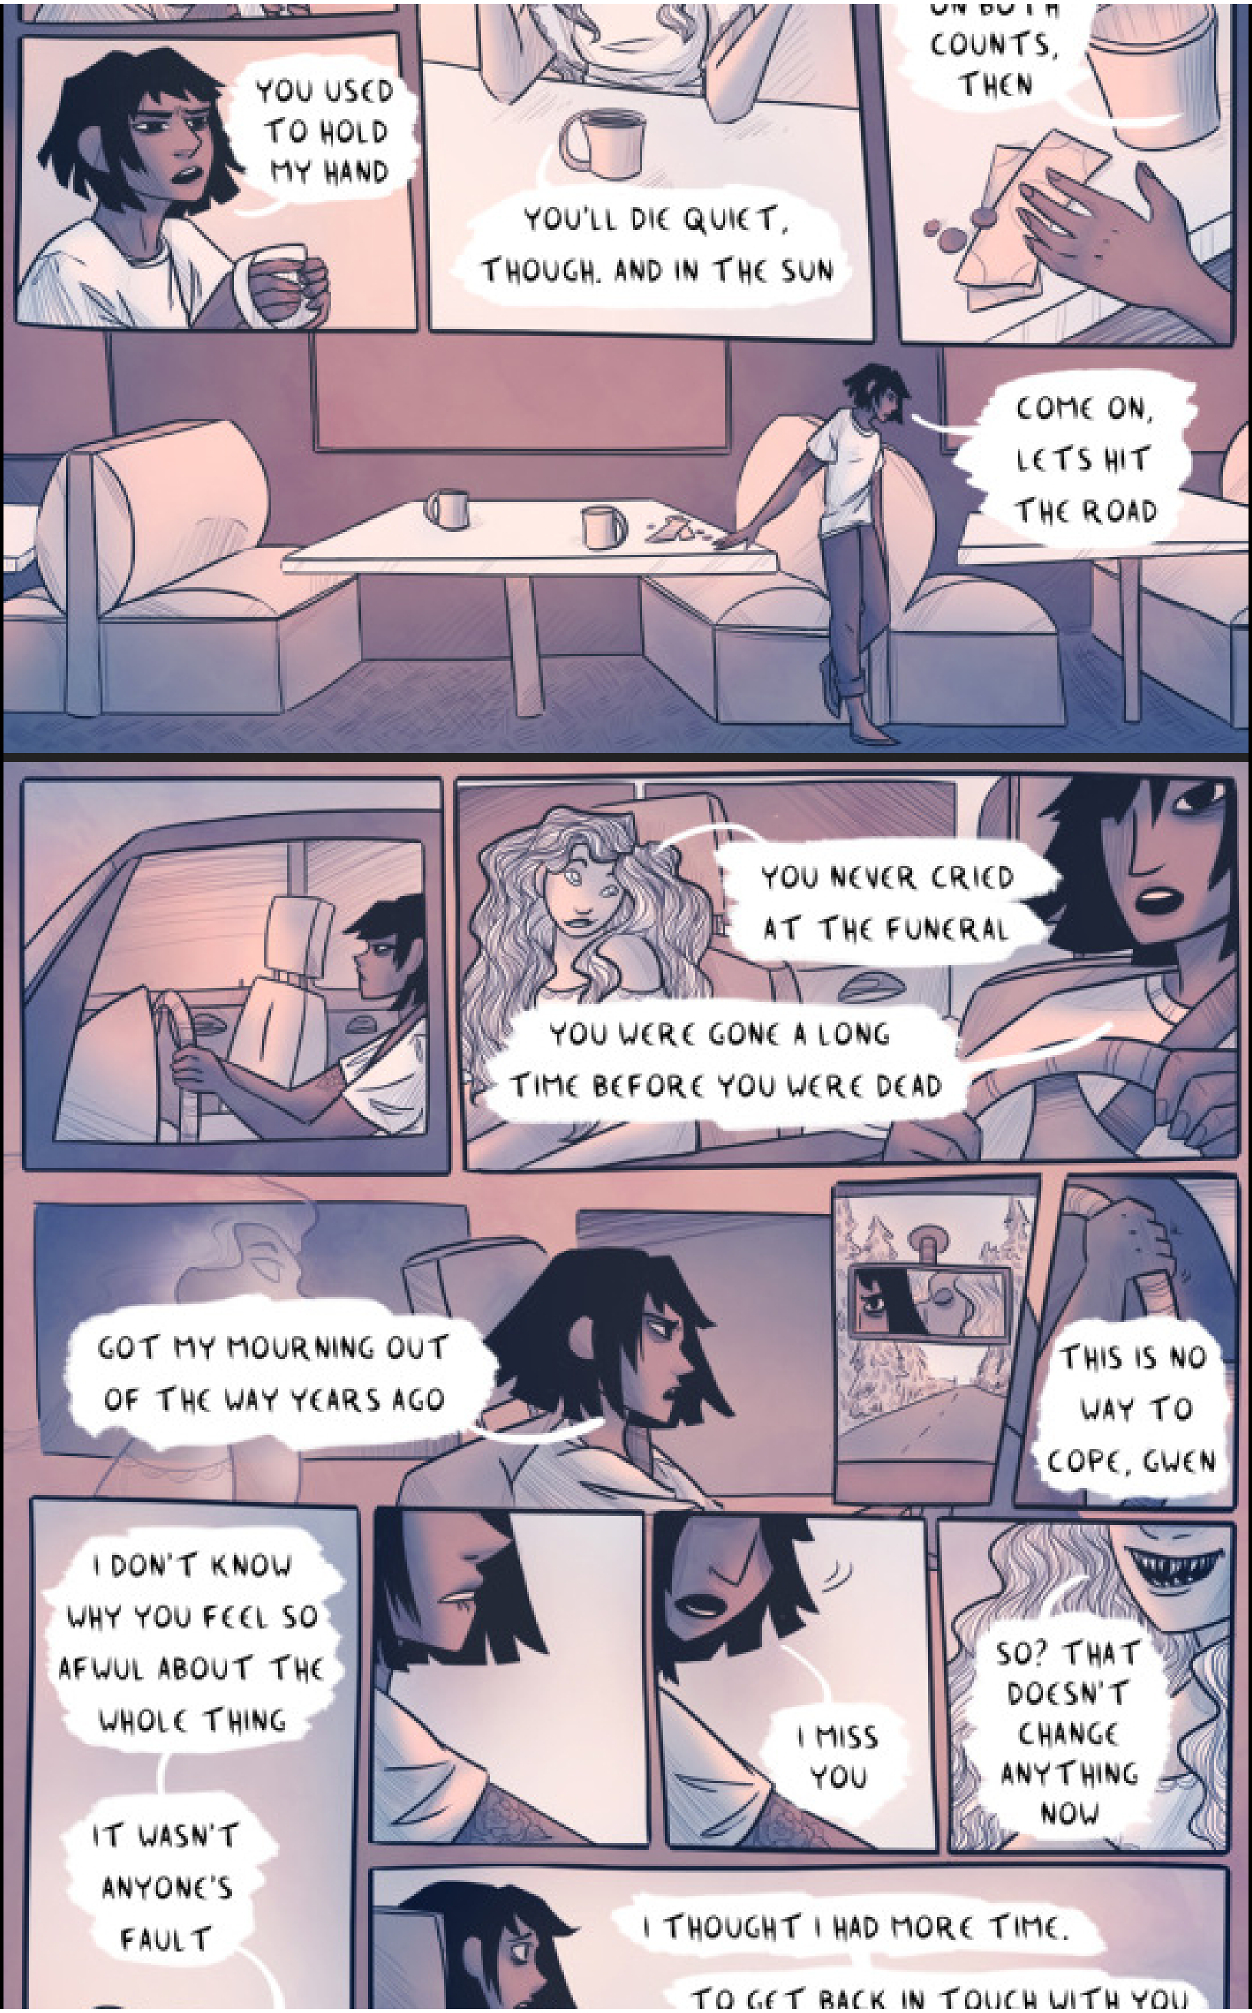
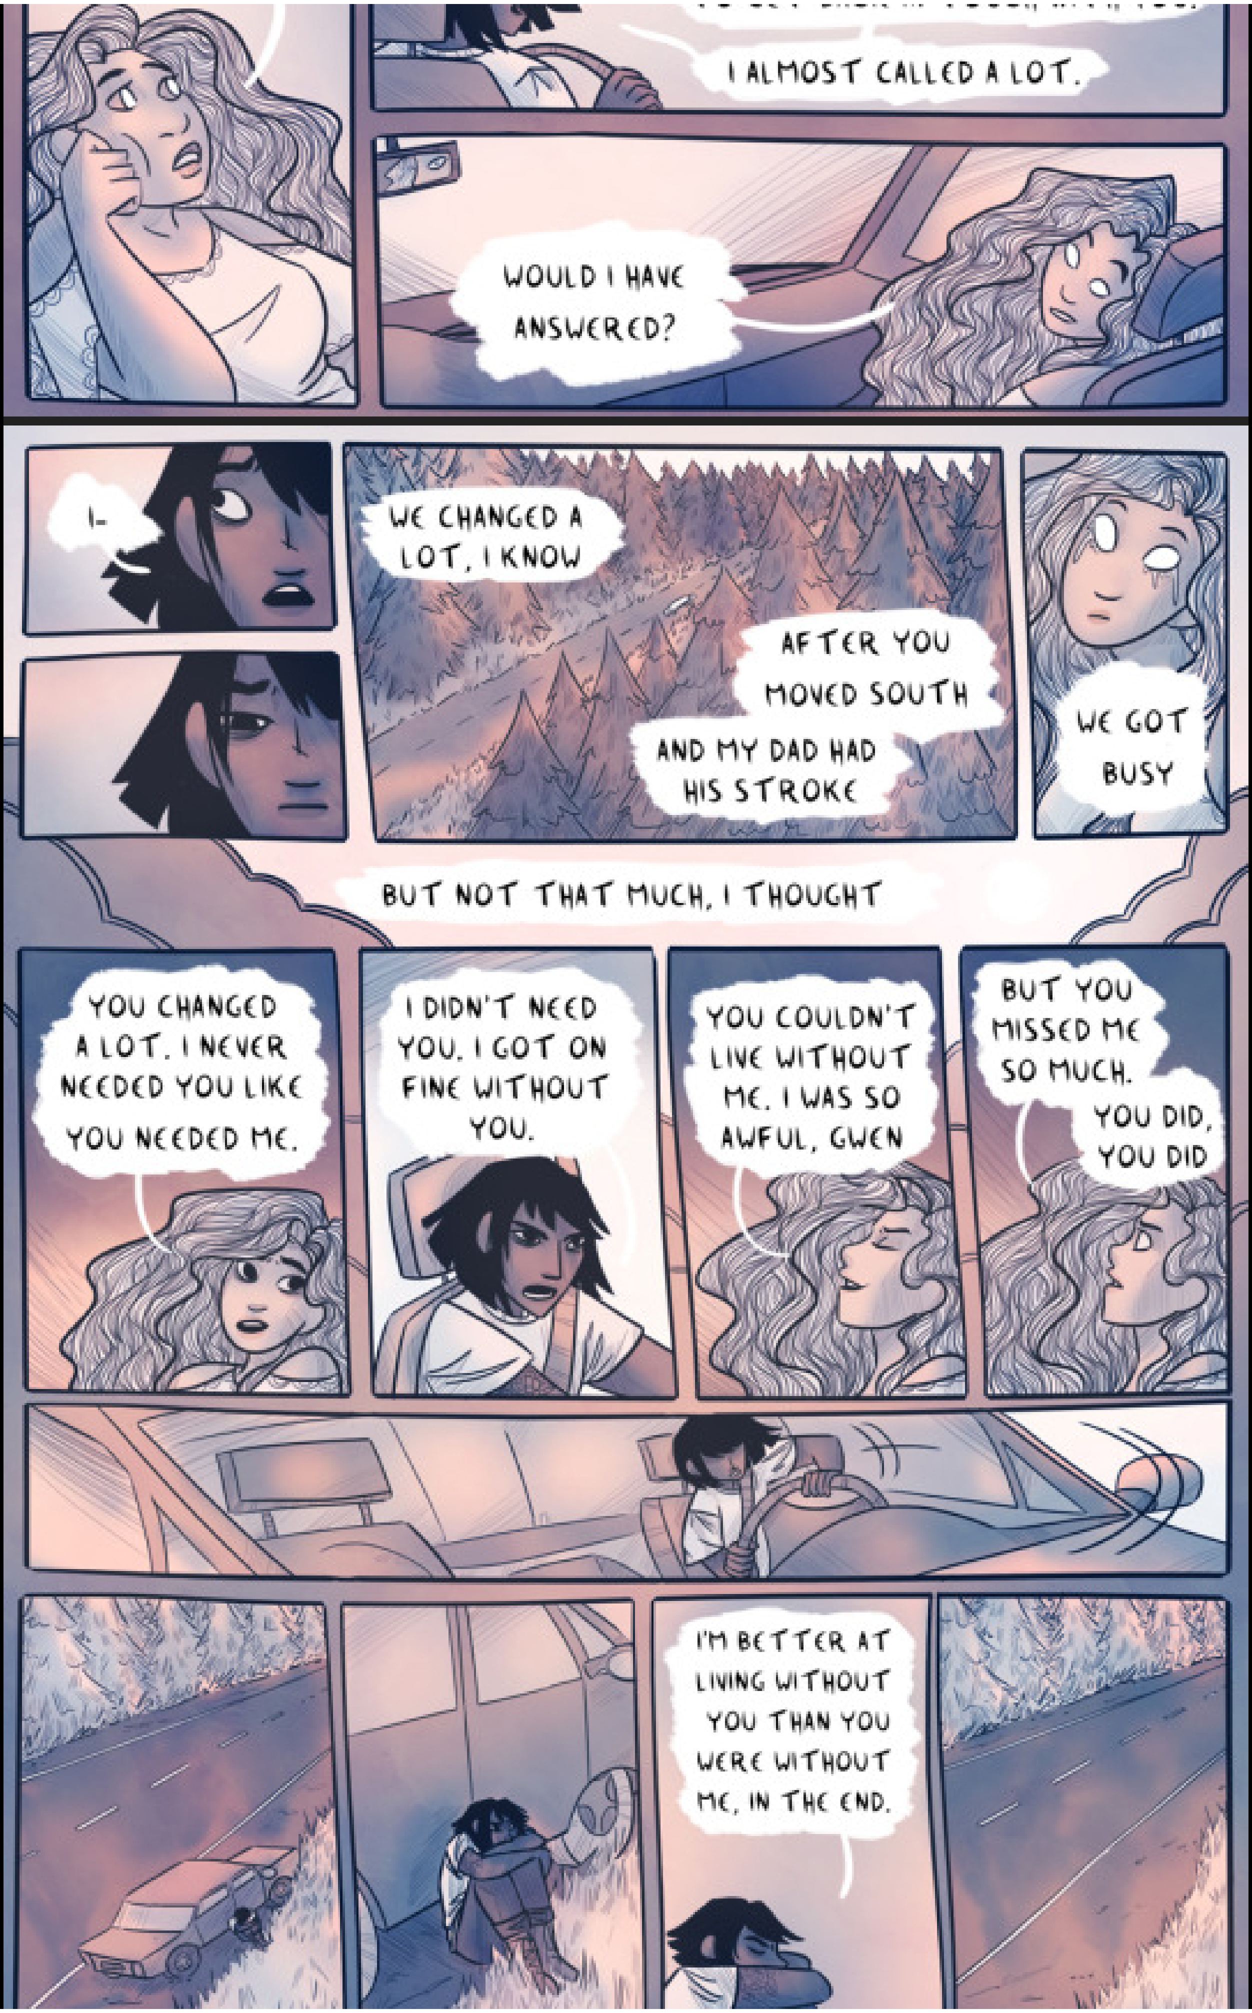
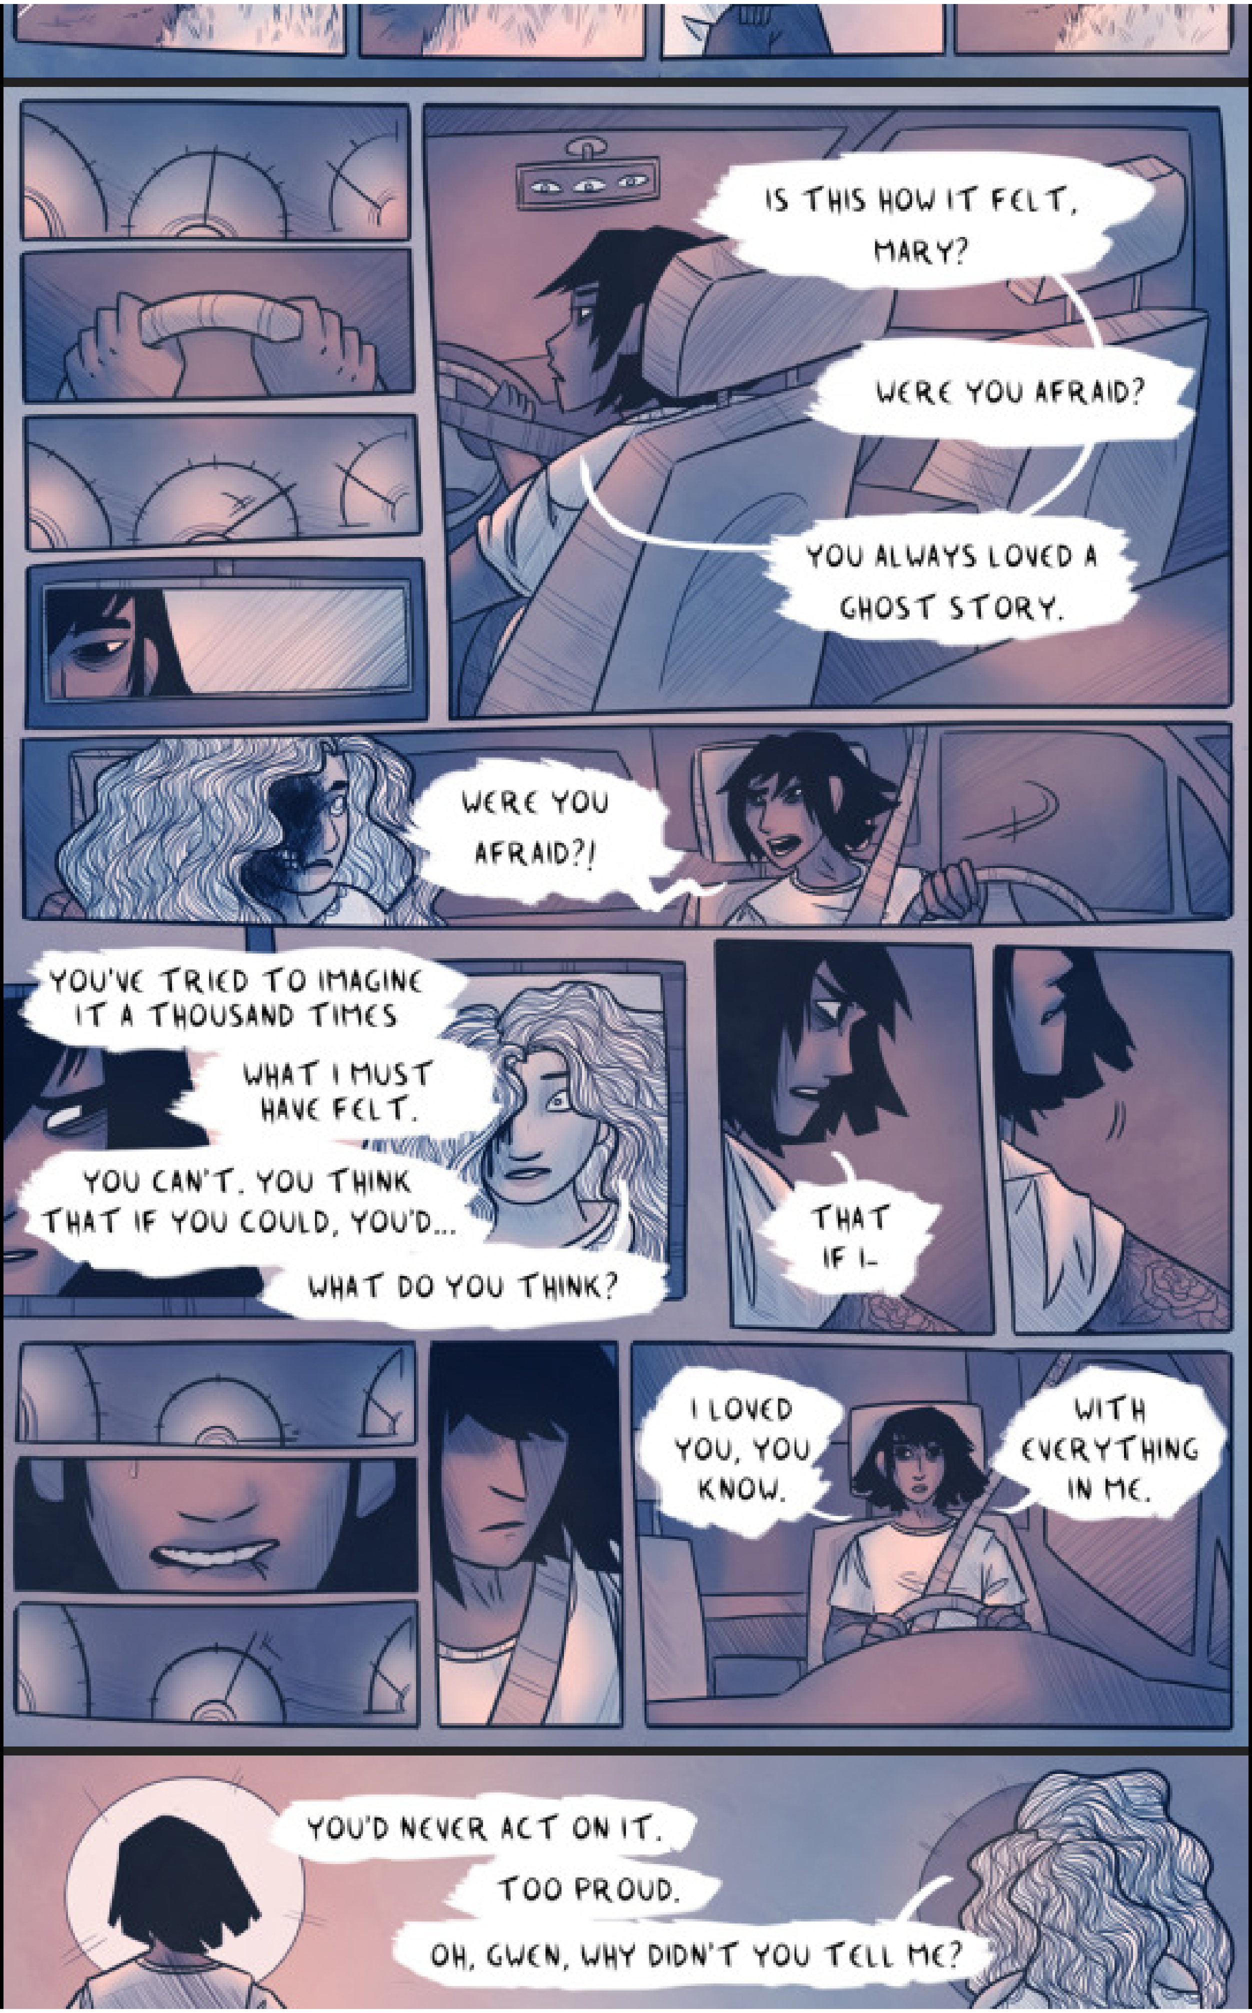
YOU DON'T GET THAT OUT OF COLLEGE
AND OH BY THE WAY, WHEN DO YOU THINK YOU'RE GONNA DIE?
NEITHER OF US GUESSED CAR CRASH
SEEMS LIKE AN OVERSIGHT, RETROSPECTIVELY
IF YOU LOOK AT STATISTICS
HERE'S WHAT I THINK!
YOU'RE GOING TO DIE ALONE
FUCK YOU
LOVED!
...BUT ALONE
THERE WILL BE PEOPLE WHO CRY OVER YOU
BUT NO ONE WHO REMEMBERS KISSING YOUR NECK
OR HOLDING YOUR HAND IN THE CAR
UNLIKE YOU



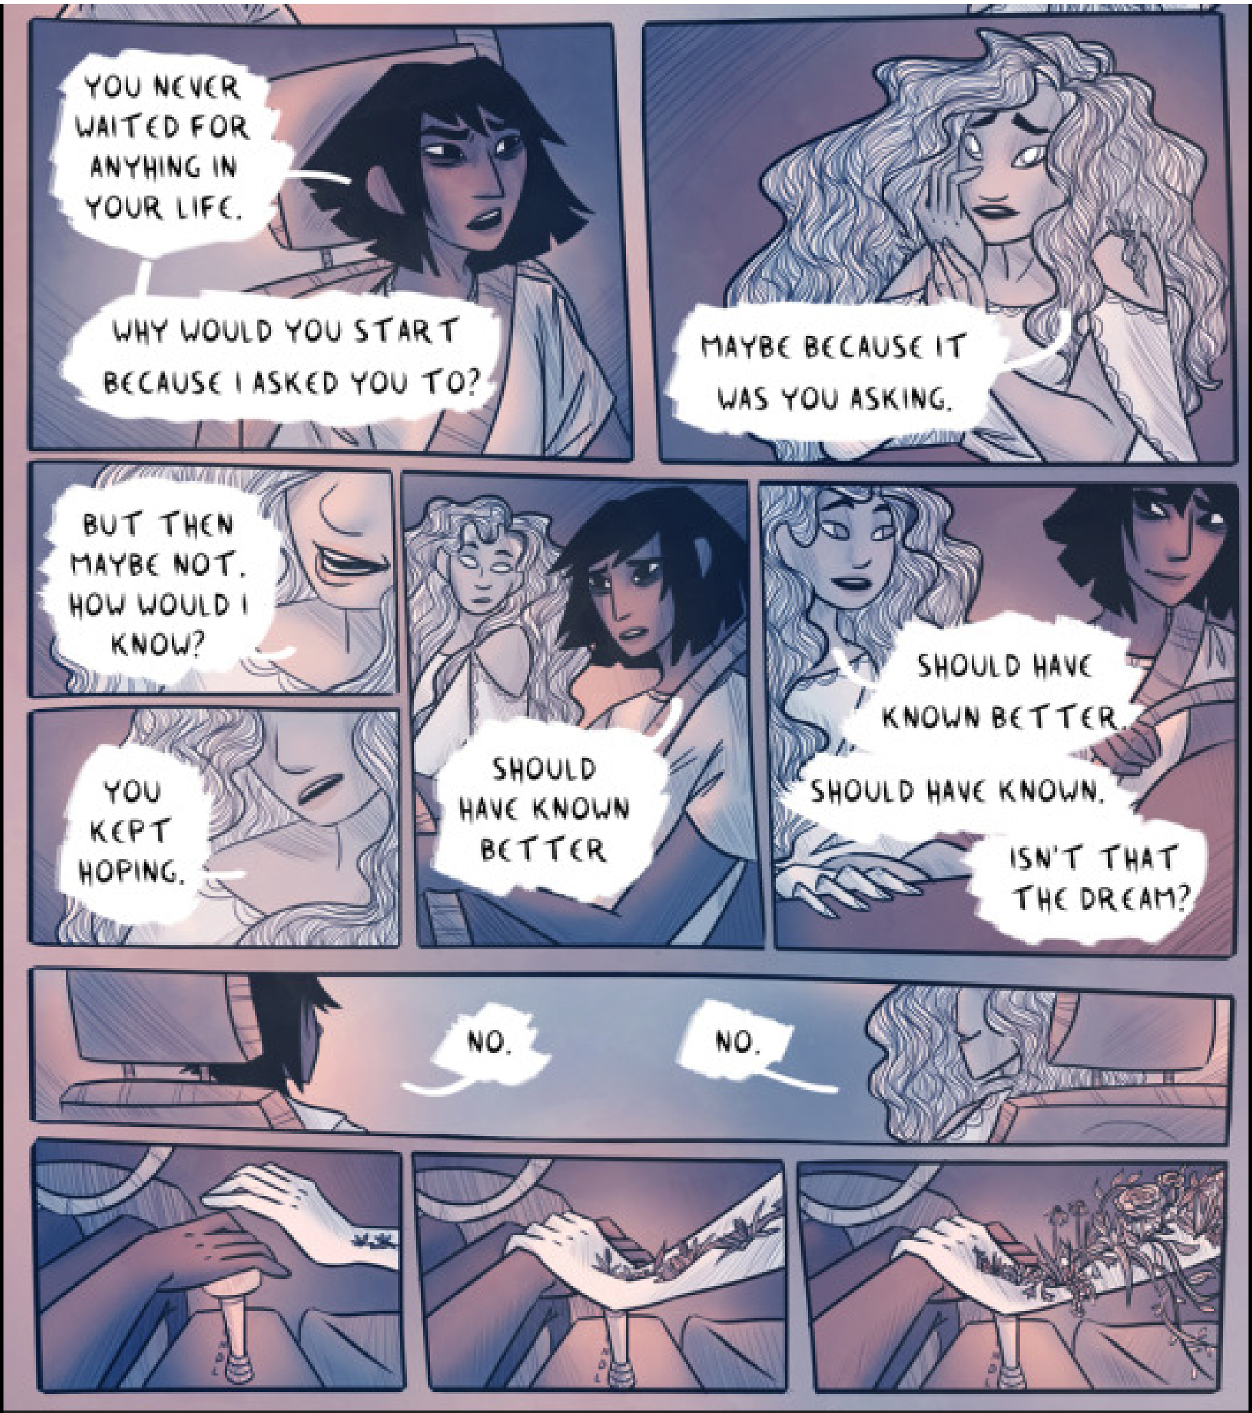
YOU USED TO HOLD MY HAND
YOU'LL DIE QUIET, THOUGH. AND IN THE SUN
ON BOTH COUNTS, THEN
COME ON, LETS HIT THE ROAD
YOU NEVER CRIED AT THE FUNERAL
YOU WERE GONE A LONG TIME BEFORE YOU WERE DEAD
GOT MY MOURNING OUT OF THE WAY YEARS AGO
THIS IS NO WAY TO COPE, GWEN
I DON'T KNOW WHY YOU FEEL SO AFWUL ABOUT THE WHOLE THING
IT WASN'T ANYONE'S FAULT
I MISS YOU
SO? THAT DOESN'T CHANGE ANYTHING NOW
I THOUGHT I HAD MORE TIME.
TO GET BACK IN TOUCH WITH YOU



I ALMOST CALLED A LOT.
WOULD I HAVE ANSWERED?
I-
WE CHANGED A LOT, I KNOW
AFTER YOU MOVED SOUTH
AND MY DAD HAD HIS STROKE
WE GOT BUSY
BUT NOT THAT MUCH, I THOUGHT
YOU CHANGED A LOT. I NEVER NEEDED YOU LIKE YOU NEEDED ME.
I DIDN'T NEED YOU. I GOT ON FINE WITHOUT YOU.
YOU COULDN'T LIVE WITHOUT ME. I WAS SO AWFUL, GWEN
BUT YOU MISSED ME SO MUCH.
YOU DID, YOU DID
I'M BETTER AT LIVING WITHOUT YOU THAN YOU WERE WITHOUT ME, IN THE END.



IS THIS HOW IT FELT, MARY?
WERE YOU AFRAID?
YOU ALWAYS LOVED A GHOST STORY.
WERE YOU AFRAID?!
YOU'VE TRIED TO IMAGINE IT A THOUSAND TIMES
WHAT I MUST HAVE FELT.
YOU CAN'T. YOU THINK THAT IF YOU COULD, YOU'D...
WHAT DO YOU THINK?
THAT IF I–
I LOVED YOU, YOU KNOW.
WITH EVERYTHING IN ME.
YOU'D NEVER ACT ON IT.
TOO PROUD.
OH, GWEN, WHY DIDN'T YOU TELL ME?



YOU NEVER WAITED FOR ANYTHING IN YOUR LIFE.
WHY WOULD YOU START BECAUSE I ASKED YOU TO?
MAYBE BECAUSE IT WAS YOU ASKING.
BUT THEN MAYBE NOT. HOW WOULD I KNOW?
YOU KEPT HOPING.
SHOULD HAVE KNOWN BETTER
SHOULD HAVE KNOWN BETTER.
SHOULD HAVE KNOWN.
ISN'T THAT THE DREAM?
NO.
NO.

To explain. The latter works because you're cutting off the supply of oxygen to the fire and suffocating it

as opposed to slapping oxygen inside the pan with the downward motion

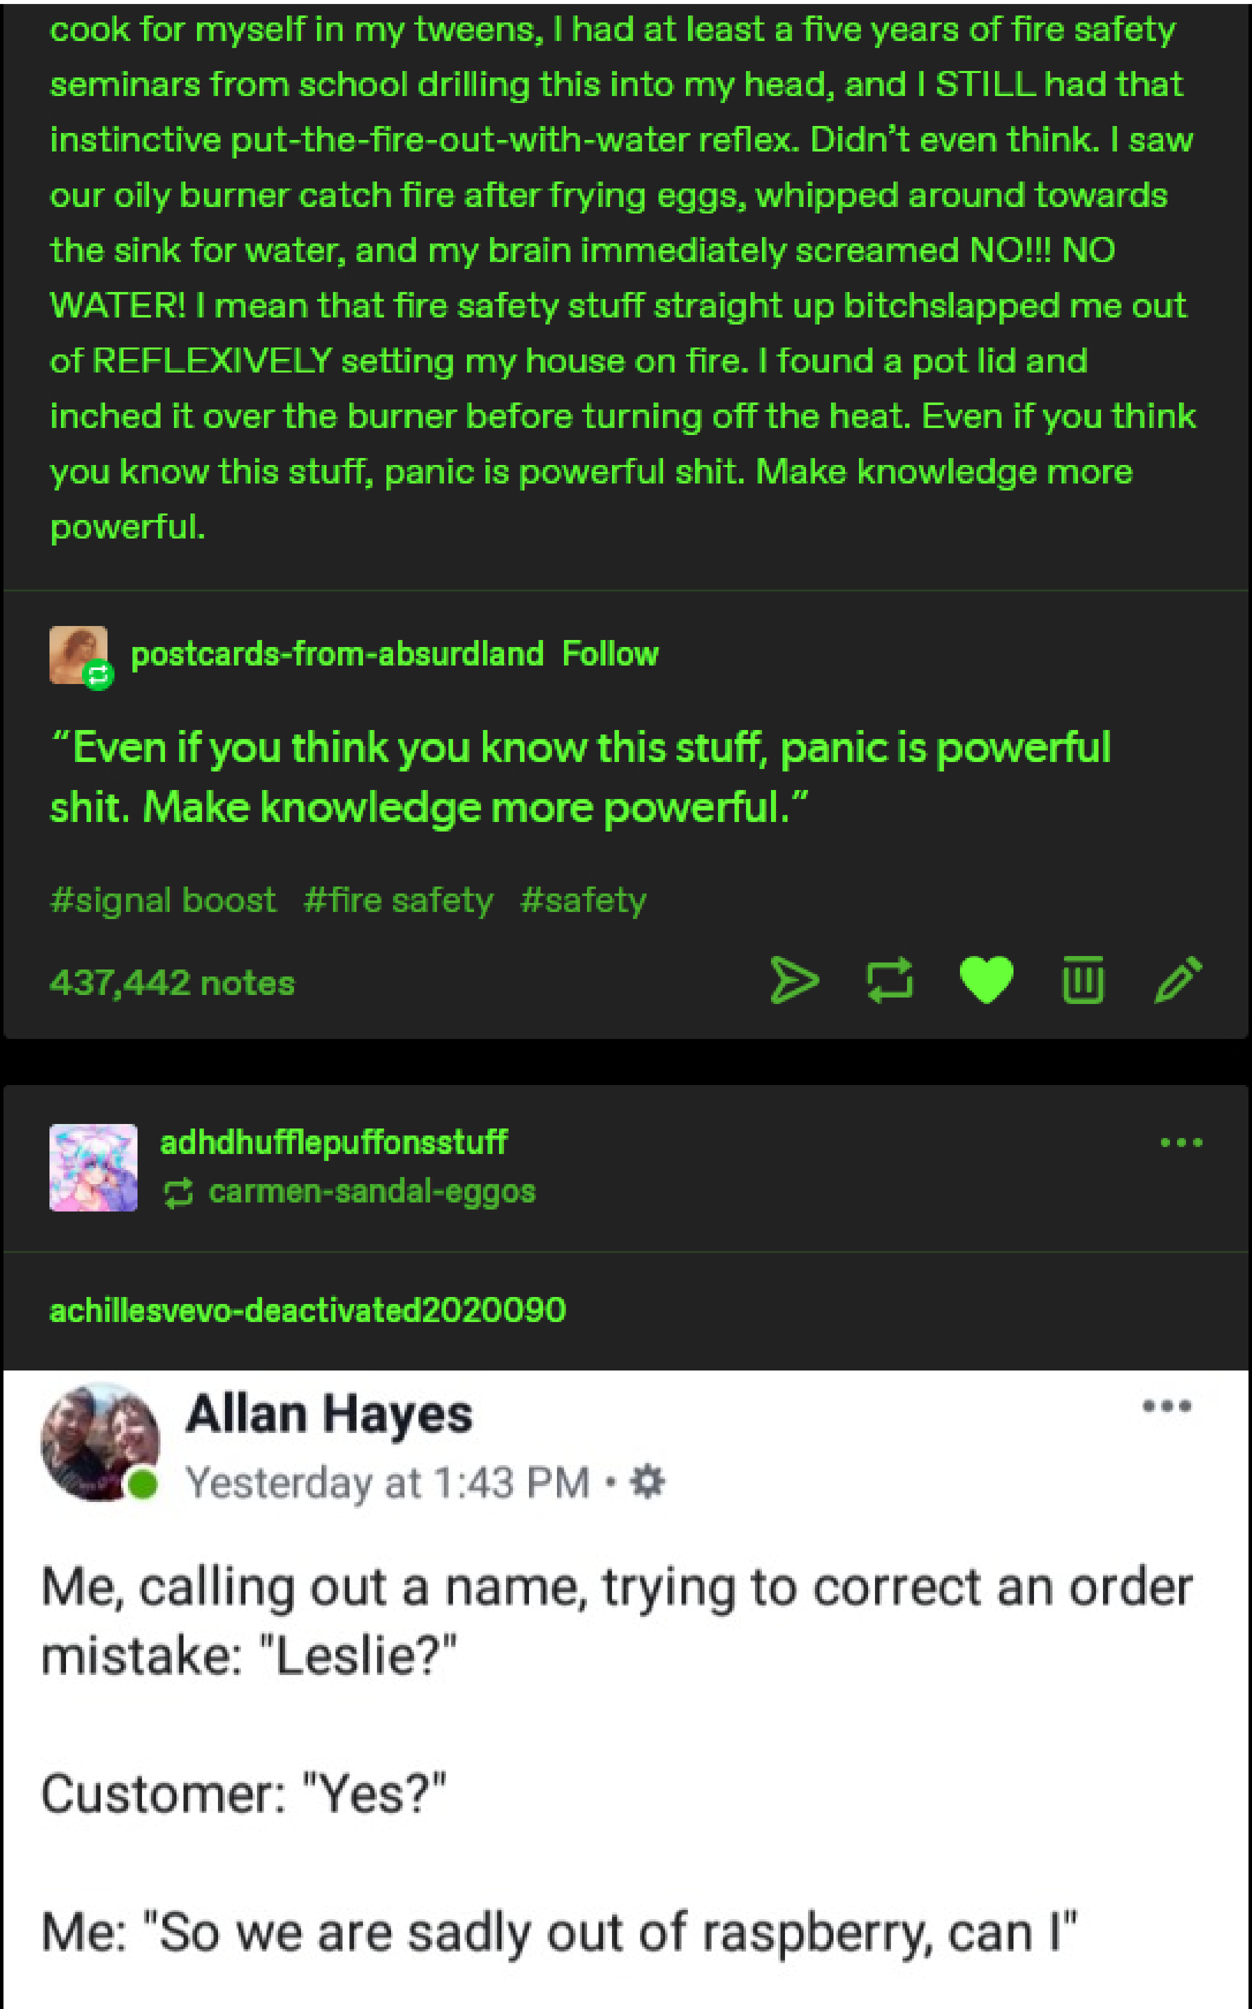
Reblogging, because this is so important. When I was learning how to



cook for myself in my tweens, I had at least a five years of fire safety seminars from school drilling this into my head, and I STILL had that instinctive put-the-fire-out-with-water reflex. Didn't even think. I saw our oily burner catch fire after frying eggs, whipped around towards the sink for water, and my brain immediately screamed NO!!! NO WATER! I mean that fire safety stuff straight up bitchslapped me out of REFLEXIVELY setting my house on fire. I found a pot lid and inched it over the burner before turning off the heat. Not a framing story, but a printing story: When I was 19, I worked in a one-hour photo lab for Kodak. We had a couple bring in their photos of a nudist wedding on a nude beach in Jersey. My manager gave the okay to develop and print them (with thanks to the couple for the forwarning so he could have an 18+ tech process their order). Then he left to run an errand in the mall while I developed the film and processed their prints.

It would have been fine, except the photo printer's exit chute dropped the prints in the front window of the store. Which, again, probably would have been fine, except, for the first time in the history of that particular one-hour photo lab, a group of sweet little nuns clustered around the big front store window to coo over other people's photos being developed live in real time. I only remembered that I was supposed to cover the chute after I heard them all gasp and wheeze in surprise. 🤣

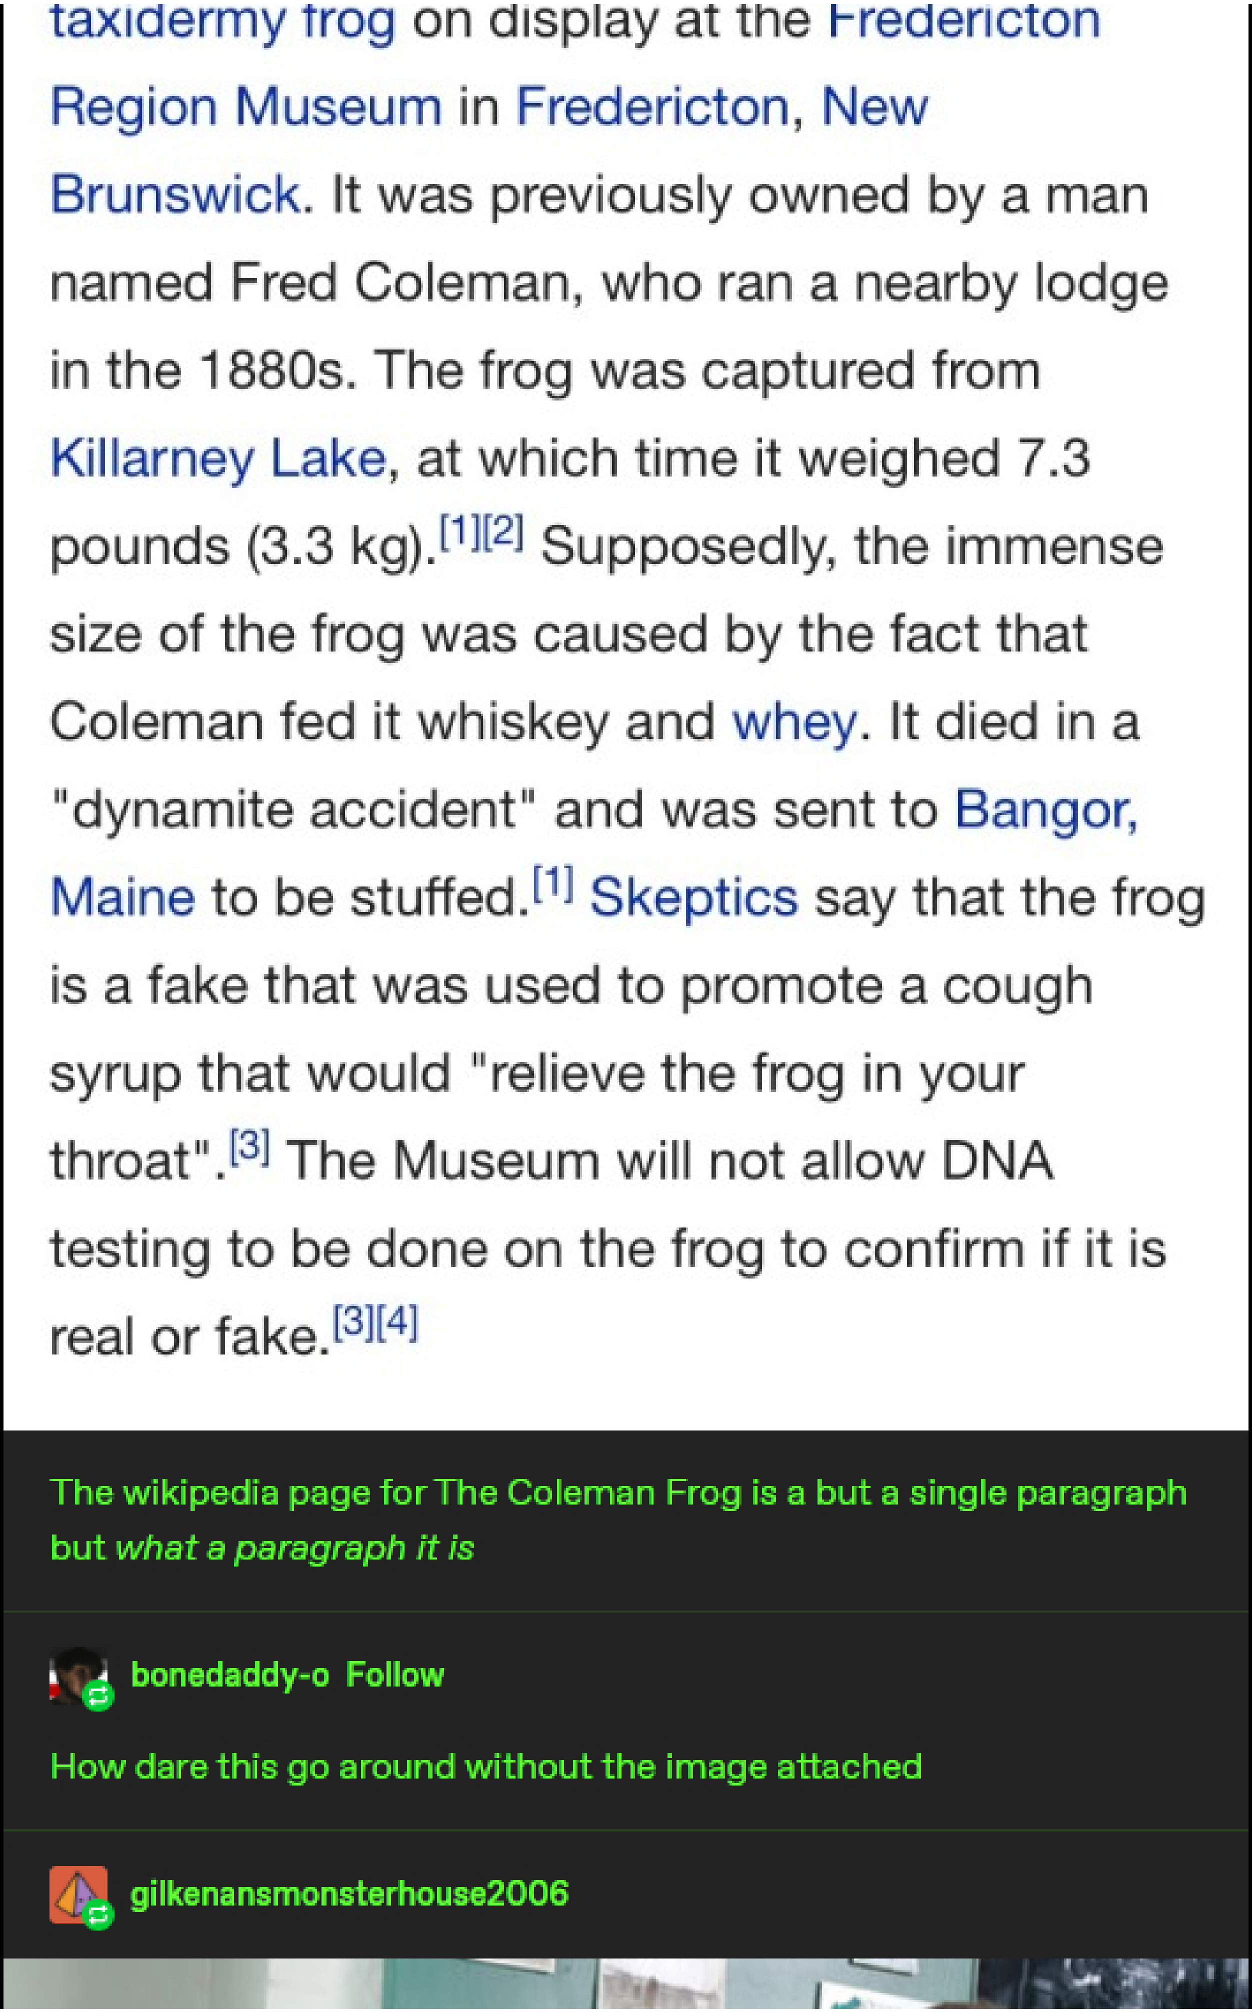
The **Coleman Frog** is a 19 kilograms (42 lb)



taxidermy frog on display at the Fredericton Region Museum in Fredericton, New Brunswick. It was previously owned by a man named Fred Coleman, who ran a nearby lodge in the 1880s. The frog was captured from Killarney Lake, at which time it weighed 7.3 pounds (3.3 kg).[1][2] Supposedly, the immense size of the frog was caused by the fact that Coleman fed it whiskey and whey. It died in a "dynamite accident" and was sent to Bangor, Maine to be stuffed.[1] Skeptics say that the frog is a fake that was used to promote a cough syrup that would "relieve the frog in your throat".[3] The Museum will not allow DNA testing to be done on the frog to confirm if it is real or fake.[3][4]

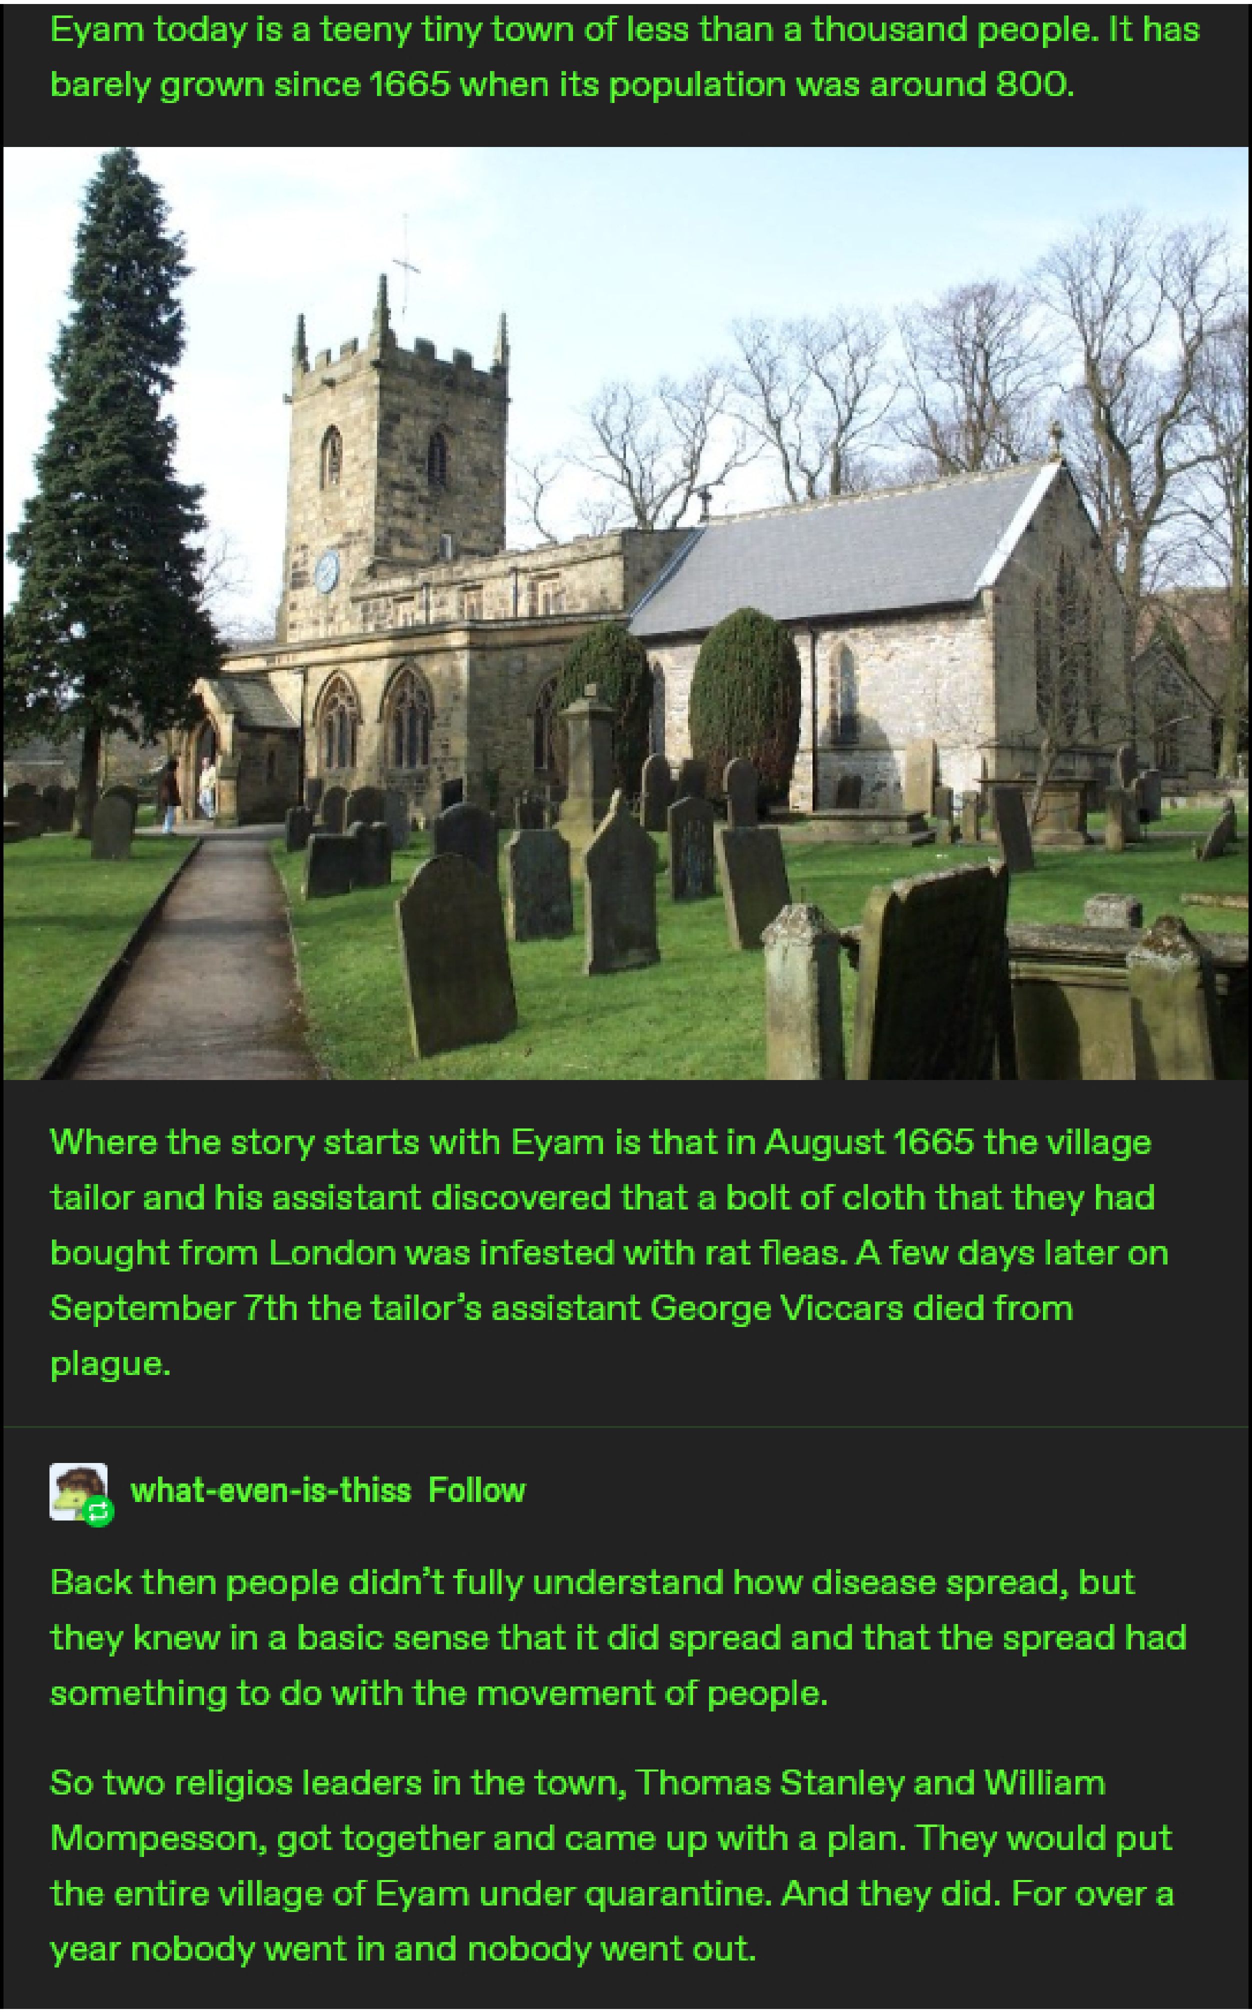
I keep hate-reading plague literature from the medieval era, but as depressed as it makes me there is always one historical tidbit that makes me feel a little bittersweet and I like to revisit it. That's the story of the village of Eyam.

what-even-is-thiss Follow



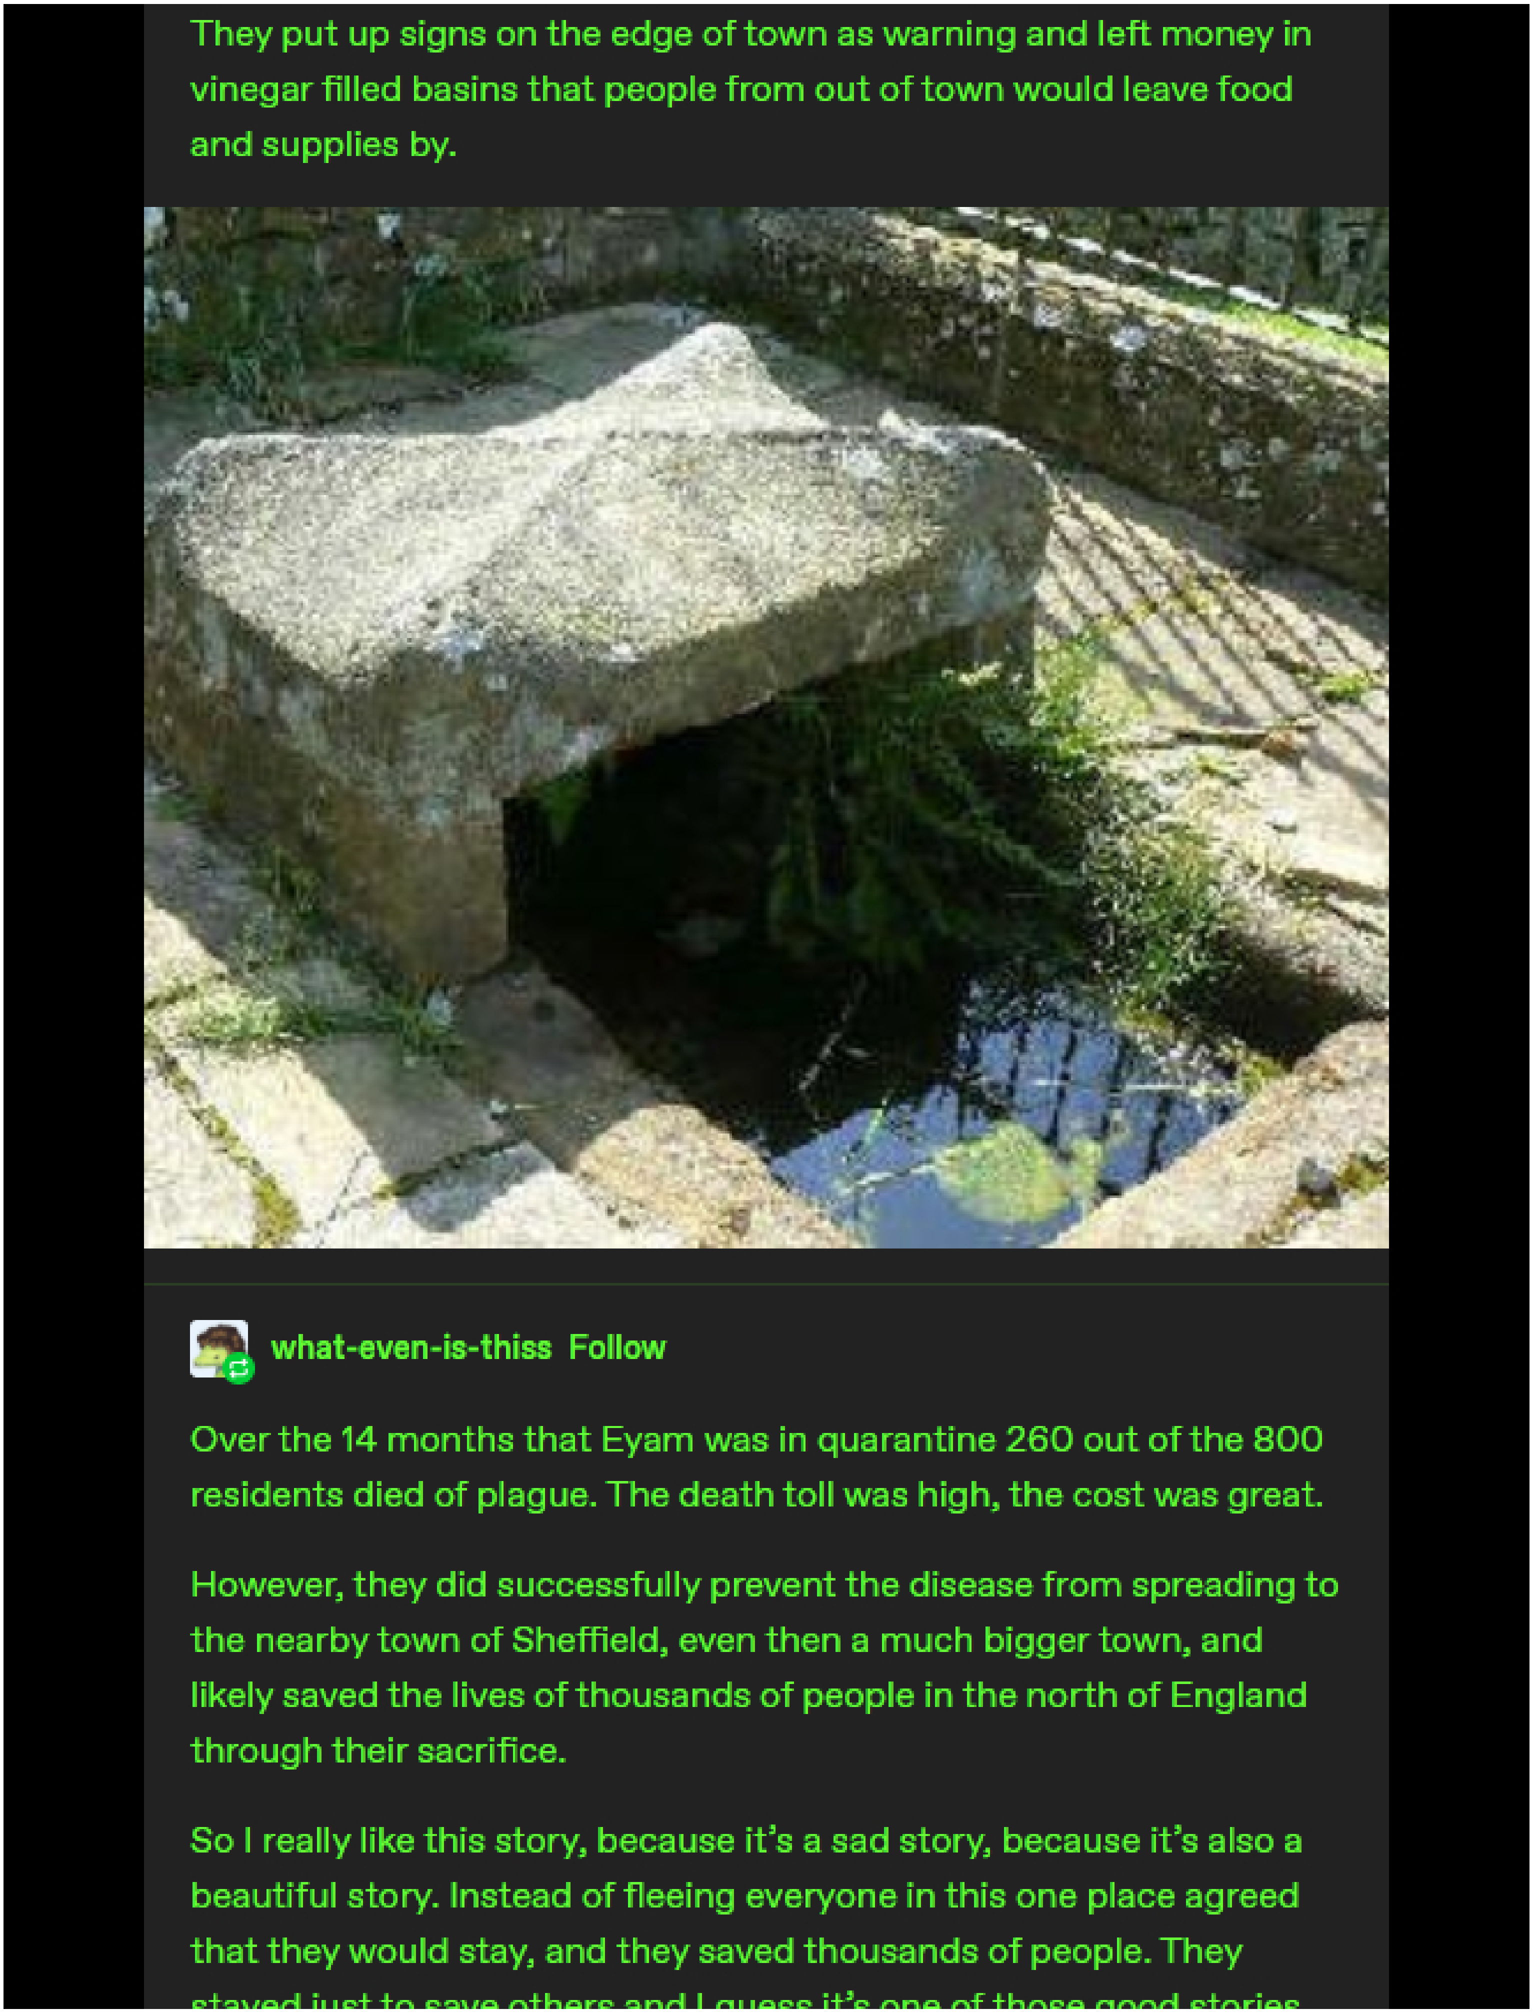
Eyam today is a teeny tiny town of less than a thousand people. It has barely grown since 1665 when its population was around 800.

Where the story starts with Eyam is that in August 1665 the village tailor and his assistant discovered that a bolt of cloth that they had bought from London was infested with rat fleas. A few days later on September 7th the tailor's assistant George Viccars died from plague.

what-even-is-thiss Follow

Back then people didn't fully understand how disease spread, but they knew in a basic sense that it did spread and that the spread had something to do with the movement of people.

So two religios leaders in the town, Thomas Stanley and William Mompesson, got together and came up with a plan. They would put the entire village of Eyam under quarantine. And they did. For over a year nobody went in and nobody went out.



They put up signs on the edge of town as warning and left money in vinegar filled basins that people from out of town would leave food and supplies by.

what-even-is-thiss Follow

Over the 14 months that Eyam was in quarantine 260 out of the 800 residents died of plague. The death toll was high, the cost was great.

However, they did successfully prevent the disease from spreading to the nearby town of Sheffield, even then a much bigger town, and likely saved the lives of thousands of people in the north of England through their sacrifice.

So I really like this story, because it's a sad story, because it's also a beautiful story. Instead of fleeing everyone in this one place agreed that they would stay, and they saved thousands of people. They stayed just to save others and I guess it's one of those good stories stayed just to save others and I guess it's one of those good stories about how people have always been people, for better or worse.

Japan's Kaguya spacecraft, formerly known as SELENE, reached the moon in October 2007. Its mission: to make detailed maps of the moon's surface, to search for water (a key resource for future human landings) frozen in deep craters, and to study the moon's gravitational field.

Barbara Cohen, a lunar scientist and self-described "lunatic" at NASA's Marshall Space Flight Center, says "Kaguya is the Cadillac of missions right now. It is huge, consisting of three separate satellites, and has excellent instruments. It will do a lot of particles and fields work that no other currently planned orbiter will do. I keep seeing "joking" posts about how ADHD medication is just microdosing meth, and it annoys me because, like... amphetamine, dextroamphetamine and methamphetamine are similar, but they aren't the same... Adderall is a combination of amphetamine and dextroamphetamine... meth is methamphetamine that had a double methyl group, which makes it pass the blood brain barrier much quicker, with stronger effects (which is where the "microdosing" analogy comes from), but it's also neurotoxic and highly addictive.

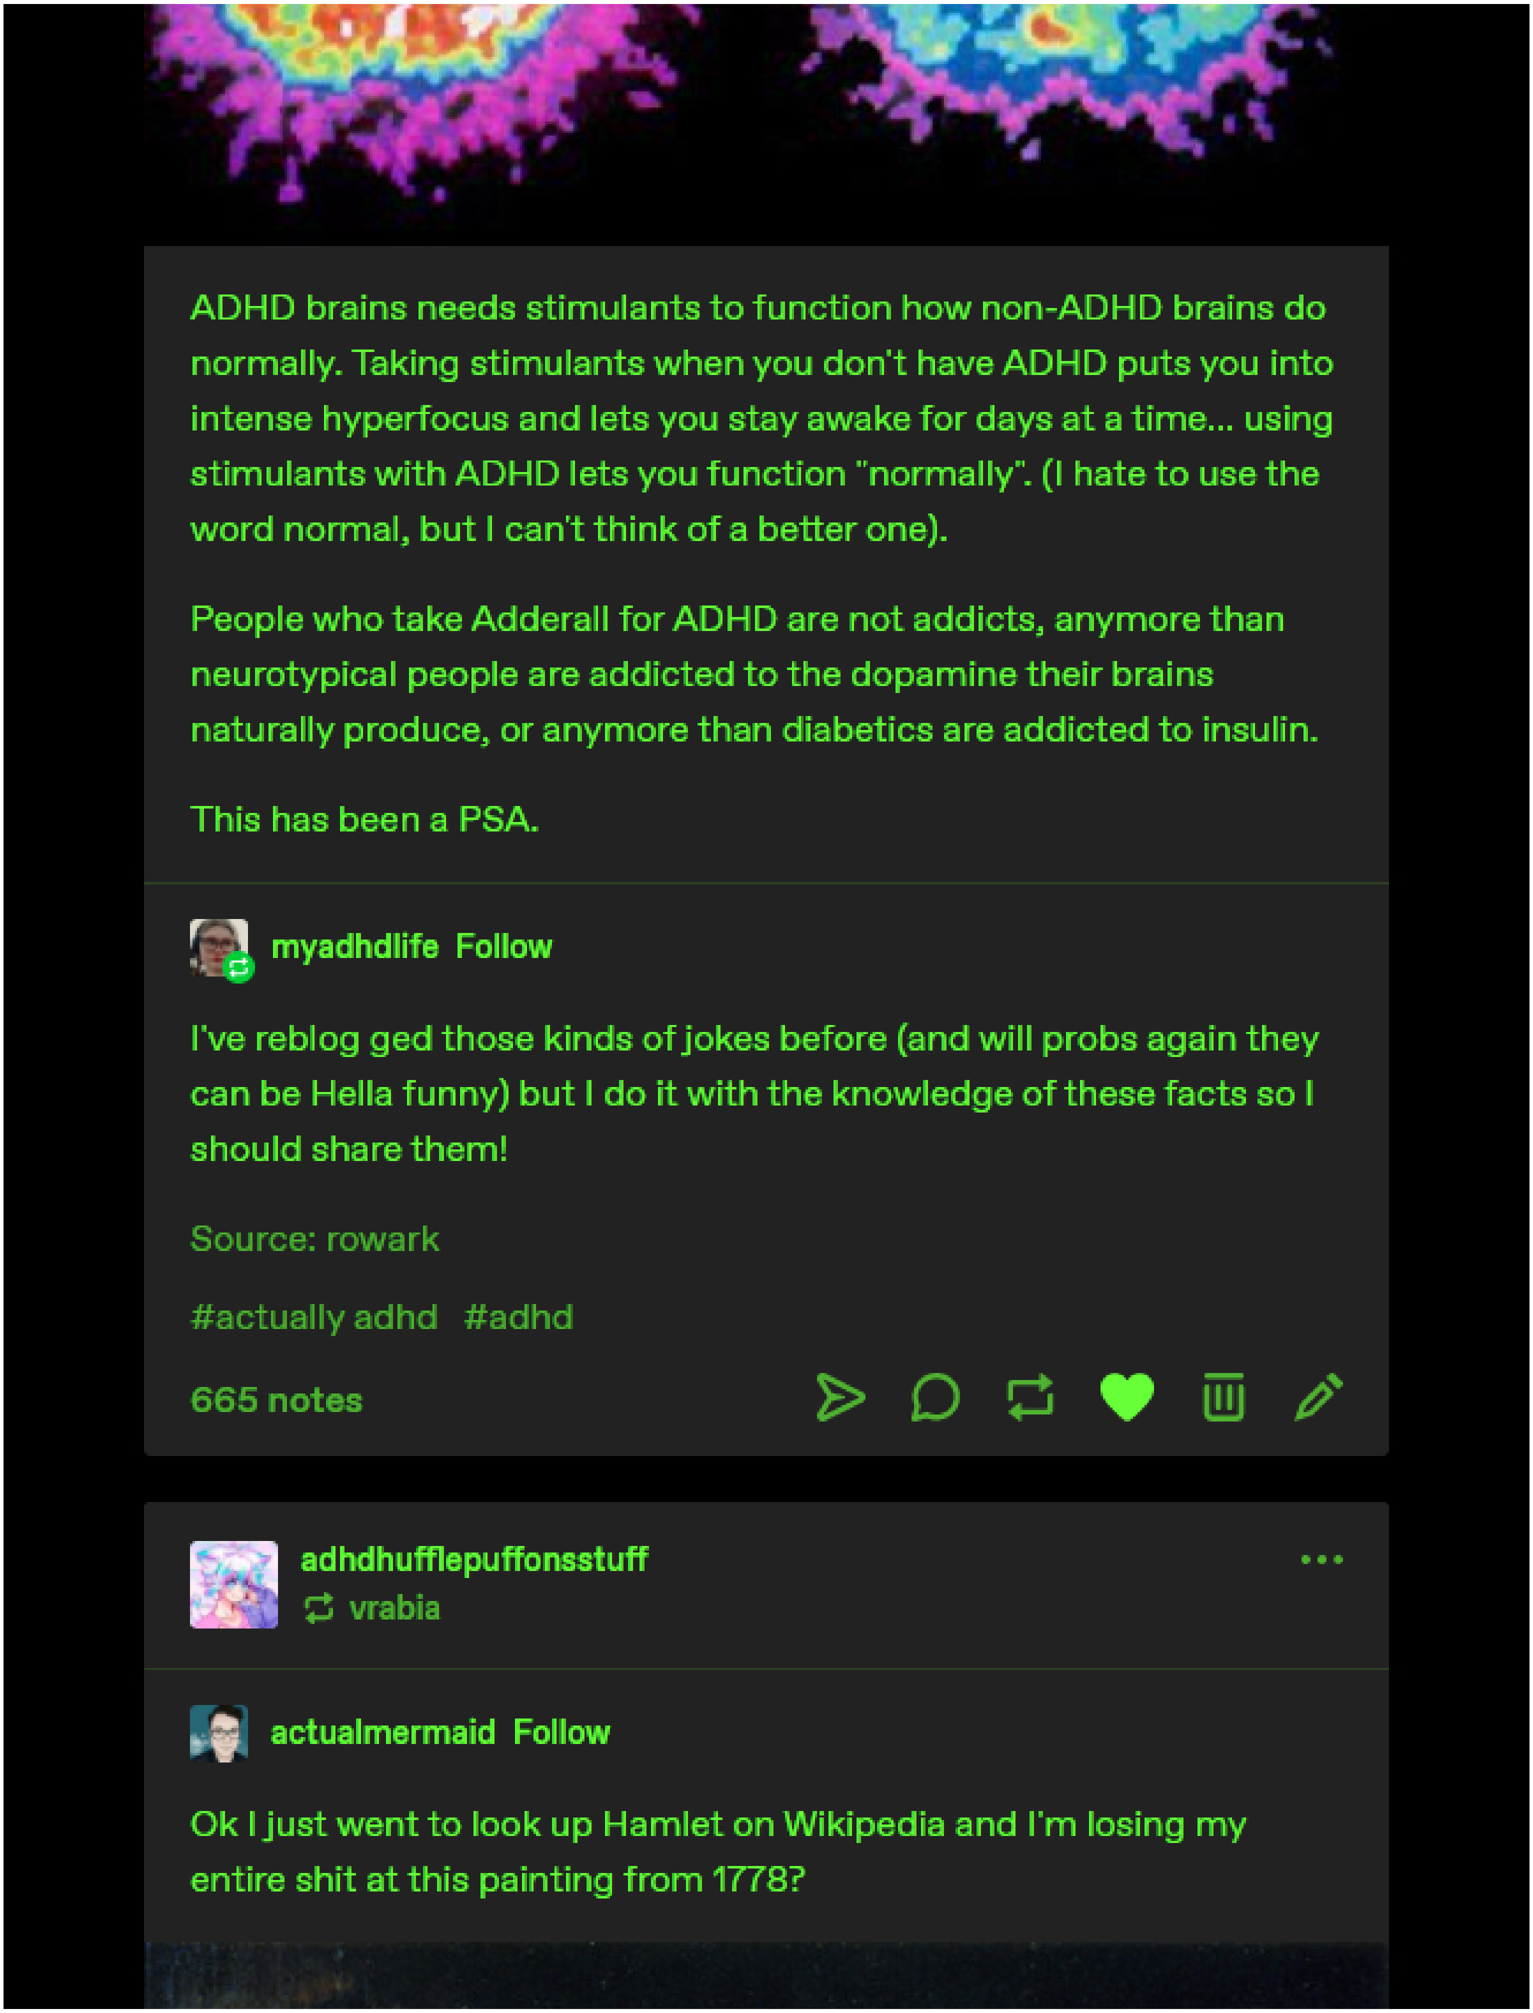
Yes, obviously they are both stimulants, but there's a reason why ADHD is treated with stimulants:



ADHD brains needs stimulants to function how non-ADHD brains do normally. Taking stimulants when you don't have ADHD puts you into intense hyperfocus and lets you stay awake for days at a time... using stimulants with ADHD lets you function "normally". (I hate to use the word normal, but I can't think of a better one).

People who take Adderall for ADHD are not addicts, anymore than neurotypical people are addicted to the dopamine their brains naturally produce, or anymore than diabetics are addicted to insulin.

This has been a PSA.

Anonymous asked:

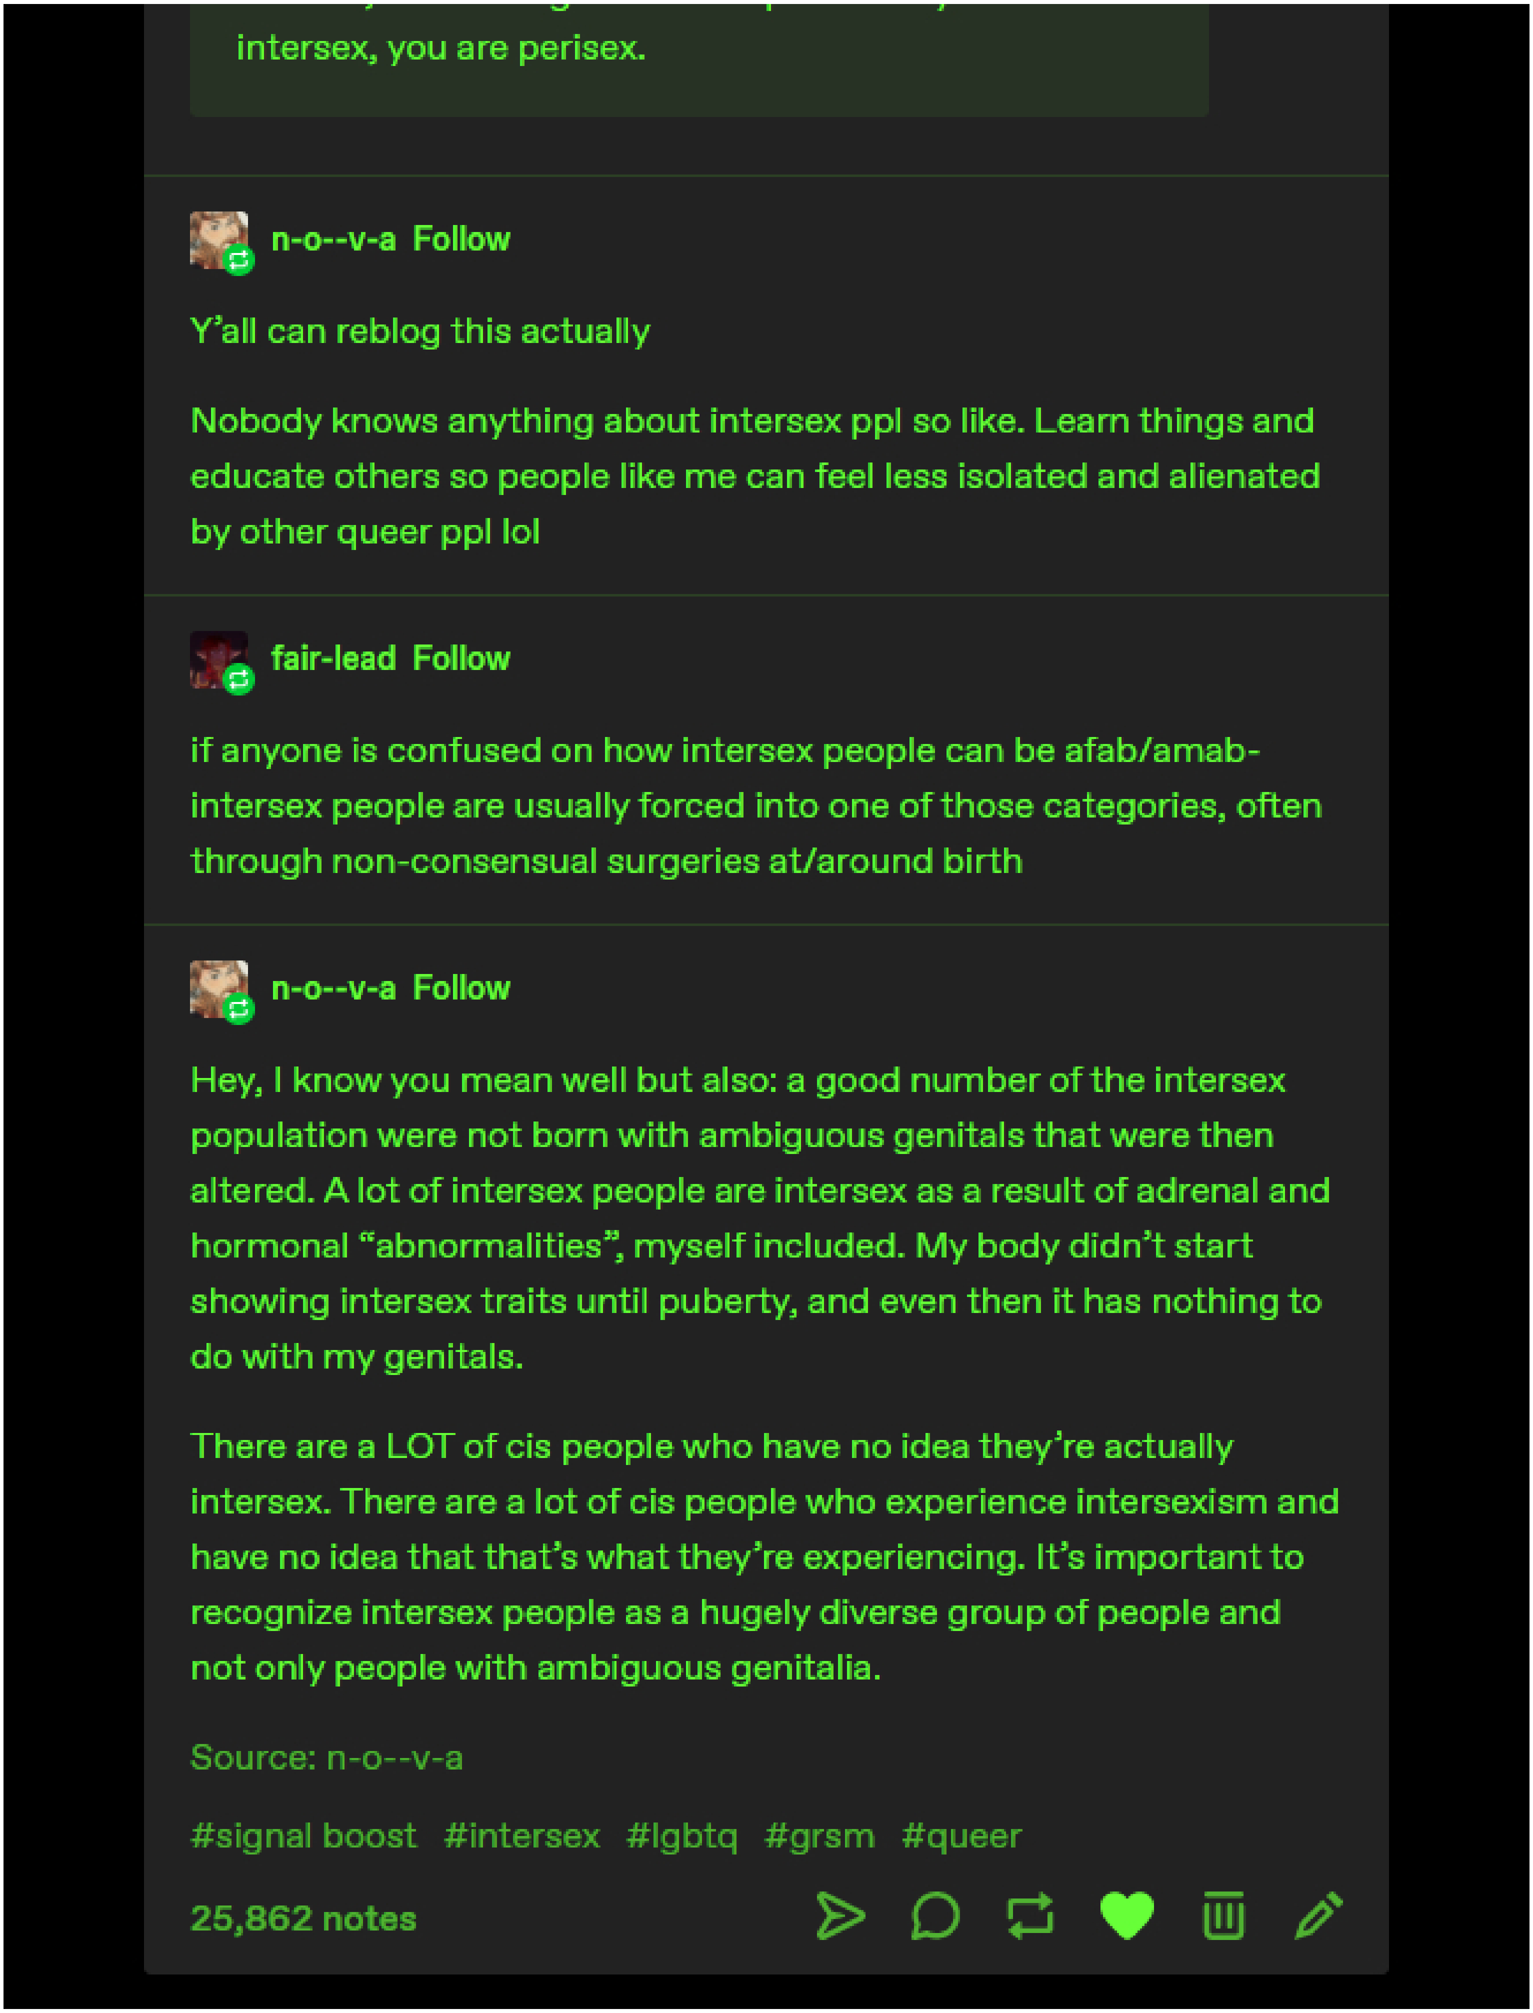
can you talk about being intersex and cis? how do you know if you're cis or trans when you're intersex? i promise this isn't meant to be rude i'm just a little confused as to how gender works when you're intersex. thank you so much.

n-o--v-a answered:

I'm cis because I'm afab and still identify as a woman. If I was afab and identified any other way, I'd be trans. I'm intersex because my body itself has a mixed bag of secondary sex characteristics and hormones.

The label "intersex" itself isn't a gender identity as much as it's a way for people with mixed or ambiguous sex characteristics to define that experience. There are cis men and women who are intersex, trans people of every kind as well. I'm sure there are intersex people who just identify as intersex entirely but most intersex people I've met still identify as male, female, or nonbinary. Because your body doesn't determine your gender identity.

Also, the opposite of intersex is perisex. You can be cis or trans, while being intersex or perisex. If you're not



intersex, you are perisex.

n-o--v-a Follow

Y'all can reblog this actually

Nobody knows anything about intersex ppl so like. Learn things and educate others so people like me can feel less isolated and alienated by other queer ppl lol

fair-lead Follow

if anyone is confused on how intersex people can be afab/amab- intersex people are usually forced into one of those categories, often through non-consensual surgeries at/around birth

n-o--v-a Follow

Hey, I know you mean well but also: a good number of the intersex population were not born with ambiguous genitals that were then altered. A lot of intersex people are intersex as a result of adrenal and hormonal "abnormalities", myself included. My body didn't start showing intersex traits until puberty, and even then it has nothing to do with my genitals.

There are a LOT of cis people who have no idea they're actually intersex. There are a lot of cis people who experience intersexism and have no idea that that's what they're experiencing. It's important to recognize intersex people as a hugely diverse group of people and not only people with ambiguous genitalia.

Barack Obama complaining abt getting friendzoned by a bi girl even tho he read Foucault to impress her is just too much. We don't need to know that.

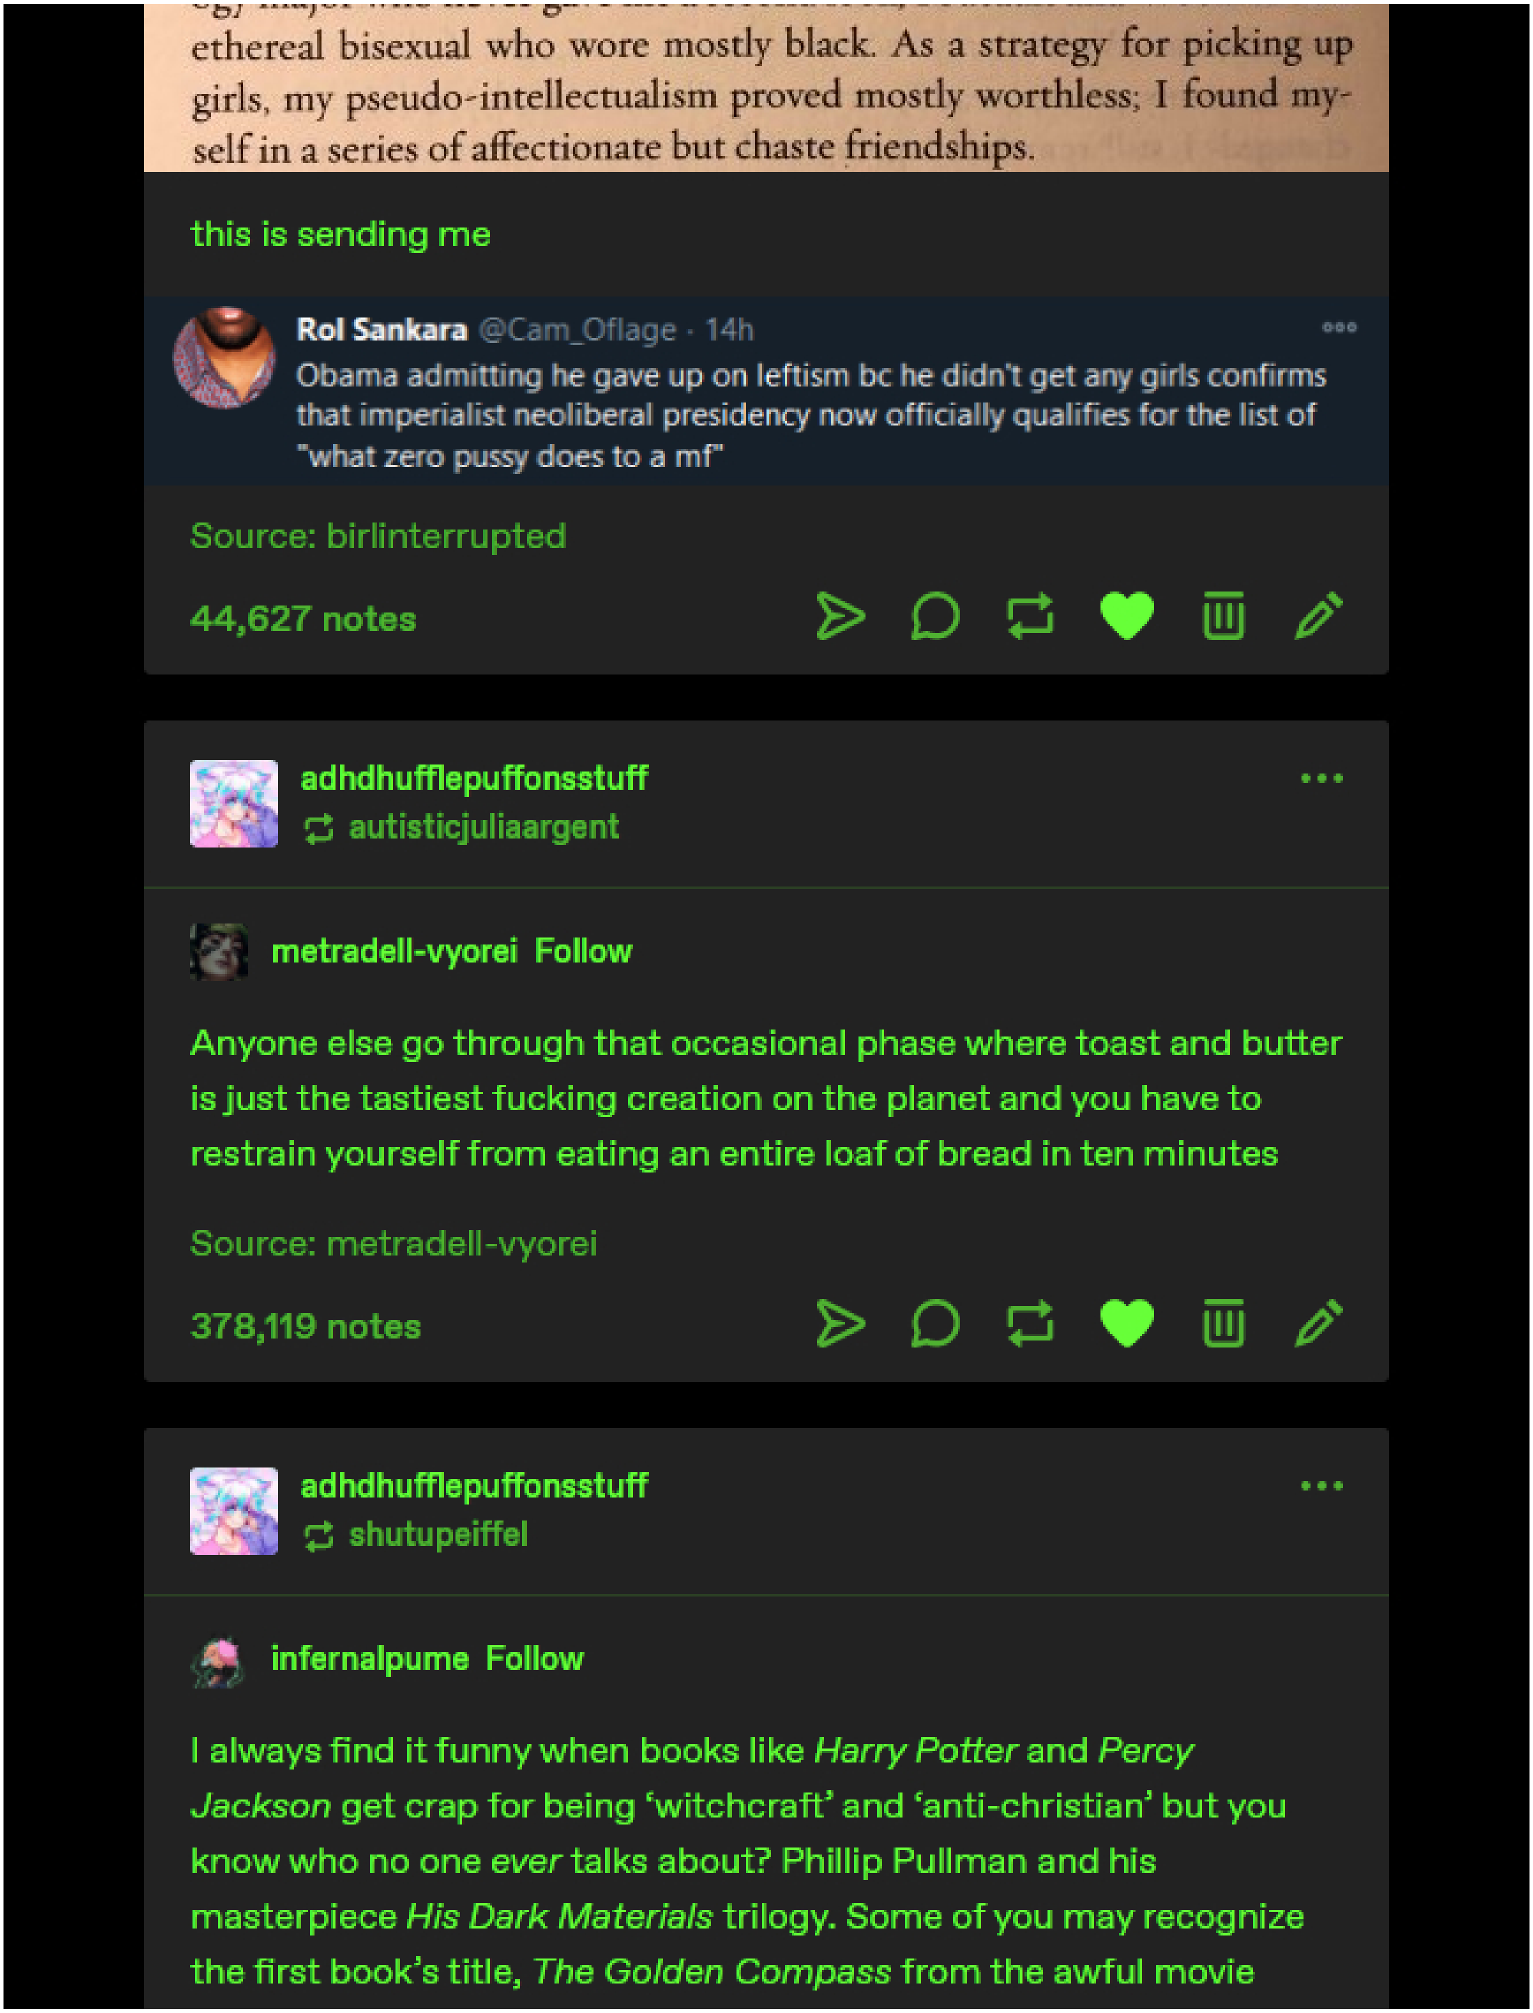
Looking back, it's embarrassing to recognize the degree to which my intellectual curiosity those first two years of college paralleled the interests of various women I was attempting to get to know: Marx and Marcuse so I had something to say to the long-legged socialist who lived in my dorm; Fanon and Gwendolyn Brooks for the smooth-skinned sociology major who never gave me a second look; Foucault and Woolf for the



ethereal bisexual who wore mostly black. As a strategy for picking up girls, my pseudo-intellectualism proved mostly worthless; I found myself in a series of affectionate but chaste friendships.

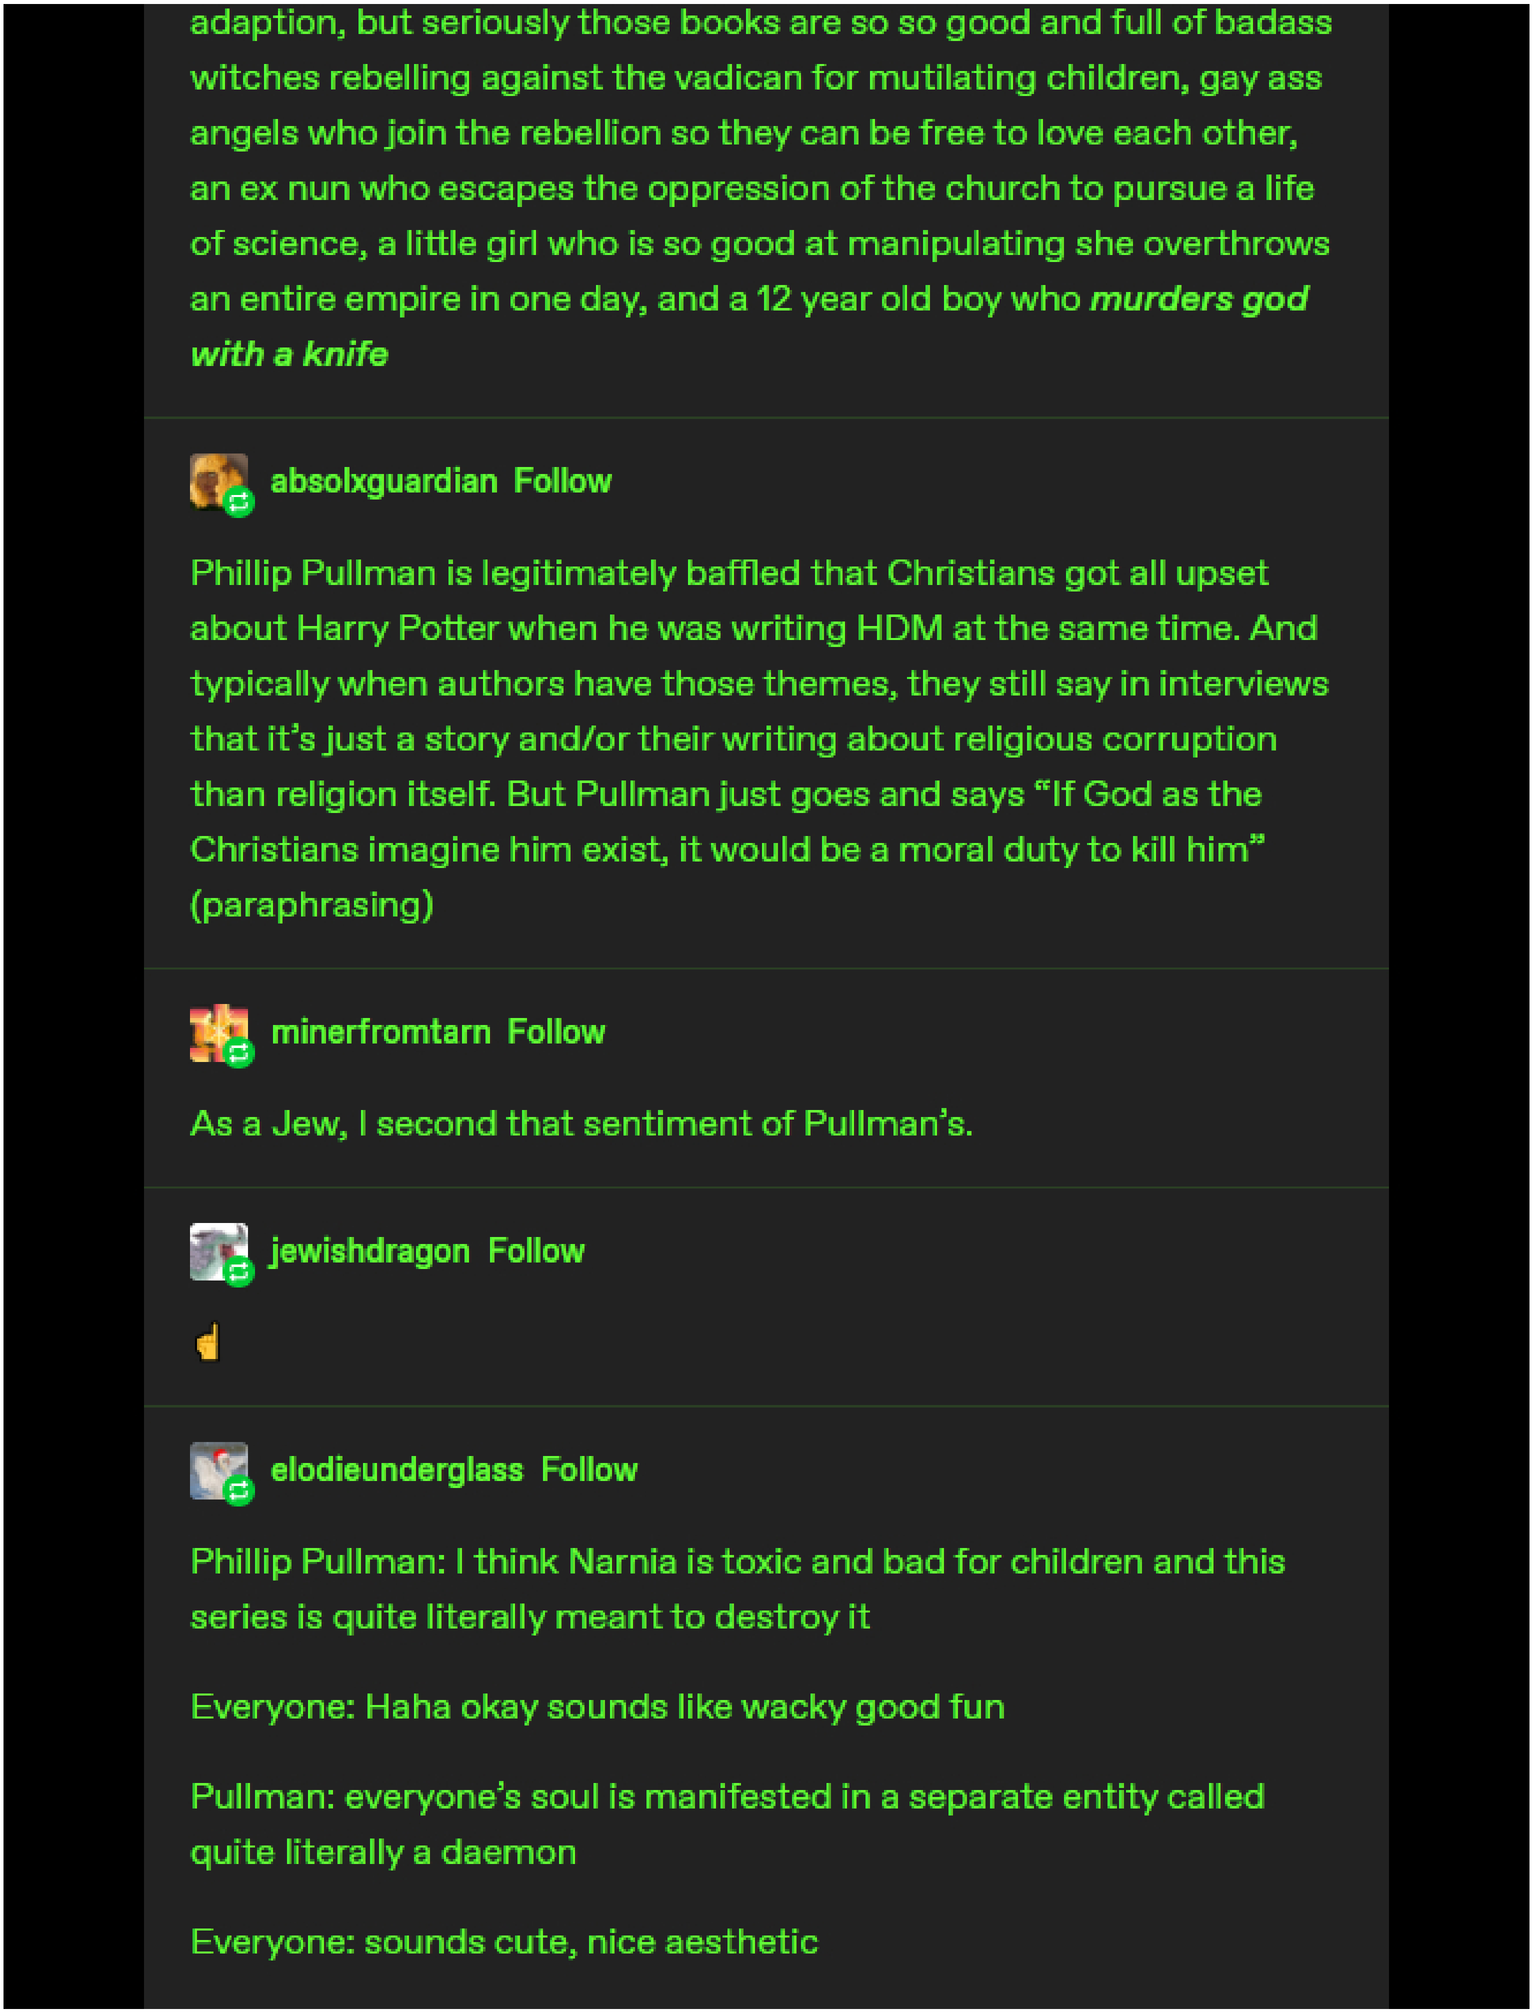
I always find it funny when books like *Harry Potter* and *Percy Jackson* get crap for being 'witchcraft' and 'anti-christian' but you know who no one *ever* talks about? Phillip Pullman and his masterpiece *His Dark Materials* trilogy. Some of you may recognize the first book's title, *The Golden Compass* from the awful movie



adaption, but seriously those books are so so good and full of badass witches rebelling against the vadican for mutilating children, gay ass angels who join the rebellion so they can be free to love each other, an ex nun who escapes the oppression of the church to pursue a life of science, a little girl who is so good at manipulating she overthrows an entire empire in one day, and a 12 year old boy who ***murders god with a knife***

absolxguardian **Follow**

Phillip Pullman is legitimately baffled that Christians got all upset about Harry Potter when he was writing HDM at the same time. And typically when authors have those themes, they still say in interviews that it's just a story and/or their writing about religious corruption than religion itself. But Pullman just goes and says "If God as the Christians imagine him exist, it would be a moral duty to kill him" (paraphrasing)

As a Jew, I second that sentiment of Pullman's.

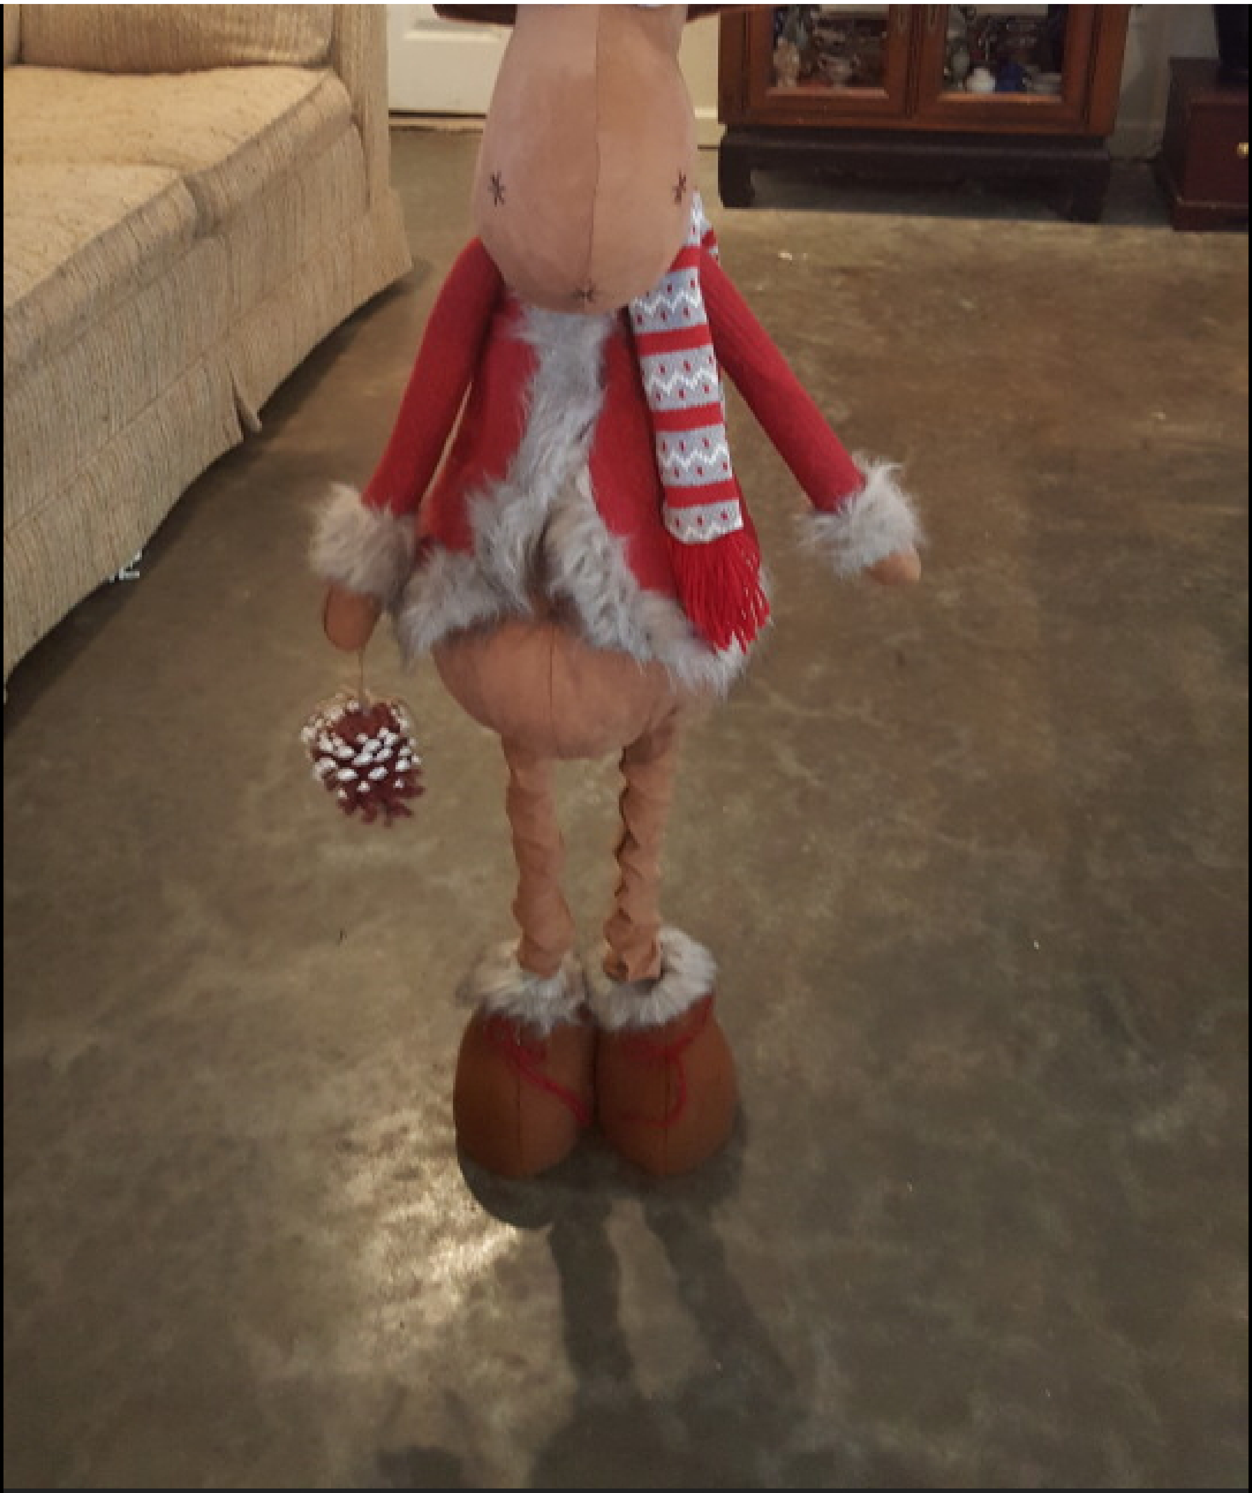
My autistic brother created a new family Christmas tradition

Okay, so last year, my mom bought this Christmas moose that she lovingly named Barry

This is him

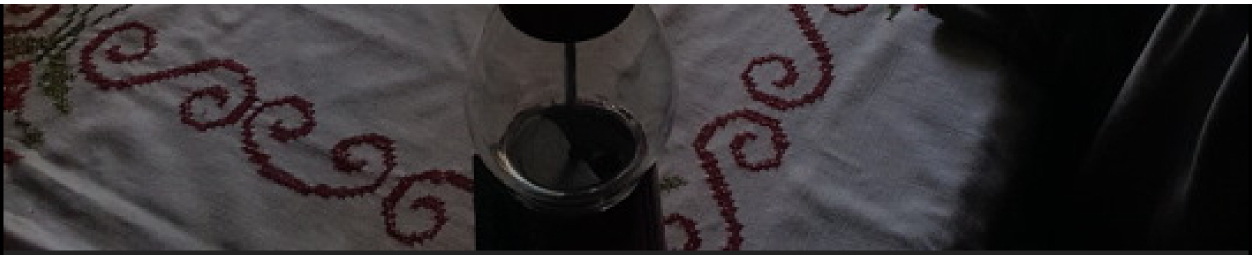


Cute, right?

Well, for whatever reason only known to my brother, he decided that he wanted to put Barry in different rooms of our house and it usually scares the shit out of whomever happens upon Barry; usually the person who finds him is the person that my brother wanted to scare.

So far, Barry has been found

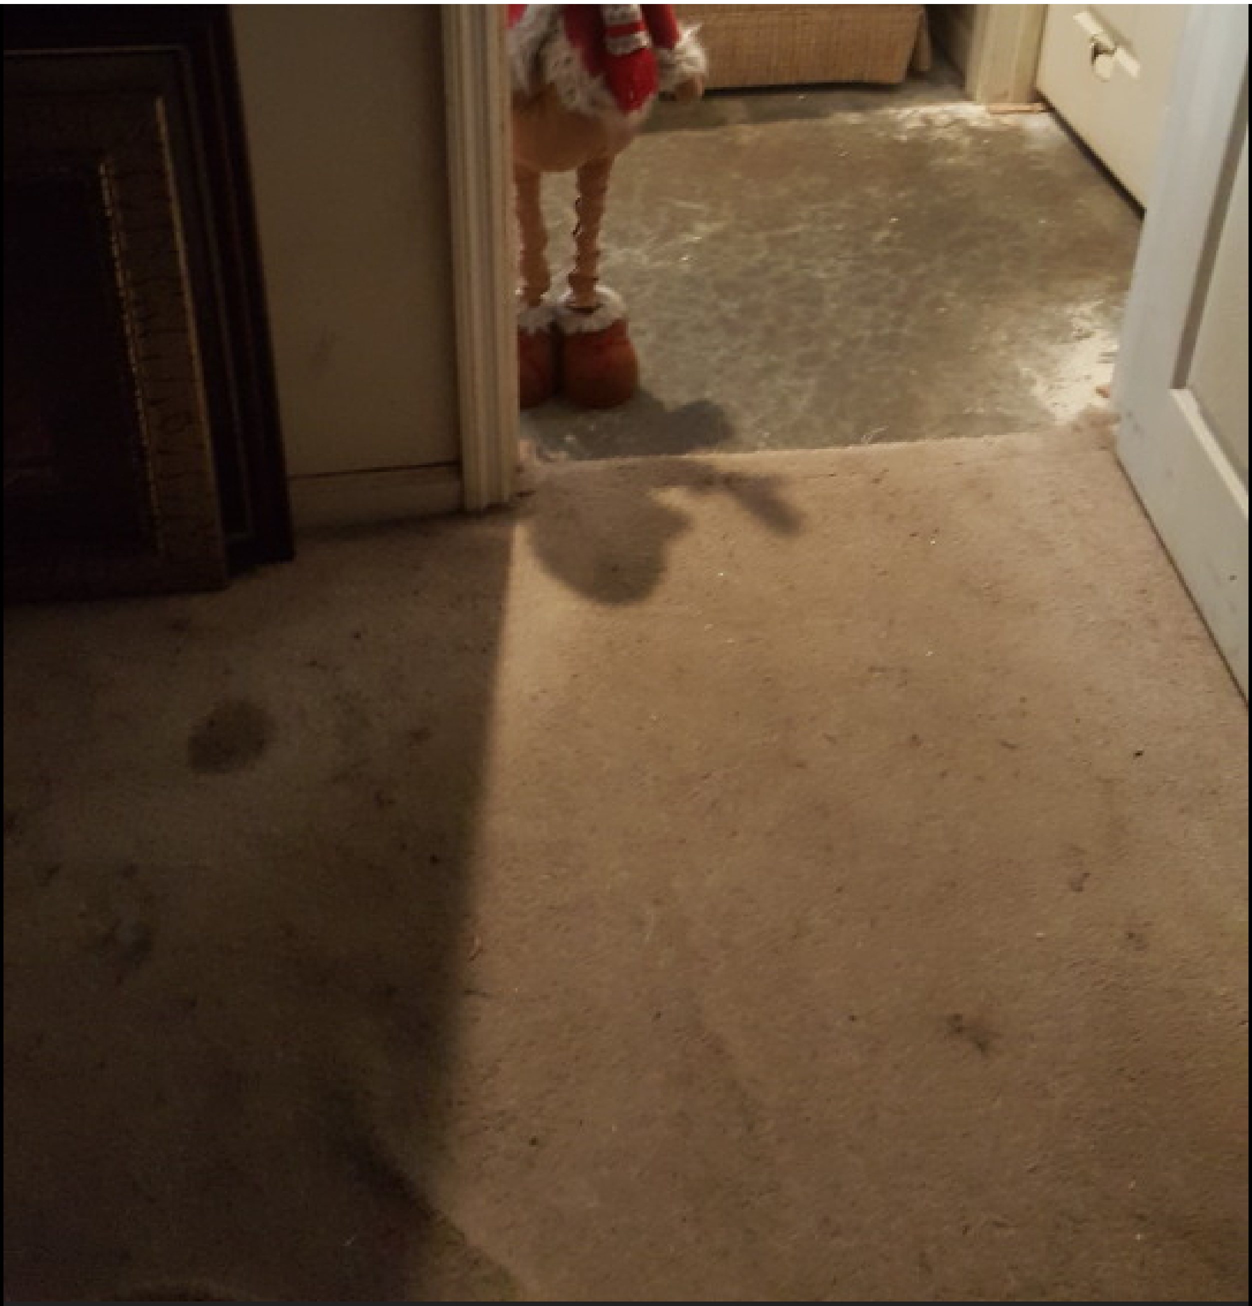
On our dining room table



On my dad's side of my parents' bed

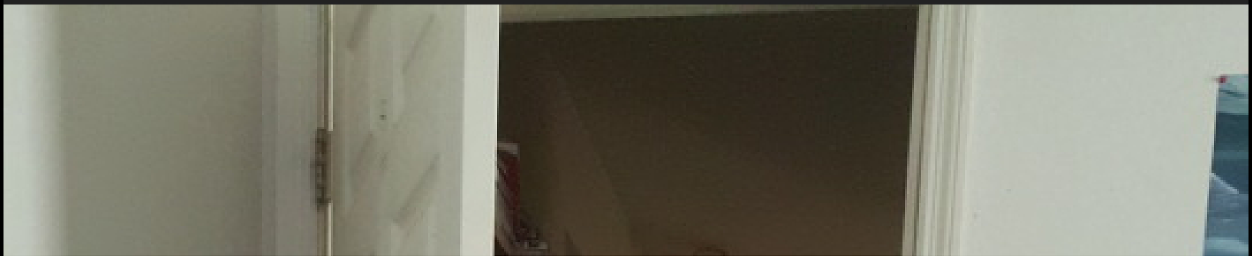
In my parents' closet

Outside their bedroom door (at 5 in the morning and scared my mother shitless)



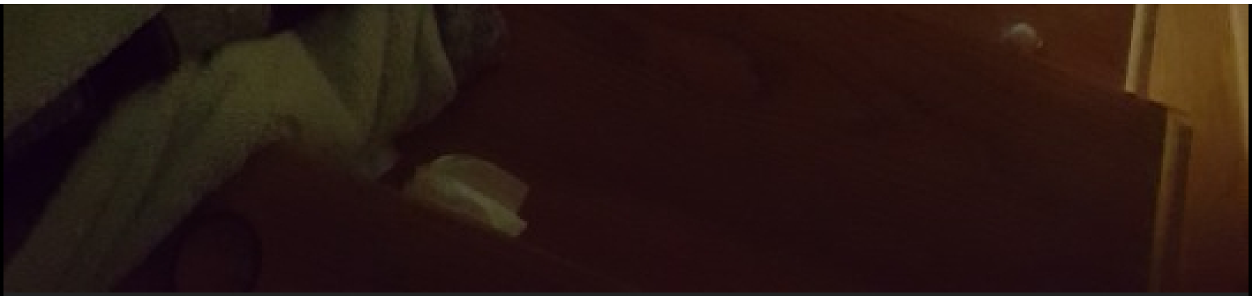
Near the kitchen door

Near my fucking bed

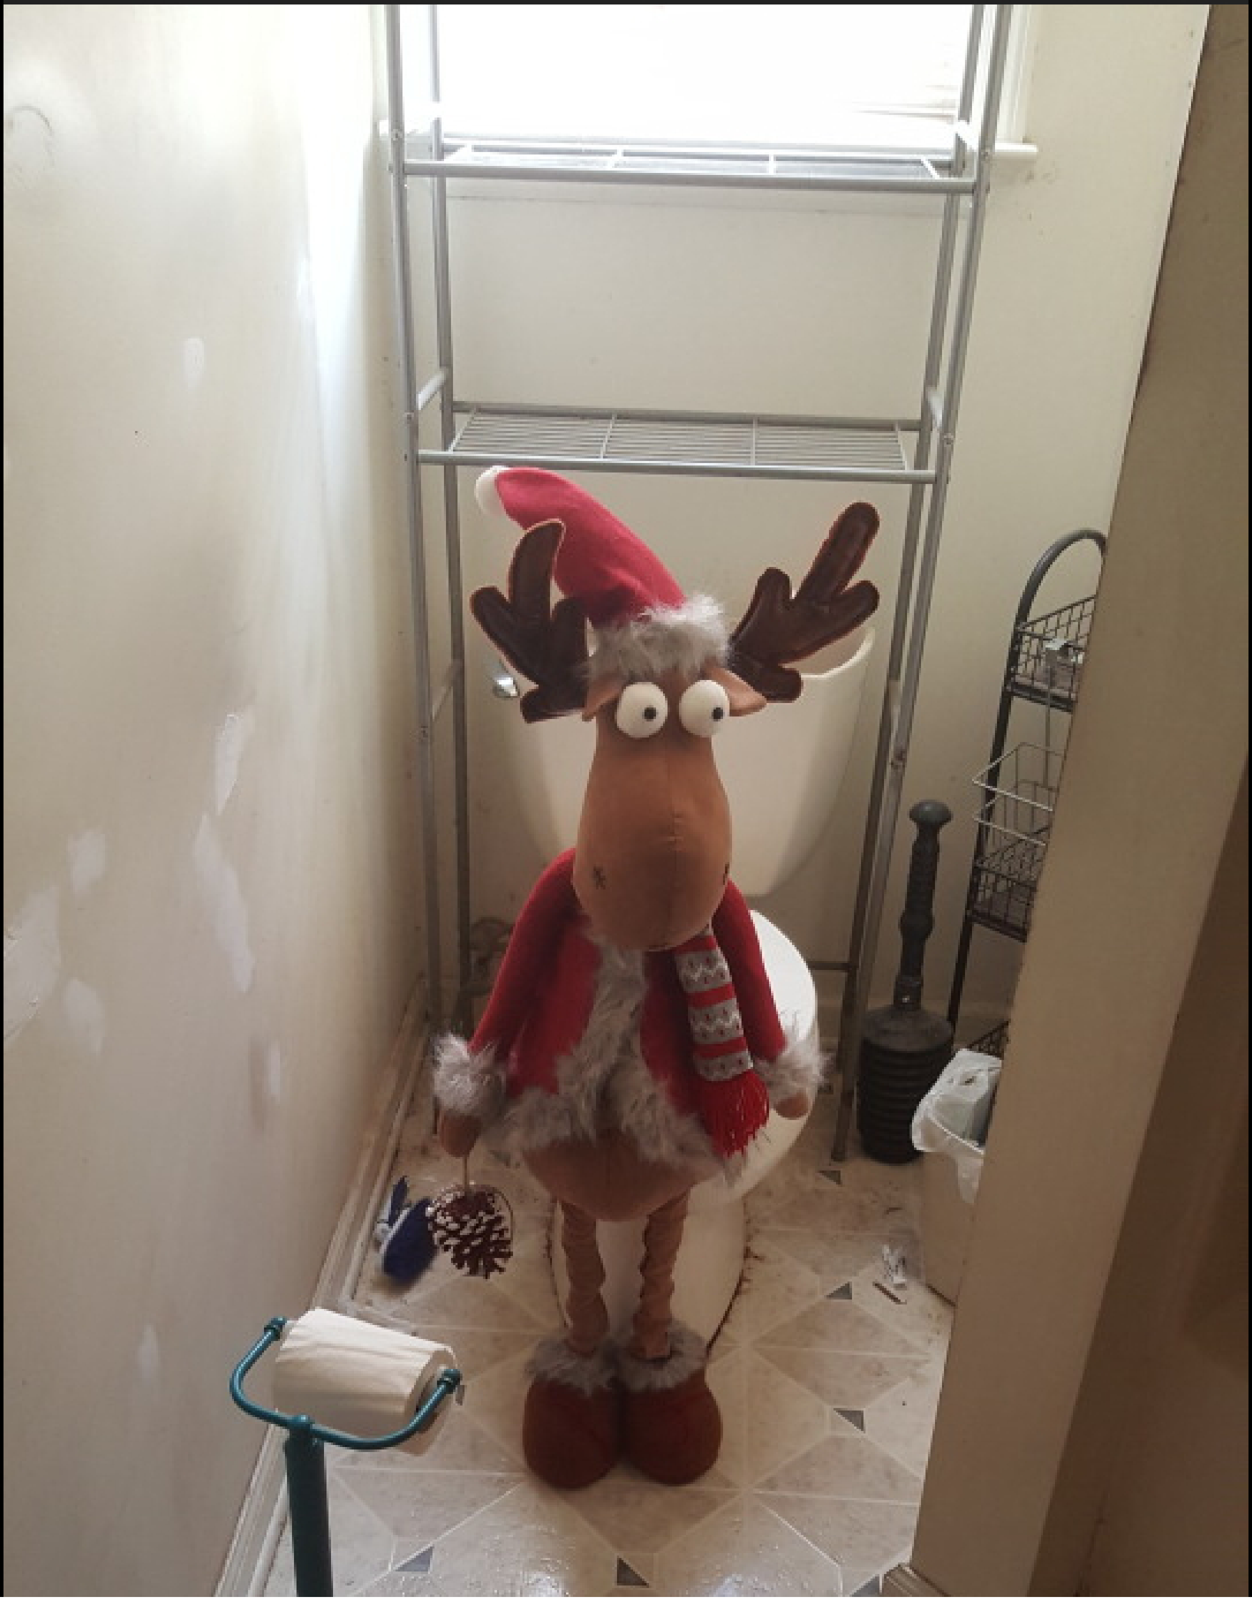


JINX
RB

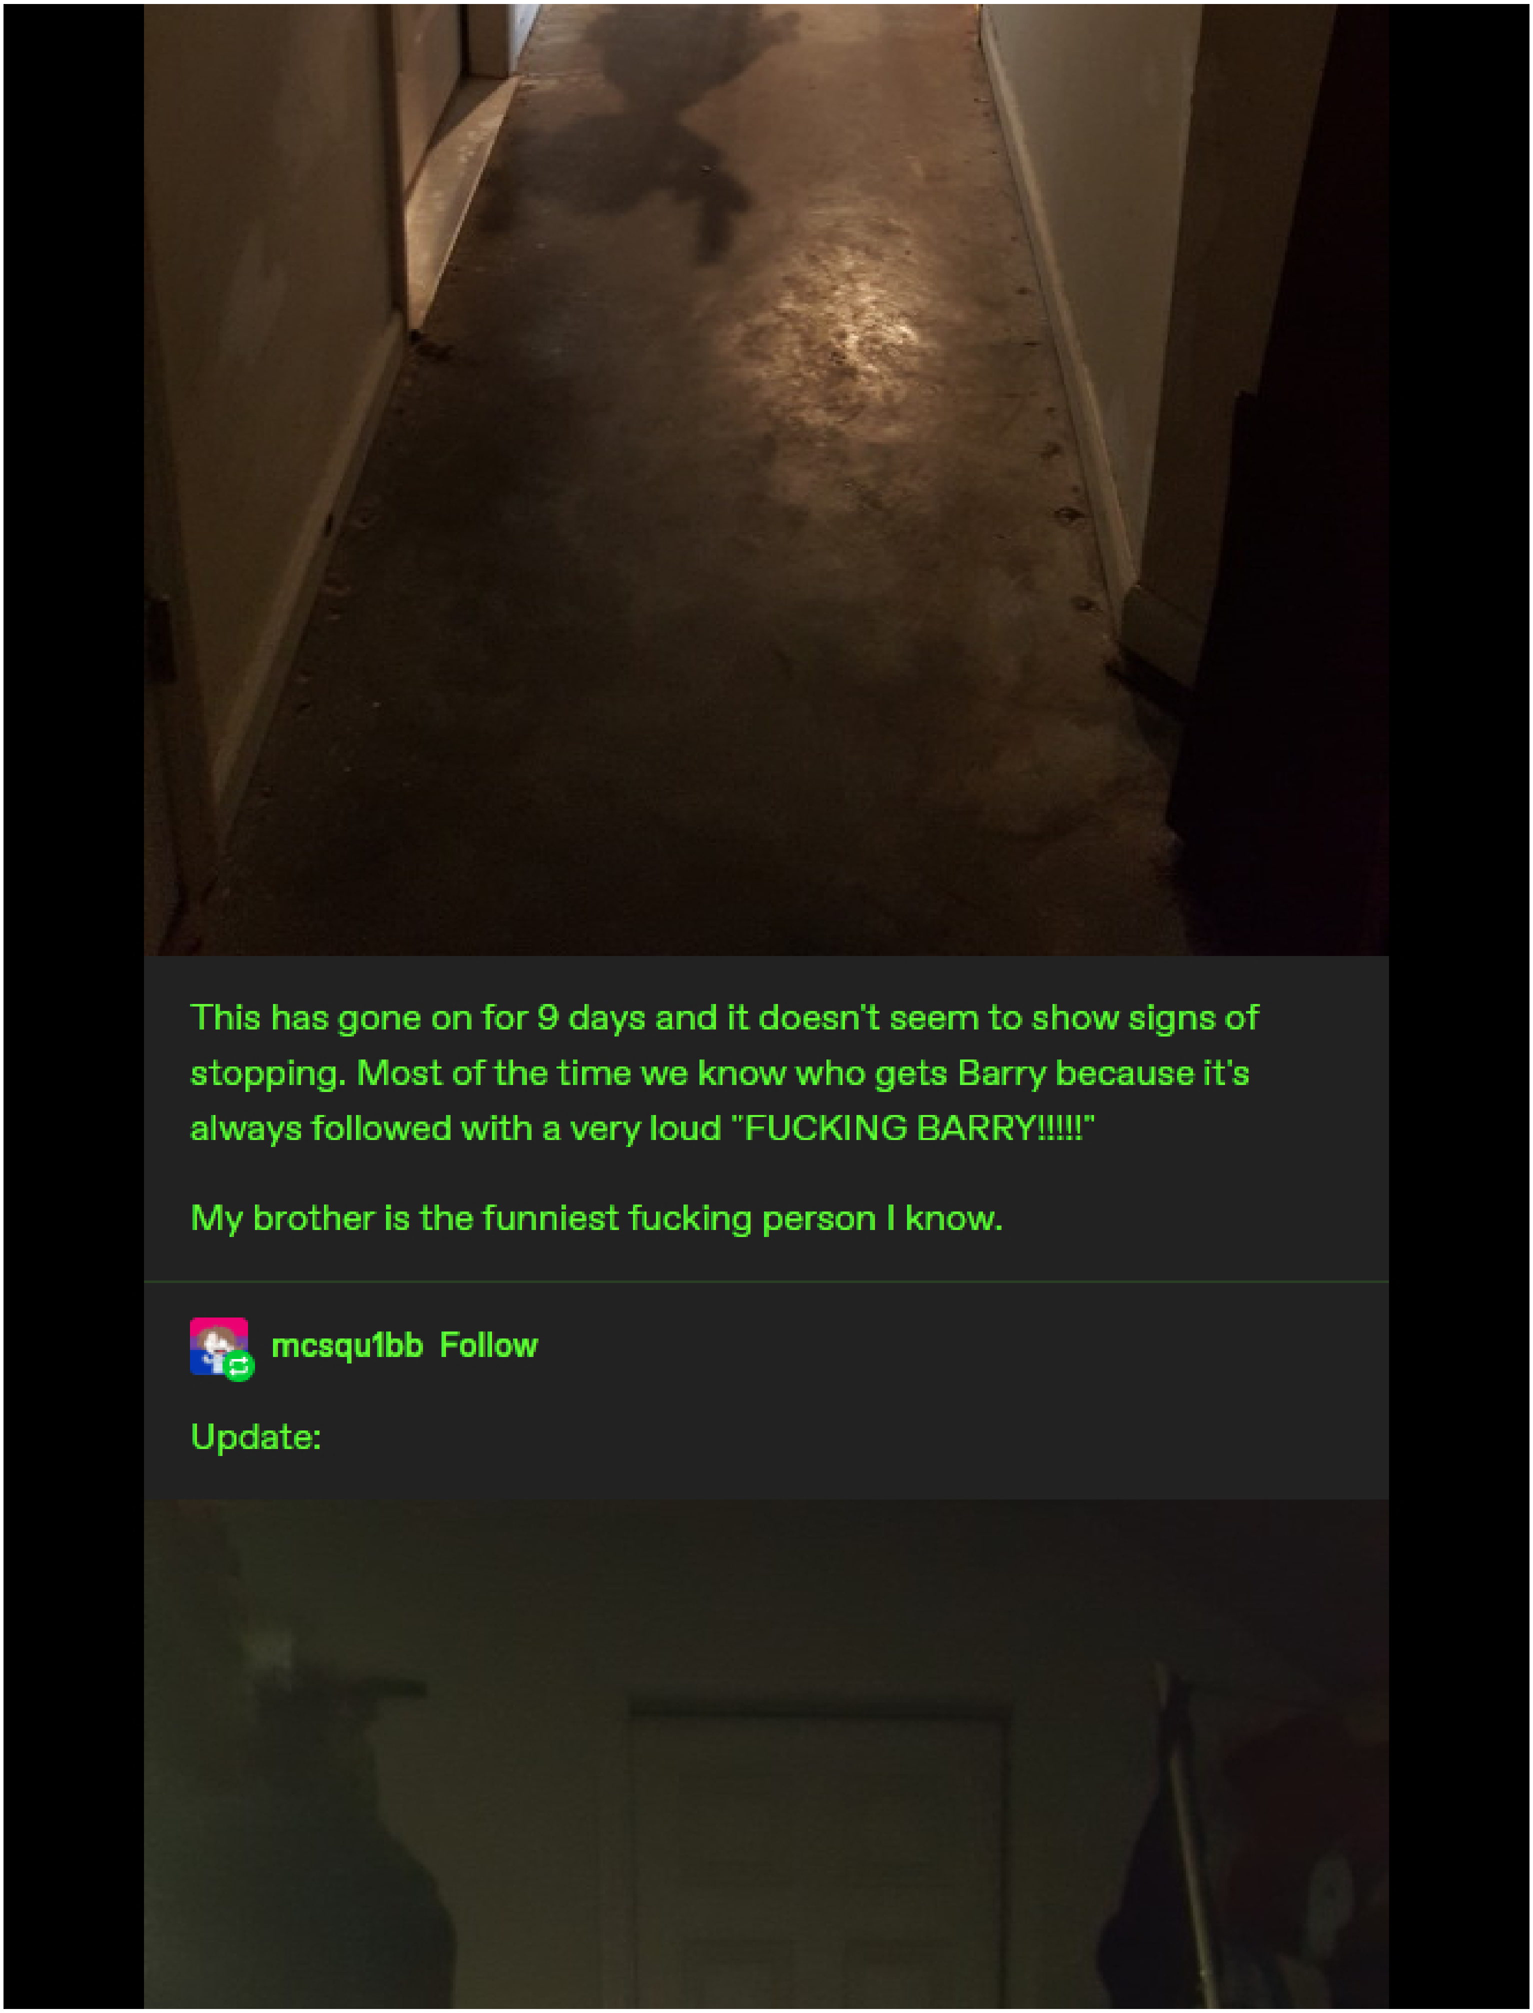
At the bottom of my sister's stairwell



In our bathroom



And down the hallway



This has gone on for 9 days and it doesn't seem to show signs of stopping. Most of the time we know who gets Barry because it's always followed with a very loud "FUCKING BARRY!!!!!"

My brother is the funniest fucking person I know.

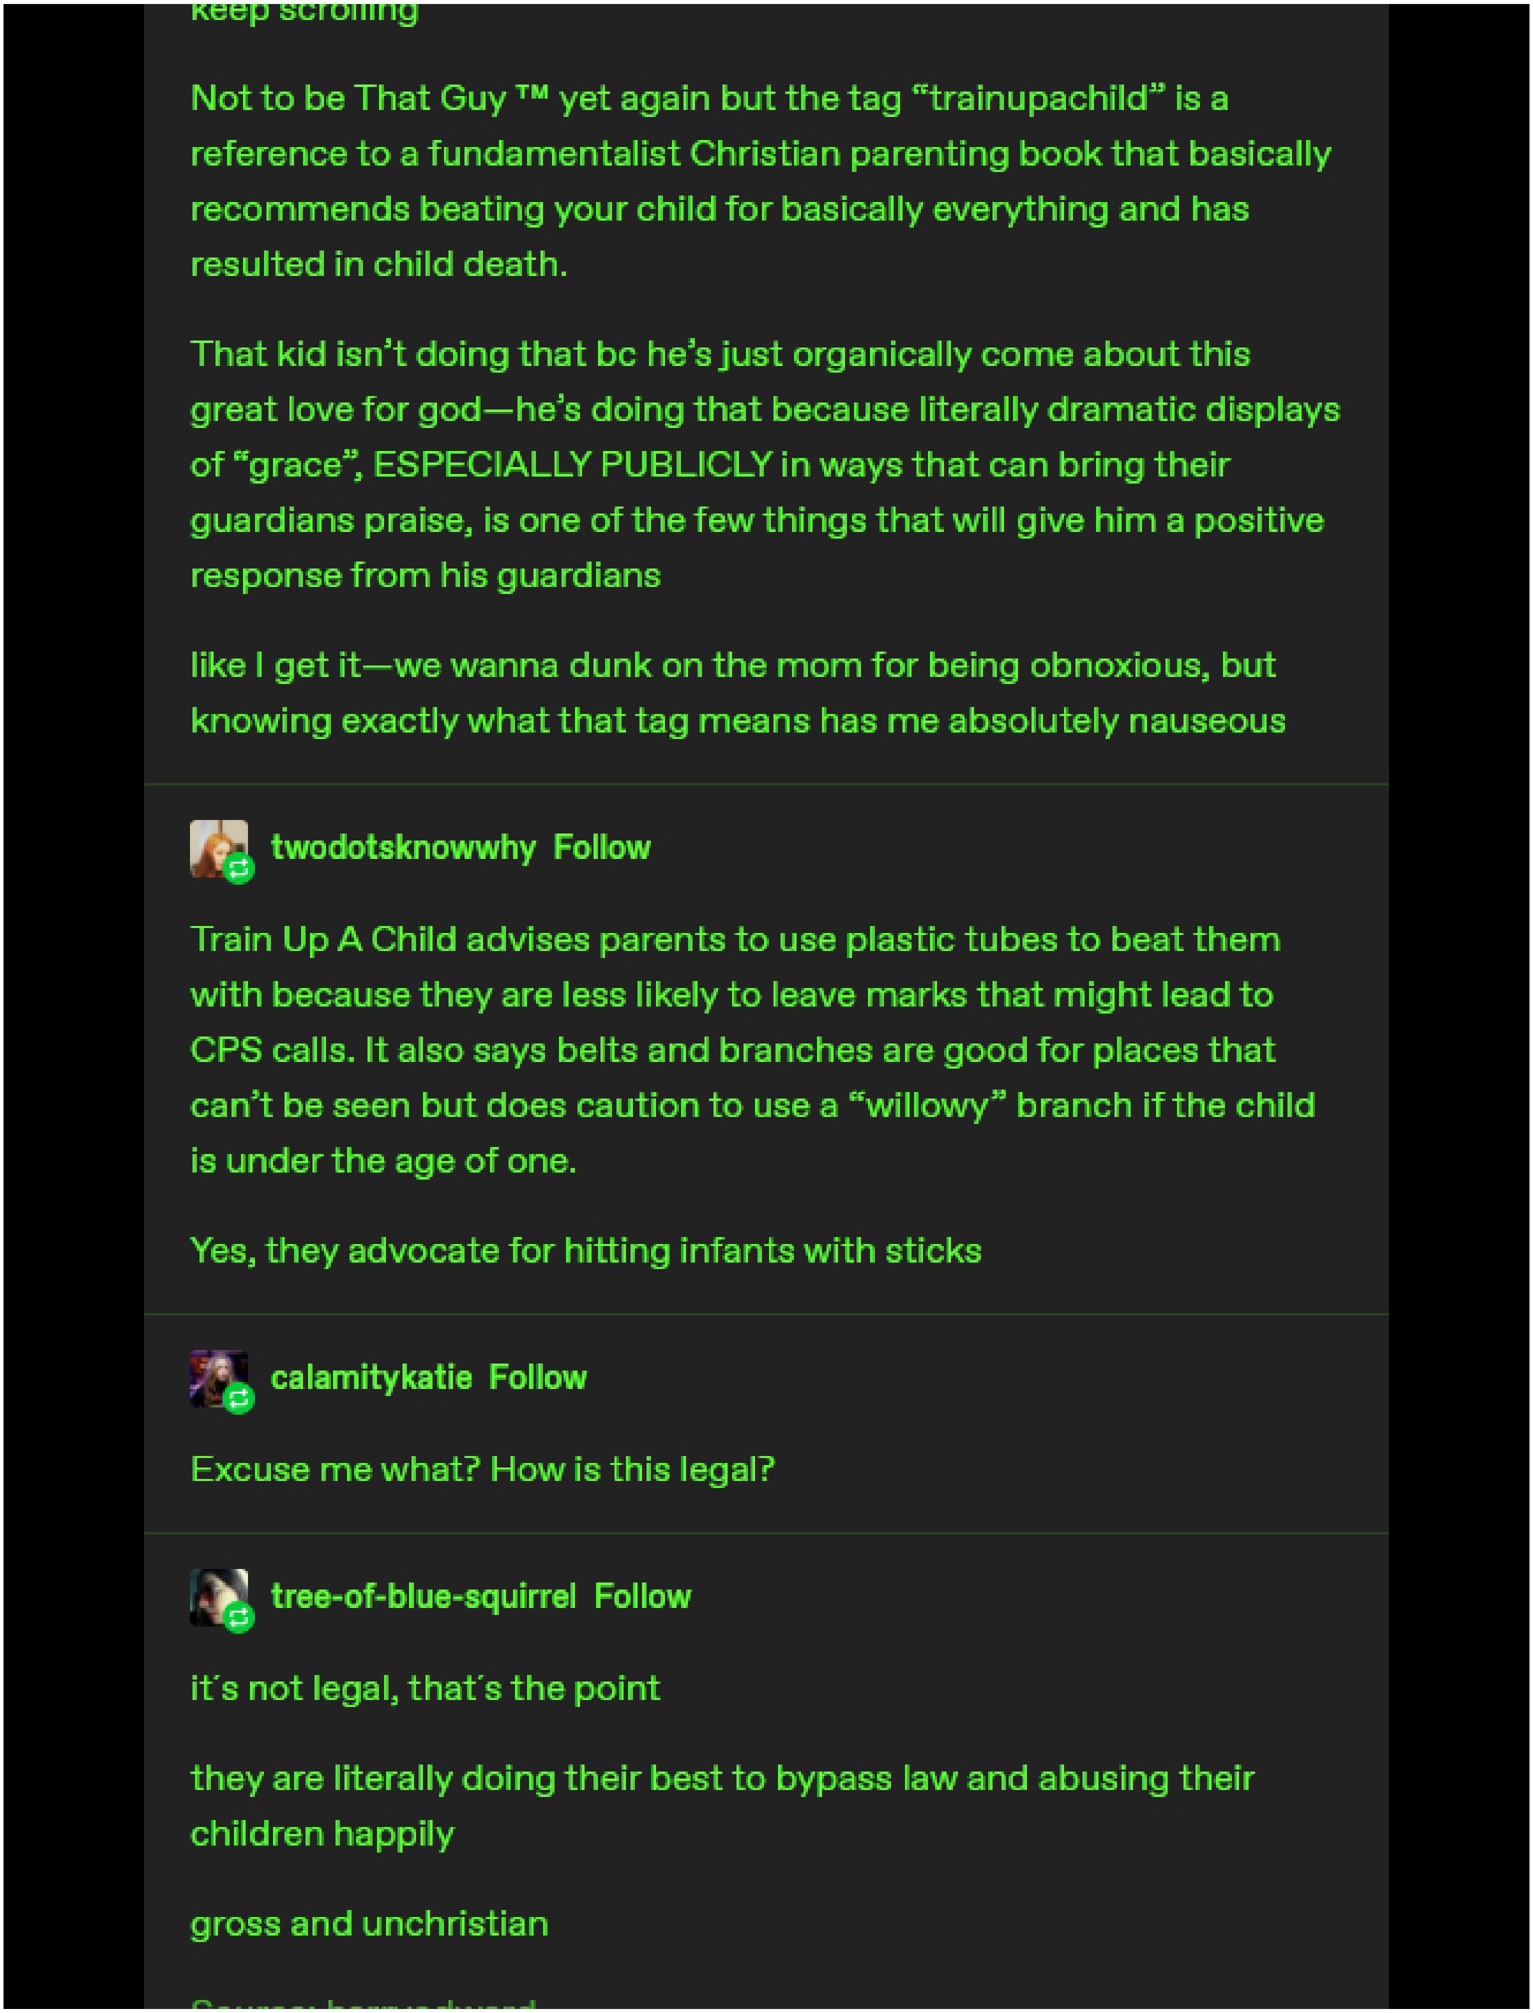
Hey I'm abt to talk abt religious child abuse so if you're not up for that



keep scrolling

Not to be That Guy ™ yet again but the tag “trainupachild” is a reference to a fundamentalist Christian parenting book that basically recommends beating your child for basically everything and has resulted in child death.

That kid isn’t doing that bc he’s just organically come about this great love for god—he’s doing that because literally dramatic displays of “grace”, ESPECIALLY PUBLICLY in ways that can bring their guardians praise, is one of the few things that will give him a positive response from his guardians

like I get it—we wanna dunk on the mom for being obnoxious, but knowing exactly what that tag means has me absolutely nauseous

twodotsknowwhy **Follow**

Train Up A Child advises parents to use plastic tubes to beat them with because they are less likely to leave marks that might lead to CPS calls. It also says belts and branches are good for places that can’t be seen but does caution to use a “willowy” branch if the child is under the age of one.

Yes, they advocate for hitting infants with sticks

BBC's new Dracula is 'bi-homicidal' not bisexual, says co-writer Steven Moffat

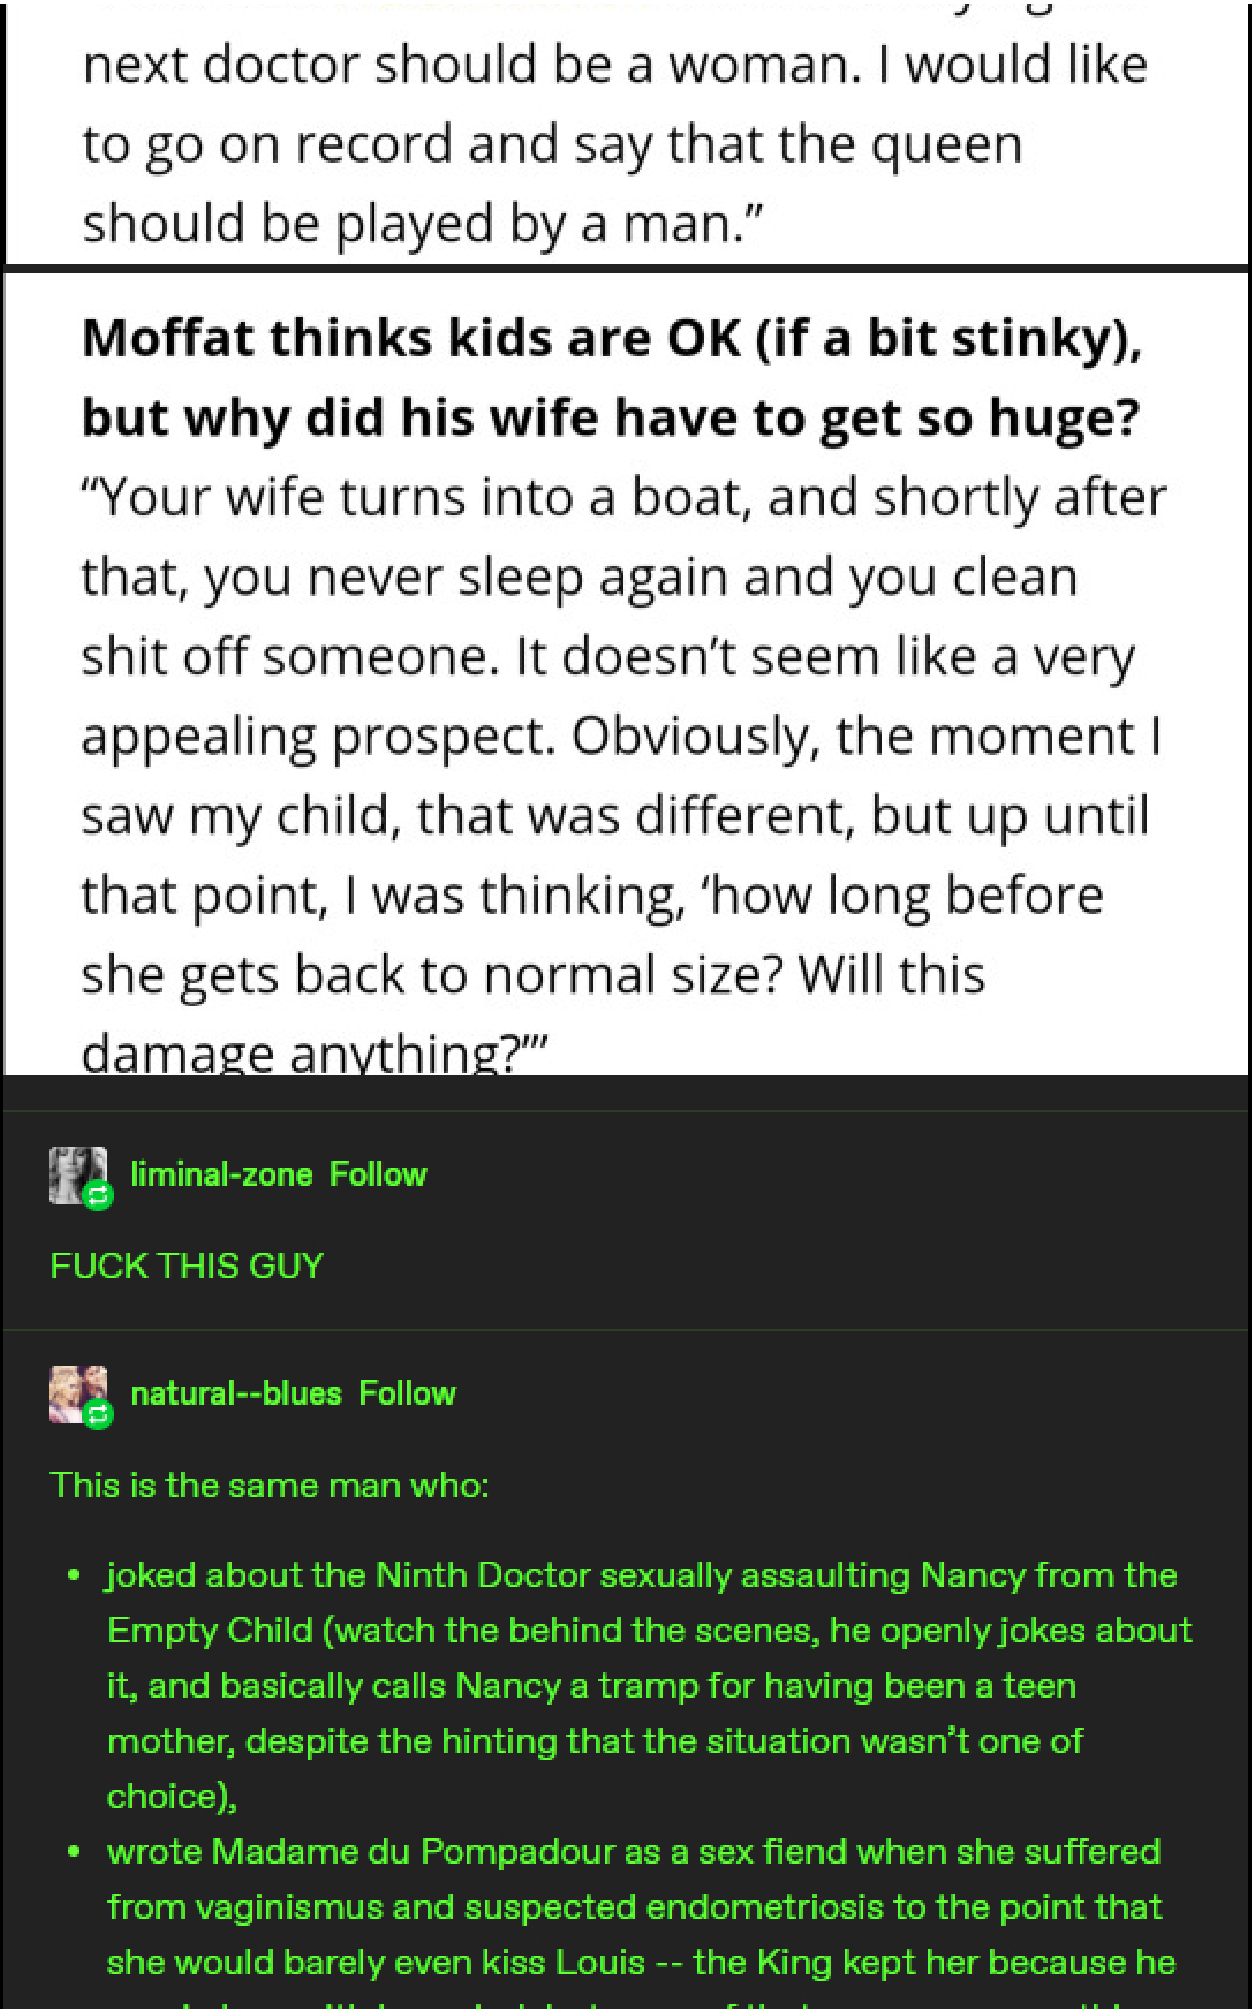
Series co-creator clears up speculation about character's sexuality

Hi hello could we please make sure that no one watches this and that it flops. Moffat can't get back on his bullshit in 2020 let's all leave him back in the 10s thank you very much.

Just a few reminders

"There's this issue you're not allowed to discuss: that women are needy. Men can go for longer, more happily, without women. That's the truth. We don't, as little boys, play at being married – we try to avoid it for as long as possible. Meanwhile women are out there hunting for husbands."

"I like that Helen Mirren has been saving the



next doctor should be a woman. I would like to go on record and say that the queen should be played by a man."

Moffat thinks kids are OK (if a bit stinky), but why did his wife have to get so huge?
"Your wife turns into a boat, and shortly after that, you never sleep again and you clean shit off someone. It doesn't seem like a very appealing prospect. Obviously, the moment I saw my child, that was different, but up until that point, I was thinking, 'how long before she gets back to normal size? Will this damage anything?'"

This is the same man who:

- joked about the Ninth Doctor sexually assaulting Nancy from the Empty Child (watch the behind the scenes, he openly jokes about it, and basically calls Nancy a tramp for having been a teen mother, despite the hinting that the situation wasn't one of choice),
- wrote Madame du Pompadour as a sex fiend when she suffered from vaginismus and suspected endometriosis to the point that she would barely even kiss Louis -- the King kept her because he

was in love with her mind, but none of that came across -- this would be a fact the Doctor knew well, because he fucking reads,

- said if RTD hadn't put Rose in another Universe he would have killed her off because she was not classy enough or good enough to be the Doctor's wife,
- said Rose was the sort of character you were shocked wasn’t teen pregnant but had clearly been around,
- said he chose Karen Gillan for Amy when he saw her in the hallway, and she was more attractive and skinny than the actress that had hit the mark in her audition
- calls women he finds unattractive ‘dumpy’
- is fatphobic
- is racist
- is homophobic
- is misogynist
- joked about Rose’s abusive ex boyfriend ‘’just being sick of her’’
- joked that her being lost to Pete's World was "convenient" for the Doctor, so his cloying needy girlfriend could be gone from him,
- said that the most romantic part of the Time Traveller’s Wife, the problematic book that he based River Song off of, was when she purposefully met the Time Traveller before he ever met her so that she could lie about him marrying her and make it so that he purposefully continued meeting her thinking she was his wife out of love -- and. look. what. he. wrote, he literally said “if you watch it, you’ll see that he never actually married her, River isn’t the Doctor’s wife but he just lets her think she is”
- said the part in the Time Traveller’s Wife where she had sex with him before his vasectomy so she could get pregnant by him despite his insistence to her that he didn't want children ever is ‘so women, right?’
- is rumoured to have been handsy on set with his female actresses,
- made multiple comments about how women try to trap men
- wrote a scene where the Doctor forces a kiss from a lesbian woman
- joked about Amy Pond not being as sexy if she was poc
- joked about how the Doctor was supposed to save the universe if

- joked about how the Doctor was supposed to save the universe if she was menstruating
- made abrasive comments about Jodie being cast as the Doctor
- called David Tennant 'overrated'
- made all of his actors sign an agreement that they could never reprise their roles on DW without his express permission
- joked about asexuality not existing re: sherlock, saying it was an excuse
- said he only casts female actresses that he finds attractive
- called his wife a whale and said she deals with everything to do with the kids because that's her job
- joked about bisexual people being selfish
- joked about lesbians still liking men

He was the worst thing to come to Doctor Who, and the amount of people who defended him as "well he was just kidding!" split the fandom. This man is a crusty old bigot who is way too high on himself. Do not support him, don't watch his stupid shows, he doesn't deserve the money.

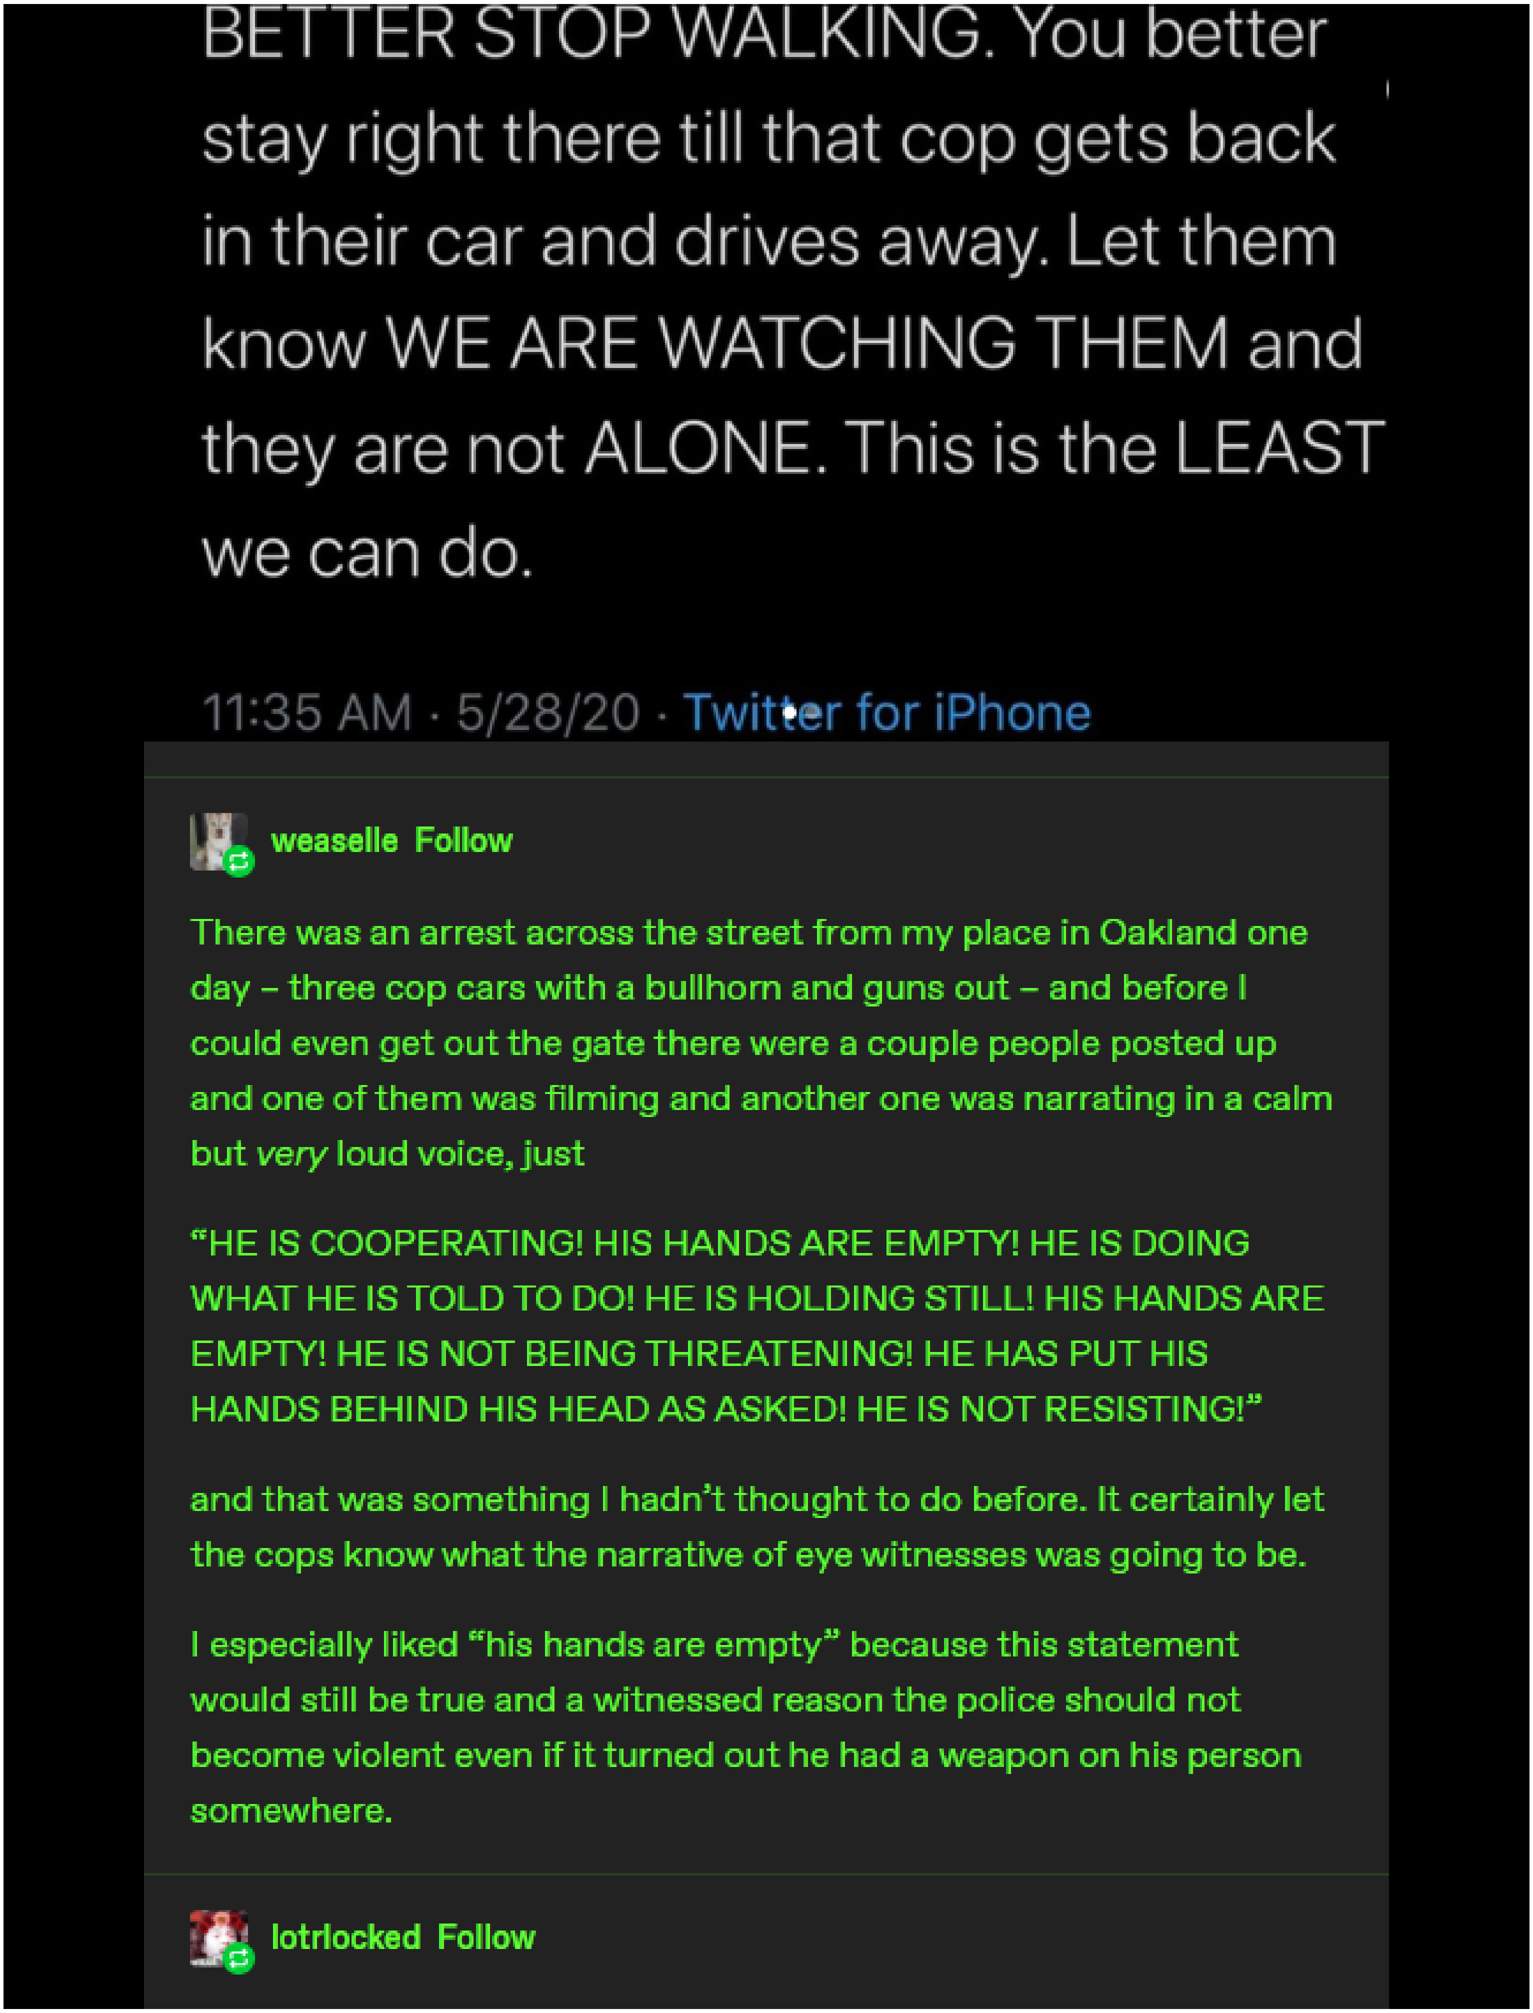
DEAR.ALL.PEOPLE.

If you see a cop talking to any African American person, I KNOW YOU



BETTER STOP WALKING. You better stay right there till that cop gets back in their car and drives away. Let them know WE ARE WATCHING THEM and they are not ALONE. This is the LEAST we can do.

11:35 AM · 5/28/20 · Twitter for iPhone

weaselle Follow

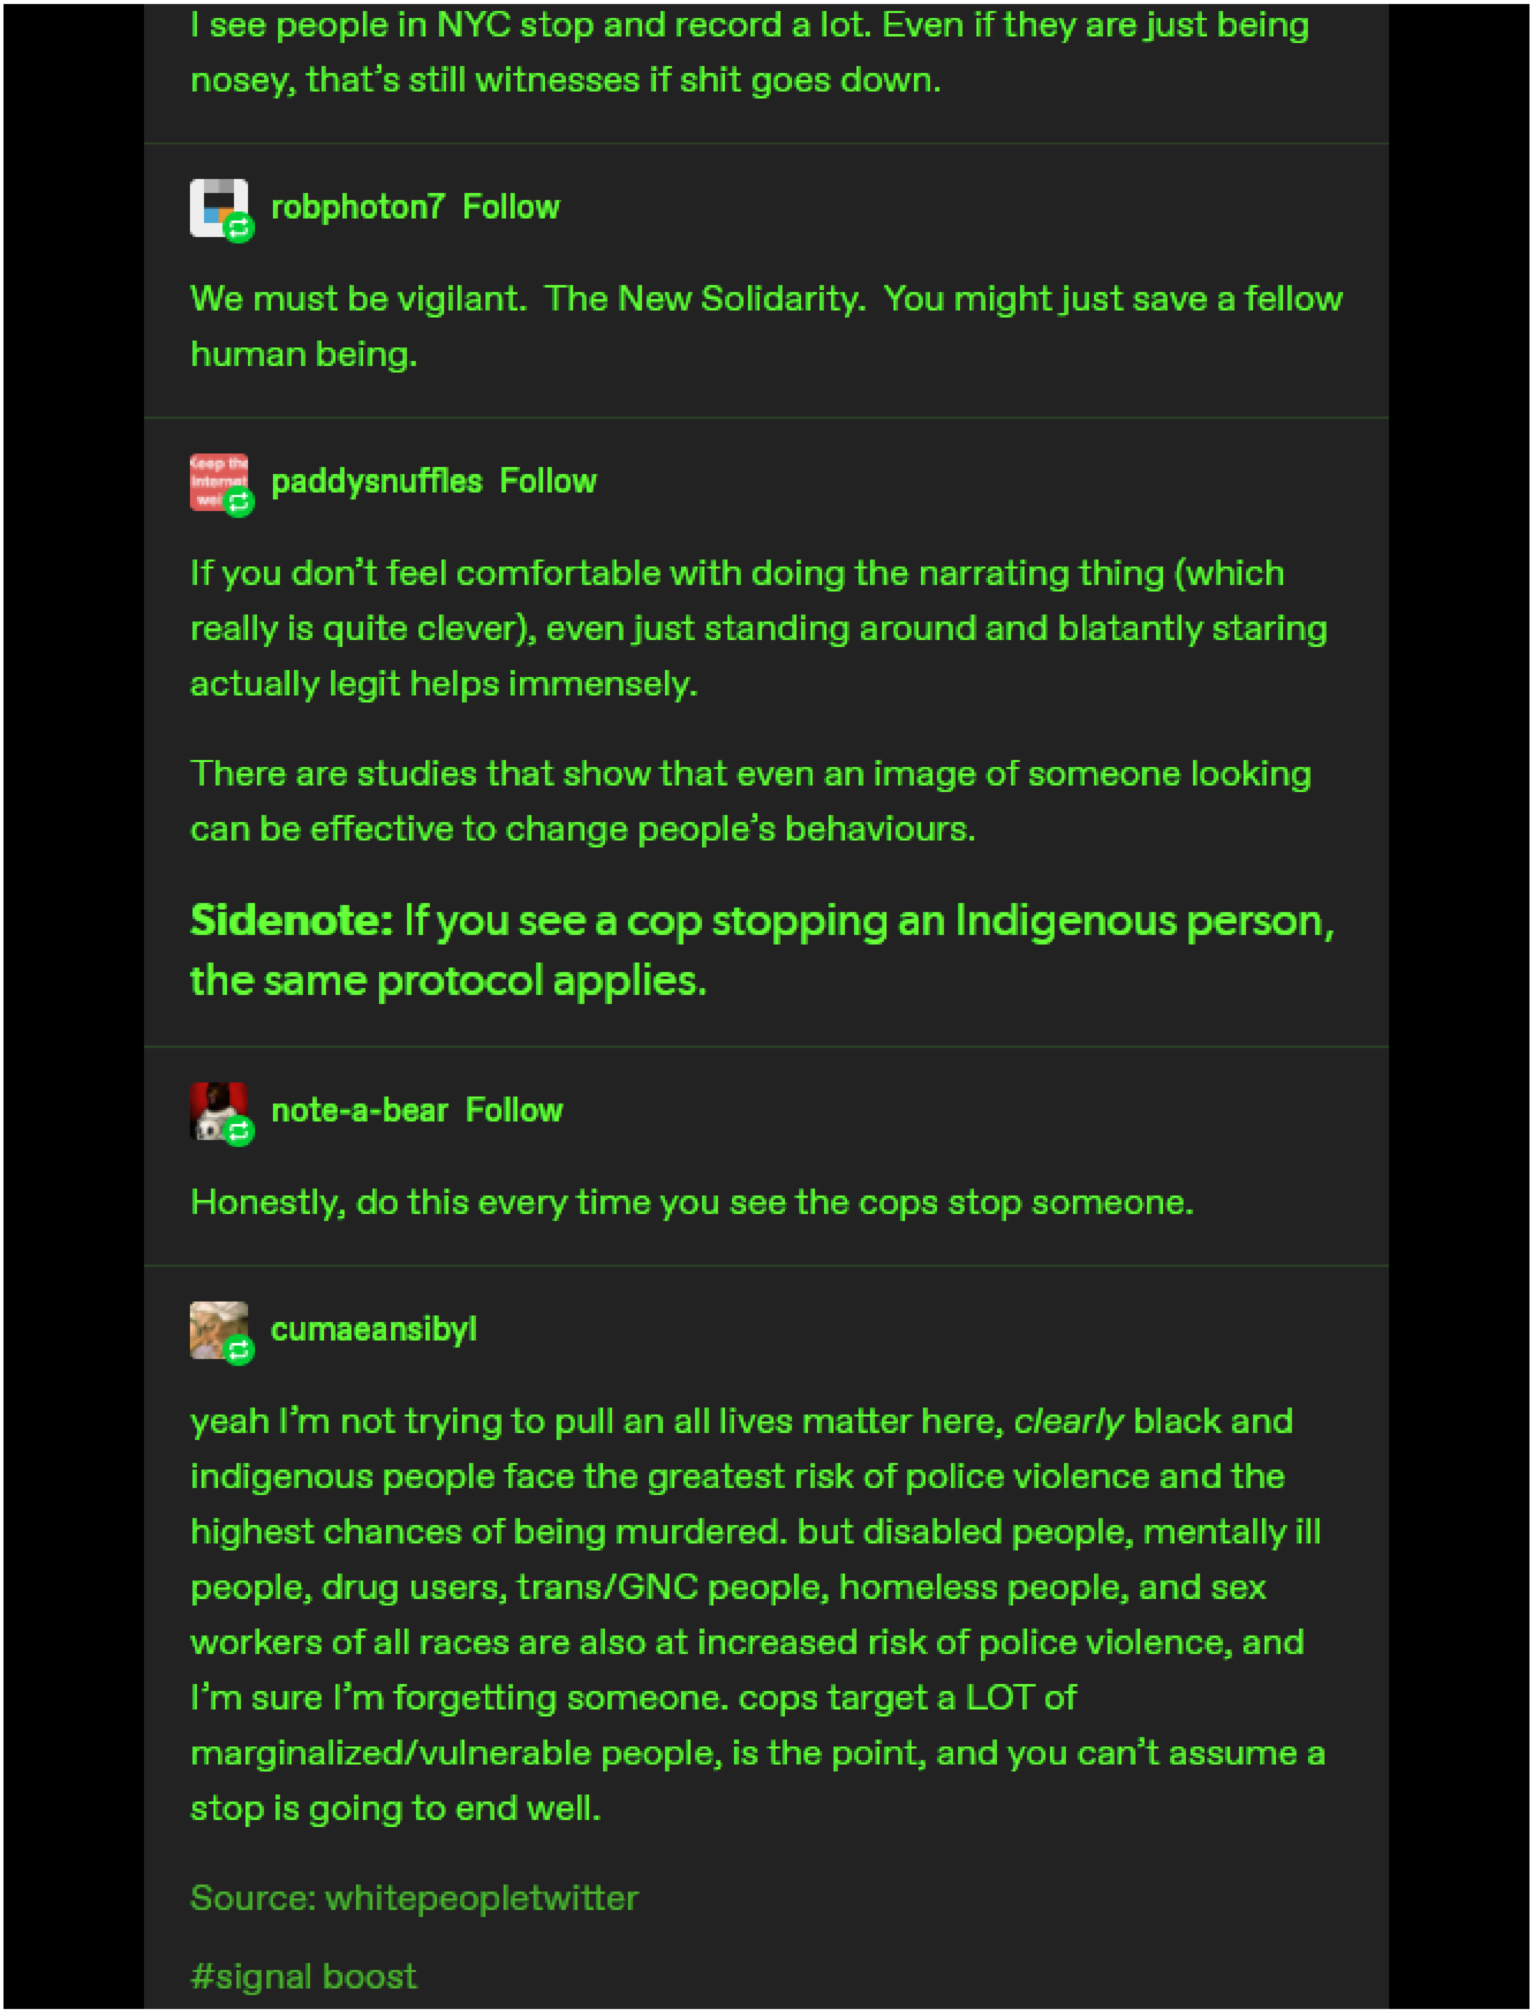
There was an arrest across the street from my place in Oakland one day – three cop cars with a bullhorn and guns out – and before I could even get out the gate there were a couple people posted up and one of them was filming and another one was narrating in a calm but *very* loud voice, just

“HE IS COOPERATING! HIS HANDS ARE EMPTY! HE IS DOING WHAT HE IS TOLD TO DO! HE IS HOLDING STILL! HIS HANDS ARE EMPTY! HE IS NOT BEING THREATENING! HE HAS PUT HIS HANDS BEHIND HIS HEAD AS ASKED! HE IS NOT RESISTING!”

and that was something I hadn’t thought to do before. It certainly let the cops know what the narrative of eye witnesses was going to be.

I especially liked “his hands are empty” because this statement would still be true and a witnessed reason the police should not become violent even if it turned out he had a weapon on his person somewhere.

lotrlocked Follow



I see people in NYC stop and record a lot. Even if they are just being nosey, that's still witnesses if shit goes down.

robphoton7 Follow

We must be vigilant. The New Solidarity. You might just save a fellow human being.

paddysnuffles Follow

If you don't feel comfortable with doing the narrating thing (which really is quite clever), even just standing around and blatantly staring actually legit helps immensely.

There are studies that show that even an image of someone looking can be effective to change people's behaviours.

Sidenote: If you see a cop stopping an Indigenous person, the same protocol applies.

note-a-bear Follow

Honestly, do this every time you see the cops stop someone.

cumaeansibyl

yeah I'm not trying to pull an all lives matter here, *clearly* black and indigenous people face the greatest risk of police violence and the highest chances of being murdered. but disabled people, mentally ill people, drug users, trans/GNC people, homeless people, and sex workers of all races are also at increased risk of police violence, and I'm sure I'm forgetting someone. cops target a LOT of marginalized/vulnerable people, is the point, and you can't assume a stop is going to end well.

details of **Minoan frescos** *portraying the collection of crocus (saffron plant), with offerings to the Saffron Goddess*

Cycladic Akrotiri settlement - Thera, Greece - c.1600 BCE

All of the pigments used by the artists at Akrotiri for painting the frescoes look as though they are mineral based and thus have resulted in the great preservation of the pieces. The colors used in Theran painting include white, yellow, red, brown, blue and black. The technique used is not true fresco, except for a few isolated instances, and instead appears as though the painting was begun while the plaster was still wet, but as though the artist made no effort to keep it wet, and seemed content to complete the work on a dry surface. As a result, often on the same fresco, the paint has penetrated the plaster in some areas but flakes off easily in others.

Balkan sworn virgins- Balkan sworn virgins are women in the Balkan nations of Albania, Kosovo, Macedonia, Serbia, Montenegro, Croatia, and Bosnia; who take a vow of chastity and live as men. The reasons why someone becomes a sworn virgin are varied, including wanting to avoid an arranged marriage, identifying as a man or being attracted to women, or wanting the privileges usually afford to men in society. The sworn virgin oath, the Kanun, is irreligious, allowing Catholics, Orthodox, and Muslims to join. Today, sworn virgins are mostly found in Macedonia and Albania. The Communist Albanian government attempted to stamp out the practice, but there has been some resurgence in it since the 1990s.
